Grasslands And People Natures Landscapes:

People and Nature Emilio F. Moran, 2016-07-28 Now updated and expanded People and Nature is a lively accessible introduction to environmental anthropology that focuses on the interactions between people culture and nature around the world Written by a respected scholar in environmental anthropology with a multi disciplinary focus that also draws from geography ecology and environmental studies Addresses new issues of importance including climate change population change the rise of the slow food and farm to table movements and consumer driven shifts in sustainability Explains key theoretical issues in the field as well as the most important research at a level appropriate for readers coming to the topic for the first time Discusses the challenges in ensuring a livable future for generations to come and explores solutions for correcting the damage already done to the environment Offers a powerful hopeful future vision for improved relations between humans and nature that embraces the idea of community needs rather than consumption wants and the importance of building trust as a foundation for a sustainable future

Nature-based Solutions for Urban Resilience and Human Health Bo Hong, Bin Jiang, Henrik Vejre, 2024-05-03 Climate change and rapid urbanization have significant impacts on biodiversity and ecosystem functions and services Nature based solutions NBS is an action to work with and enhance nature to solve social challenges and NBS is an umbrella concept for other mature nature based approaches Blue green spaces BGS can provide a wide range of ecosystem services including mitigation of urban heat island effects reduction of flooding mitigation of air pollution and provision of recreational spaces thereby promoting physical and mental health Hence NBSs can serve as cost effective climate mitigation and adaptation tool that contribute to additional co benefits for ecosystem health and human well being Environmentalists epidemiologists ecologists urban planners and policymakers have paid more attention to NBSs for urban resilience and human health In this Research Topic we hope to discuss these topics 1 ecological exposure and health benefits 2 climate adaptation and human health promotion possibilities by NBSs 3 methodological and theoretical approaches as well as technologies of NBSs corresponding to urban resilience 4 underlying pathways and potential mechanisms of NBSs in improving human health and 5 policies and management for planning and design of the successful implementation of NBSs in relation to urban resilience and human health This Research Topic focuses on but is not restricted to the following issues Nature based interventions for climate adaptation Ecological exposure and physical and psychological health outcomes Climate adaption environmental policies and management Theoretical and case based studies on climate mitigation and adaption by NBSs Ecosystem service perspective on promoting urban resilience This Research Topic welcomes the following types of manuscripts Original Research Hypothesis and Theory Review and Perspective

The Living Landscape Patrick Whitefield, 2009 Being able to read the landscape whilst on a walk makes a huge difference It is like suddenly seeing the world in colour after being used to a lifetime of black and white The Living Landscape looks in detail at landscape formation from rocks through soil to vegetation and the intricate web of interactions

between plants animals climate and the people that makes the landscape around us Each chapter is interspersed with diagrams sketches and notes that Patrick has taken over two decades of living and working in the countryside Patrick will inspire you to reconnect with the land as a living entity not a collection of different scenery and develop an active relationship with nature and the countryside This book invites you to actively engage with nature and experience it first hand Understanding how landscapes evolve is a useful skill for landscape designers farmers gardeners and smallholders but it is also a life enhancing skill all of us can enjoy Patrick offers us the enduring pleasure that costs nothing and yet offers everything Publisher s description

Pasture Landscapes and Nature Conservation Bernd Redecker, Werner Härdtle, Peter Finck, Uwe Riecken, Eckhard Schröder, 2012-12-06 One of the main problems and aims of nature conservation in Europe is to protect semi open landscapes The development during the past decades is characterized by an ongoing intensification of land use on the one hand and an increasing number of former meadows and pastures lying fallow caused by changing economic conditions on the other hand In several countries the establishment of larger pasture landscapes with a mixed character of open grassland combined with shrubs and forests has been recognized as one solution to this problem The book gives an overview of the European projects concerning to this topic nature conservation policy and strategies scientific results and practical experiences creating large scale grazing systems

