How We Reason Philip Johnson-Laird, 2008-10-23 Good reasoning can lead to success bad reasoning can lead to catastrophe Yet it s not obvious how we reason and why we make mistakes so much of our mental life goes on outside our

awareness In recent years huge strides have been made into developing a scientific understanding of reasoning This new book by one of the pioneers of the field Philip Johnson Laird looks at the mental processes that underlie our reasoning It provides the most accessible account yet of the science of reasoning We can all reason from our childhood onwards but how How we reason outlines a bold approach to understanding reasoning According to this approach we don't rely on the laws of logic or probability we reason by thinking about what's possible we reason by seeing what is common to the possibilities As the book shows this approach can answer many of the questions about how we reason and what causes mistakes in our reasoning that can lead to disasters such as Chernobyl It shows why our irrational fears may become psychological illnesses why terrorists develop crazy ideologies and how we can act in order to improve our reasoning The book ends by looking at the role of reasoning in three extraordinary case histories the Wright brothers use of analogies in inventing their flyer the cryptanalysts deductions in breaking the German's Enigma code in World War II and Dr John Snow's inductive reasoning in discovering how cholera spread from one person to another Accessible stimulating and controversial How we Reason presents a bold new approach to understanding one of the most intriguing facets of being human
