2000 Michael G. Sideris, 2013-01-11 *Gravity and Geoid* Hans Sünkel, Iginio Marson, 2011-12-30 Recognizing the increasing importance of the role of gravity and the geoid and considering the substantial synergistic effects which result from close cooperation the International Gravity Commission and the International Geoid Commission both scientific bodies of the International Association of Geodesy decided to hold a Joint Meeting under the common topic Gravity and Geoid in Graz Austria from Sept 11 17 1994 The earth's gravity field is increasingly attracting the attention of the geosciences for many reasons As a response of the earth's internal mass distribution it significantly helps us to understand the structure of the earth and its dynamics On the other hand the earth's gravity field controls the orbits of satellites and is of paramount importance for accurate orbit prediction For geodesy the geoid representing the gravity field serves as a unique height

reference surface It is the link between satellite derived positions and useful geodetic coordinates of utmost precision For oceanography the offset of the dynamic ocean surface from the geoid is the signal which bears important information about ocean circulation patterns GGG2000 International Association of Geodesy,2000