Natural Heritage of Japan Abhik Chakraborty, Kuniyasu Mokudai, Malcolm Cooper, Mahito Watanabe, Shamik Chakraborty, 2017-10-27 This volume brings together the geological geomorphological and ecological aspects of Japan s natural heritage arguing for dynamic conservation of such heritage and explaining their key characteristics in an accessible format for general readers Sites from World Heritage Properties Natural UNESCO Global Geoparks and National Parks of Japan representing key facets of this heritage are analyzed in depth and the text is supplemented with color photographs and useful information for potential travelers The volume is divided into thematic sections that help understand the diversity of Japan s natural heritage with supplementary information on conservation tourism trends local culture and lifestyles In addition chapters analyzing nature s mechanisms that engender diverse heritage landscapes and conservation sustainable management schemes make this volume a valuable resource for both general readers and those with more specialized interests

Biocultural Diversity in Europe Mauro Agnoletti, Francesca Emanuelli, 2016-02-29 The book collects a selection of the papers presented at the meeting held in the context of the Joint Programme on the Links between Biological and Cultural Diversity JP BiCuD Recognizing the inextricable link between biological and cultural diversity the United Nations Educational Scientific and Cultural Organization UNESCO and the Secretariat of the Convention on Biological Diversity SCBD joined forces and in 2010 launched the Joint Programme on the Links between Biological and Cultural Diversity JP BiCuD The first meeting for the implementation of the JP BiCuD was held in Florence Italy in April 2014 and produced the UNESCO sCBD Florence Declaration which highlights the concept of biocultural diversity The European rural territory is predominantly a biocultural

multi functional landscape providing a crucial and effective space for integration of biological and cultural diversity suggesting the need to revise some of the current strategies for the assessment and management of biodiversity

Grasslands in Europe Peter Veen, Richard Jefferson, Jacques de Smidt, Jan van der Straaten, 2014-04-14 Grasslands are an important element of European nature About half of Europe's endemic species depend on grasslands whether in mountains lowlands river plains or coastal areas Many grasslands originate in traditional agricultural landscapes Modern intensification however brings many of these ecosystems under threat Grasslands in Europe is a tribute to these important ecosystems It was written by an international team of grassland experts who describe twenty four case studies from countries in all of Europe ranging from the grasslands of Gotland and land Sweden to the Spanish Dehesa and from the hay meadows of the British Pennine Dales to the steppes of Turkish Anatolia Together these case studies provide a fascinating glimpse into the various European grasslands their value for nature culture and agriculture and the threats they are facing today The accessible text as well as the rich illustrations will appeal to a wide audience Grasslands in Europe contains a large number of stunning full colour photographs of grassland landscapes species and cultural history It also contains many maps and infographics Thematic chapters provide essential background information on topics such as grassland fauna the history of agriculture grassland communities and the connection between grasslands and climate The book also analyses the opportunities and risks of EU policy to conserve these grasslands It offers a farmer centred outlook to manage and to maintain the European grasslands of high nature value

Conservation in the Anthropocene Fred Van Dyke, 2025-03-06 This book provides a critical assessment of conservation in the Anthropocene grounded in the personal historical and cultural development of human interaction with nature The author argues that conservation can no longer be primarily about preserving nature but must adapt its efforts to promote changes through which humans create a landscape that is neither abandoned nor degraded but used well by humans and non humans alike The book first reviews the origin of ideas and conditions that have led to the concept and classification of the Anthropocene and explores how the author's own interactions with nature were shaped through his experience as a conservation biologist Next it considers how humans have come to be the primary drivers of ecological activity geological events and climate change Chapters then focus on the need for new conservation thinking regarding novel ecosystems urban conservation the role of Indigenous Peoples in conservation and the value of protected areas PAs parks and wilderness The book concludes by identifying strategies for effective conservation and argues for a new formulation of conservation values that redefine human relationships and interaction with nature Chapters are enlivened by the personal experiences of the author and the first person narratives of conservation activists and scientists throughout the world who are learning to practice and succeed in conservation efforts under Anthropogenic conditions Drawing on global examples this book will be of great value to students and scholars of biodiversity conservation and environmental science ready to consider a new way of looking at the care and nurture of nature in the Anthropocene

Grazing and Conservation Management Michiel F. WallisDeVries, Jan Pieter Bakker, Jan Pouwel Bakker, S. E. van Wieren, 1998 Grazing animals enjoy an ambiguous reputation in the field of nature conservation Livestock are often treated as a scourge yet native large herbivores form the prime attraction of many a reserve This book gives the first comprehensive overview of the use of grazing as a tool in conservation management Considering in turn the ecological and historical background the impact of grazing on community structure management applications and future prospects this book examines issues such as the role of herbivores as keystone species the assessment of habitat quality and the function of scientific models in advancing grazing management Large herbivores are shown to be potentially powerful allies in the management of nature reserves particularly in the maintenance enhancement or restoration of biodiversity Grazing and Conservation Management will appeal to conservation biologists and rangeland managers providing them with a clearer understanding of grazing and conservation management

