operators Mafia chiefs U S Senators Governors and memorable events One such event solves a mystery of a bomb assassination plot and a shooting politicians were compromised Hoffa pulled strings and there are heretofore undisclosed facts that involve President Kennedy s assassination I never dreamed these details would ever be uncovered *Story-Based Selling* Jeff Bloomfield,2014-06 As a founder of a successful organization that trains and develops sales professionals Jeff Bloomfield has given a lot of thought to why customers say yes In *Story Based Selling* Create Connect and Close Mr Bloomfield says it s really no mystery People buy from people they trust They trust people they like and they like people they connect to And he believes that storytelling is the best way for salespeople and all of us to immediately connect to a customer s feelings of trust and liking He thinks teaching sales professionals to close a deal by presenting their product probing its mutual benefits and overcoming the customer s objections and skepticism is a waste of time Instead he urges them to tell a great story Mr Bloomfield calls upon the latest research in neuroscience to explain the process of communication The truth is that during the salesperson s engagement with clients people quickly base their decisions on how they feel not the way they think so trying to persuade someone by first imparting lifeless facts and figures is self defeating In fact this information goes right to an area of the listener s brain the left brain that drives doubt and skepticism To make a deal we need to connect with the parts of the customer s brain that inspire emotions of trust and empathy By telling a story we can immediately connect to these good gut feelings and drive away the client s fear of being sold Mr Bloomfield tells his own engaging stories while teaching step by step techniques of intentional storytelling to create a fast connection with the listener no matter who is buying or what a person wants to sell **A Note on the Pharmacological Action of Uranium** Dennis Emerson

**The Crisis of Connection** Niobe Way, Alisha Ali, Carol Gilligan, Pedro Noguera, 2020-01-07 A collection of essays that examine the causes of and provide solutions to the widespread alienation and disconnection that beset modern society Since the beginning of the 21st century people have become increasingly disconnected from themselves each other and the world around them A crisis of connection stemming from growing alienation social isolation and fragmentation characterizes modern society The signs of this crisis of connection are everywhere from decreasing levels of empathy and trust to burgeoning cases of suicide depression and loneliness The astronomical rise in inequality around the world has contributed to the critical nature of this moment To delve into the heart of the crisis leading researchers and practitioners draw from the science of human connection to tell a five part story about its roots consequences and solutions In doing so they reveal how we in modern society have been captive to a false narrative that takes individualism as a universal truth The new story now emerging from across the human sciences underscores our social and emotional capacities and needs The science also reveals the ways in which the privileging of the self over relationships and of individual success over the common good as well as the perpetuation of dehumanizing stereotypes have led to a crisis of connection that is now widespread Finally the practitioners in the volume present concrete solutions that show ways we can create a more just and humane world This profoundly important book suggests that our innate human determination to bridge differences and live in vulnerable loving relationships is the antidote to rising fear and anxiety Lyn Mikel Brown author of *Powered by Girl*

Hustlers, Beats, and Others [sound Recording] Ned Polsky, Ranging from pool hustling to pornography this book analyzes deviant branches of American life dispels misconceptions about them and throws new light on sociological theory and method Each chapter radically dissents from one or more mainstream opinions about deviance The first chapter examines the alleged causes for the decline of American poolrooms and finds them wanting traces the rise and fall of poolrooms to historical changes in America s social structure and cogently dissects the recent poolroom revival The second chapter reports a field study of a deviant occupation pool hustling describing the hustler s work situation and career from recruitment to retirement In revealing how pool hustlers although dedicated wholly to a vocation that merely breaks unenforced gambling laws frequently supplement their income by means of outright felonies the author develops a new theory of crime as moonlighting The third chapter sharply criticizes our criminology textbooks for avoiding the study of uncaught adult criminals in their natural environments It demonstrates such research to be both necessary and practical with career felons as well as moonlighters The author describes field techniques he has used with career felons offers new findings gleaned by means of these techniques and answers moral objections to such research The forth chapter presents the first genuinely empirical study of the beat delinquent sub culture in which the author corrects some journalistic views such as that most beats are exhibitionists and some sociological ones such as that retreatist drug users can meet neither legitimate nor criminal success norms The final chapter on the sociology of pornography holds that the courts are wrong to claim that naturalistic erotic art is non pornographic and wronger still to claim that hard core pornography is in Mr Justice Brennan s words utterly without redeeming social importance The author s unusual blend of
