The United States in World War II Charles River Editors, 2025-05-01 All Americans are familiar with the day that will live in infamy At 9 30 a m on Sunday December 7 1941

Pearl Harbor the advanced base of the United States Navy's Pacific Fleet was ablaze. It had been smashed by aircraft launched by the carriers of the Imperial Japanese Navy. All eight battleships had been sunk or badly damaged. 350 aircraft had been knocked out and over 2,000 Americans lay dead. Indelible images of the USS Arizona exploding and the USS Oklahoma capsizing and floating upside down have been ingrained in the American conscience ever since. In less than an hour and a half the Japanese had almost wiped out America's entire naval presence in the Pacific. The United States began 1942 determined to avenge Pearl Harbor but the Allies now including the Soviet Union by necessity did not agree on the war strategy. In 1941 both the Germans and British moved armies into North Africa where Italy had already tried and failed to reach the Suez Canal. The British sought American help in North Africa where British General Bernard Montgomery was fighting the legendary Desert Fox General Erwin Rommel. At the same time Stalin was desperate for Allied action on the European continent that could free up the pressure on the besieged Soviets. President Roosevelt had a consequential decision to make and he eventually decided to land American forces on North Africa to assist the British against Rommel much to Stalin's chagrin. While the Americans and British could merely harass the Germans with air power and naval forces in the Atlantic, Stalin's Red Army had to take Hitler's best shots in Russia throughout 1942. But the Red Army's tenuous hold continued to cripple the Nazi war machine while buying the other Allies precious time. As it turned out, Roosevelt's decision to first fight in North Africa would make an Allied invasion of the European continent possible in 1943. As Rommel pushed east he now had to worry about American forces to his west. The Allies eventually gained the upper hand across North Africa after the battle at El Alamein near the end of 1942 that all but forced the Germans to quit the theater without achieving their objectives. With the Axis forced out of North Africa the Allies had freed up its North African forces for an invasion of Western Europe. Moreover with North Africa as a potential staging ground for that invasion the Germans had to prepare for the possibility of the Allies invading not only from Britain but also from North Africa. The Allies would make that decision in early 1943. Despite fighting in North Africa and the Atlantic the United States still had the resources and manpower to fight the Japanese in the Pacific. Though the Japanese had crippled the American fleet at Pearl Harbor its distance from Japan made an invasion of Pearl Harbor impossible and Japan had not severely damaged important infrastructure. Thus the United States was able to quickly rebuild a fleet still stationed at Pearl Harbor right in the heart of the Pacific. This forward location allowed the United States to immediately push deeply into the Pacific theater. In fact the turning point in the Pacific theater took place in 1942 near Midway Island. The Japanese had moved a sizable fleet intending to occupy Midway Island and draw the American navy near. Instead American aircraft flying from three aircraft carriers that had been away from Pearl Harbor in December 1941 got a bearing on the Japanese fleet and sunk four Japanese aircraft carriers permanently crippling Japan's navy. The Battle of Midway was the first naval battle in history where the enemy fleets never saw or came into contact with each other. Thus 1942 ended with the Allies turning the tide in the Pacific and North Africa giving them momentum entering

The Globe and Anchor Men Mark Ryland Folse, 2024-04-18 Throughout the World War I era the United States Marine Corps efforts to promote their culture of manliness directed attention away from the dangers of war and military life and towards its potential benefits As a military institution that valued physical mental and moral strength the Marines created an alluring image for young men seeking a rite of passage into manhood Within this context the potential for danger and death only enhanced the appeal Mark Ryland Folse's *The Globe and Anchor Men* offers the first in depth history of masculinity in the Marine Corps during the World War I era White manhood and manliness constituted the lens through which the Marines of this period saw themselves how they wanted the public to see them and what they believed they contributed to society Their highly gendered culture helped foster positive public relations allowing Marines to successfully promote the potential benefits of becoming a Marine over the costs even in times of war By examining how the Marine Corps culture public image and esteem within U S society evolved Folse demonstrates that the American people measured the Marines usefulness not only in terms of military readiness but also according to standards of manliness set by popular culture and by Marines themselves The Marines claimed to recruit the finest specimens of American manhood and make them even better strong brave and morally upright They claimed the Marine would be a man with a wealth of travel and experience behind him He would be a proud and worthy citizen who had earned respect through his years of service training and struggle in the Marine Corps Becoming a Marine benefited the man and the new Marine benefited the nation As men became manlier the country did too

The Columbia Companion to American History on Film Peter C. Rollins, 2004-03-24 American history has always been an irresistible source of inspiration for filmmakers and today for good or ill most Americans sense of the past likely comes more from Hollywood than from the works of historians In important films such as *The Birth of a Nation* 1915