Design and Order Nigel C. Lewis, 2020-09-08 Teaches the principles behind the successful planning and creation of inspired built forms and urban places This book offers an integrated understanding of both the principles and the perception of the design of built environments and public spaces It outlines the fundamental characteristics that are evident in the creation of built form and illustrates how they determine the experience of resultant places It also consolidates the key criteria that need to be taken into consideration in the development of these areas All of the above mentioned aims to provide designers with a solid understanding of the implications of their decisions on perception and behavior during the creation of new spaces Design and Order Perceptual experience of built form Principles in the Planning and Making of Place starts by examining the designing of natural environments and the affect that they have on humans It teaches readers how people experience and are shaped by a space via their eyes brain and overall perception It then instructs on proper grammar of form and syntax so that designers can understand how to pursue design processes systematically The book then takes readers through this process of designing informing them on the principles of form function configuration communication organization color and contrasts building structures good practice and more Seeks to improve the methodological approach to the planning and design of buildings Broadly address all of the functions that impact the realization of new built and urban form Outlines the fundamental characteristics that are evident in the design of built forms and illustrates how these characteristics determine the experience of the resultant places Comprehensively covers the ideas principles and the perception of design Teaches designers to make informed decisions about applying or discarding principles when creating spaces Design and Order is a unique book that will appeal to students and professionals in architecture urban design and planning as well as designers and developers

Landscape Dynamics of Drylands across Greater Central Asia: People, Societies and Ecosystems Garik Gutman, Jiquan Chen, Geoffrey M. Henebry, Martin Kappas, 2020-04-14 This volume is a compilation of studies on interactions of changes in land cover land use and climate with people societies and ecosystems in drylands of Greater Central Asia It explores the effects of collapse of socialist governance

and management systems on land use in various parts of Central Asia including former Soviet Union republics Mongolia and northern drylands of China Often regional land atmosphere feedbacks may have large global importance Remote sensing is a primary tool in studying vast dryland territories where in situ observations are sporadic State of the art methods of satellite remote sensing combined with GIS and models are used to tackle science questions and provide an outlook of current changes at land surface and potential scenarios for the future In 10 chapters contributing authors cover topics such as water resources effects of institutional changes on urban centers and agriculture landscape dynamics and the primary drivers of environmental changes in dryland environment Satellite observations that have accumulated during the last five decades provide a rich time series of the dynamic land surface enabling systematic analysis of changes in land cover and land use from space The book is a truly international effort by a team of scientists from the U S Europe and Central Asia It is directed at the broad science community including graduate students academics and other professionals at all levels within natural and social sciences In particular it will appeal to geographers environmental and social scientists economists agricultural scientists and remote sensing specialists *Medicine Bow-Routt National Forests (N.F.) & Thunder Basin National Grassland (N.G.), Blackhall-McAnulty Analysis*, 2004 **Nature's Metropolis: Chicago and the Great West** William Cronon, 2009-11-02 A Finalist for the Pulitzer Prize and Winner of the Bancroft Prize No one has written a better book about a city Nature's Metropolis is elegant testimony to the proposition that economic urban environmental and business history can be as graceful powerful and fascinating as a novel Kenneth T Jackson Boston Globe Cultural and Spiritual Significance of Nature in Protected Areas Bas Verschuuren, Steve Brown, 2018-08-15 Cultural and spiritual bonds with nature are among the strongest motivators for nature conservation yet they are seldom taken into account in the governance and management of protected and conserved areas The starting point of this book is that to be sustainable effective and equitable approaches to the management and governance of these areas need to engage with people's deeply held cultural spiritual personal and community values alongside inspiring action to conserve biological geological and cultural diversity Since protected area management and governance have traditionally been based on scientific research a combination of science and spirituality can engage and empower a variety of stakeholders from different cultural and religious backgrounds As evidenced in this volume stakeholders range from indigenous peoples and local communities to those following mainstream religions and those representing the wider public The authors argue that the scope of protected area management and governance needs to be extended to acknowledge the rights responsibilities obligations and aspirations of stakeholder groups and to recognise the cultural and spiritual significance that nature holds for people The book also has direct practical applications These follow the IUCN Best Practice Guidelines for protected and conserved area managers and present a wide range of case studies from around the world including Africa Asia Australia Europe and the Americas **Living in a Dynamic Tropical Forest Landscape** Nigel Stork, Stephen M. Turton, 2009-01-26 This book brings together a wealth of

