Reasoning for Engaging K-12 Students in Virtual Learning Niess, Margaret L., Gillow-Wiles, Henry, 2021-06-25 The
 COVID 19 pandemic drastically transformed the classroom by keeping students and teachers apart for the sake of safety As
 schools emptied remote learning rapidly expanded through online services and video chatrooms Unfortunately this disrupted
 many students and teachers who were not accustomed to remote classrooms This challenge has forced K 12 teachers to think
 differently about teaching Unexpectedly and with little time to prepare they have been confronted with redesigning their
 curriculum and instruction from face to face to online virtual classrooms to protect students from the COVID 19 virus while
 ensuring that these new online initiatives remain sustainable and useful in the post pandemic world As teachers learn to take
 advantage of the affordances and strengths of the multiple technologies available for virtual classroom instruction their
 instruction both in online and face to face will impact what and how students learn in the 21st century The Handbook of
 Research on Transforming Teachers Online Pedagogical Reasoning for Engaging K 12 Students in Virtual Learning examines
 the best practices and pedagogical reasoning for designing online strategies that work for K 12 virtual learning The initial
 section provides foundational pedagogical ideas for constructing engaging virtual learning environments that leverage the
 unique strengths and opportunities while avoiding the weaknesses and threats of the online world The following chapters
 present instructional strategies for multiple grade levels and content areas best practices that work clearly describing why
 they work and the teachers pedagogical reasoning that supports online implementations The chapters provide ways to think
 about teaching in virtual environments that can be used to guide instructional strategy choices and recognizes the
 fundamental differences between face to face and virtual environments as an essential design component Covering such
 topics as K 12 classrooms pedagogical reasoning and virtual learning this text is perfect for professors teachers students
