Haws, 2013-11-01 What do Americans think about Mormons and why do they think what they do J B Haws reveals the dramatic transformation of American thought about Mormons over a period of forty years showing how a surprising range of personalities organizations and events the Osmonds

the Olympics the Tabernacle Choir Evangelical Christians the Equal Rights Amendment Sports Illustrated and even Miss America helped to shape the American public's understanding of Mormon history **Together at the Table** Patricia Allen, 2004-01-01 Everywhere you look people are more aware of what they eat and where their food comes from In a cafeteria in Los Angeles children make their lunchtime food choices at fresh fruit and salad bars stocked with local foods In a community garden in New York low income residents are producing organically grown fruits and vegetables for their own use and to sell at market In Madison Wisconsin shoppers select their food from a bounty of choices at a vibrant farmers market Together at the Table is about people throughout the United States who are building successful alternatives to the contemporary agrifood system and their prospects for the future At the heart of these efforts are the movements for sustainable agriculture and community food security Both movements seek to reconstruct the agrifood system the food production chain from the growing of crops to food production and distribution to become more ecologically sound economically viable and socially just Allen describes the ways in which people working in these movements view the world and how they see their place in challenging and reshaping the agrifood system She also shows how ideas and practices of sustainable agriculture and community food security have already woven their way into the dominant agrifood institutions Allen explores the possibilities this process may hold for improving social and environmental justice in the American agrifood system Together at the Table is an important reminder that much work still remains to be done Now that the ideas and priorities of alternative food movements have taken hold it is time for the next even more challenging step Alternative agrifood movements must acknowledge and address the deeper structural and cultural patterns that constrain the long term resolution of social and environmental problems in the agrifood system *Spaces of Hate* Colin Flint, 2013-10-18 While much has been written about hate groups and extreme right political movements this book will be the first that addresses the crucial role that place and context play in generating and shaping them Ranging across geographical scales the essays start with the home and then move from the local to the regional to the national to finally the global In this collection much of the focus is on the U S as the contributors consider a variety of hate activity and hate groups across the country including rural white supremacist and neo Nazi movements anti black sentiment directed towards cities anti gay activity in cities and rural areas and the resurgent Southern nationalist movement Closing with pieces from those who combat hate activity the intention of *Spaces of Hate* is to recognize specific geographic settings likely to foster hate activity Prologue ,1993

Transnational Labour History Marcel van der Linden, 2017-07-05 There has been a growing recognition amongst scholars that labour historians need to look beyond national borders in order to place the history of the working classes into a much broader context than has hitherto been the case Whilst studies focused on individual countries are essential it is only by comparing and contrasting the experiences across time and space that a true understanding of the subject can be attempted Professor Marcel van der Linden has contributed much to the debate on cross border processes and comparisons This

volume makes available in English a collection of twelve of his most important essays on the theme of transnational labour history Previously published in a range of journals and volumes with two original contributions Transnational Labour History brings them together in a single convenient collection together with a new introduction This work will undoubtedly provide an invaluable resource for all students of European labour history *The Invisible Empire in the West* Shawn Lay, 2004 This timely anthology describes how and why the Ku Klux Klan became one of the most influential social movements in modern American history For decades historians have argued that the spectacular growth of the Ku Klux Klan in the 1920s was fueled by a postwar surge in racism religious bigotry and status anxiety among lower class white Americans In recent years a growing body of scholarship has contradicted that appraisal emphasizing the KKK's strong links to mainstream society and its role as a medium of corrective civic action Addressing a set of common questions contributors to this volume examine local Klan chapters in six Western cities Denver Colorado Salt Lake City Utah El Paso Texas Anaheim California and Eugene and La Grande Oregon Far from being composed of marginal men prone to violence and irrationality the Klan drew its membership from a generally balanced cross section of the white male Protestant population Overt racism and religious bigotry were major drawing cards for the hooded order but intolerance frequently intertwined with community issues such as improved law enforcement better public education and municipal reform The authors consolidate focus and expand upon new scholarship in a volume that should provide readers with an enhanced appreciation of the complex reasons why the Klan became one of the largest and most significant grass roots social movements in twentieth century America **Beyond Left & Right** David A. Horowitz, 1997 Beyond Left and Right is a sweeping overview of political insurgency in the United States from the 1880s to the present It is at once a stunning synthesis drawing on a large number of scholarly works and an ambitious and original piece of research The book ranges over diverse individuals and groups that have attacked the established order from the left and the right from the Populists of the 1890s to Ross Perot and the religious right of our times dealing along the way with non interventionists Klans monetary radicals McCarthyites Birchers and Reaganites among many others The Conservative Press in Twentieth-Century America Ronald Lora, William Henry Longton, 1999-10-30 Including representative journals for the 20th and late 19th centuries this book profiles the most significant conservative journals of the past century From the rise of industrial capitalism when laissez faire conservatives praised bountiful America to the end of the Cold War these journals have covered a variety of topics from differing sometimes even contradictory points of view Yet they speak to the richness and comprehensiveness of the conservative press in America Together they provide a focused history of conservative thought in 20th Century America Along with the companion volume on the 18th and 19th Centuries the book provides a valuable resource for students of the conservative press in America Covering a variety of disparate journals the volume arranges them both chronologically and in sections reflecting the themes covered Politics individualism isolationism anti Communism the New Right neoconservatism and public policy are featured in four of the sections while

journals examining the issues of religious conservatism appear in sections devoted to Orthodox Protestant and Catholic journals Yet another section focuses on journals dealing with literary and cultural topics The remaining sections examine libertarianism traditionalist perspectives and extreme right wing publications Each section is unified with an introductory essay exploring the connecting themes and issues