scientific findings and ecological knowledge to survey what we have learned about the Wet Tropics rainforests of North Queensland Australia This interdisciplinary text is the first book to provide such a holistic view of any tropical forest environment including the social and economic dimensions The most thorough assessment of a tropical forest landscape to date Explores significant scientific breakthroughs in areas including conservation genetics vegetation modeling agroforestry and revegetation techniques biodiversity assessment and modeling impacts of climate change and the integration of science in natural resource management Research achieved in part due to the Cooperative Research Centre for Tropical Rainforest Ecology and Management the Rainforest CRC Written by a number of distinguished international experts contains chapter summaries and section commentaries

Conservation Concepts Kurt Jax, 2023-10-31 This book provides a review of the multitude of conservation concepts both from a scientific philosophical and social science perspective asking how we want to shape our relationships with nature as humans and providing guidance on which conservation approaches can help us to do this Nature conservation is a contested terrain and there is not only one idea about what constitutes conservation but many different ones which sometimes are conflicting Employing a conceptual and historical analysis this book sorts and interprets the differing conservation concepts with a special emphasis on narrative analysis as a means for describing human nature relationships and for linking conservation science to practice and to society at large Case studies illustrate the philosophical issues and help to analyse major controversies in conservation biology While the main focus is on Western ideas of conservation the book also touches upon non Western including indigenous concepts The approach taken in this book emphasises the often implicit strategic and societal dimensions of conservation concepts including power relations In finding a path through the multitude of concepts the book showcases that it is necessary to maintain the plurality of approaches in order to successfully address different situations and societal choices Overall this book highlights the very tension which conservation biology must withstand between science and society between what is possible and what we want individually or as a society or even more what is desirable Bringing some order into this multitude will support more efficient conservation and conservation biology This book will be of great interest to students and scholars studying nature conservation from a variety of disciplines including biology ecology anthropology sociology geography and philosophy It will also be of use to professionals wanting to gain an understanding of the broad spectrum of conservation concepts and approaches and when to apply them

Nature and Farming David Norton FLS, Nick Reid, 2013-04-10 Conserving and enhancing native biodiversity on farms brings many benefits as well as providing many challenges Nature and Farming explains why it is important to sustain native plants and animals in agricultural landscapes and outlines the key issues in developing and implementing practical approaches to safeguarding native biodiversity in rural areas The book considers the range of ecological and agricultural issues that determine what native biodiversity occurs in farmland and how it can be secured Many inspiring case studies are presented where innovative approaches towards integrating biodiversity and farm

management have been successful resulting in win win outcomes for both nature and society In the integration and synthesis of these case studies lies the kernel of a new paradigm for nature conservation on farms Although the book focuses on biodiversity conservation on Australian and New Zealand farms the issues and approaches discussed are applicable to many other developed countries especially in Europe and North America *Forest Restoration in Landscapes* Stephanie Mansourian, Daniel Vallauri, 2006-02-23 Is it a sign of the times that last year the Nobel committee chose to award the Nobel Peace prize to Wangari Maathai for having planted 30 million trees We believe so We think that while in the 20th century conservation made significant progress on setting up a global protected area network the 21st century will be a time of forest restoration The fact that Wangari Maathai is the first African woman to receive such an honourable distinction is in itself a major accomplishment What is even more remarkable is that for the first time this highly esteemed prize which has long been associated with political feats was given for an environmental achievement And not just any environmental achievement but forest restoration It is a comfort to see that it is not just us at WWF the global conservation organisation who believe forest restoration to be of global significance but that the Nobel committee is in agreement **Proceedings of the 2024 10th International Conference on Humanities and Social Science Research (ICHSSR 2024)** Zehui Zhan, Jian Liu, Dina M.
