*The Political Economy of Iran* Farhad Gohardani,Zahra Tizro,2019-03-07 This study entails a theoretical reading of the Iranian modern history and follows an interdisciplinary agenda at the intersection of philosophy psychoanalysis economics and politics and intends to offer a novel framework for the analysis of socio economic development in Iran in the modern era A brief review of Iranian modern history from the Constitutional Revolution to the Oil

Nationalization Movement the 1979 Islamic Revolution and the recent Reformist and Green Movements demonstrates that Iranian people travelled full circle This historical experience of socio economic development revolving around the bitter question of Why are we backward and its manifestation in perpetual socio political instability and violence is the subject matter of this study Michel Foucault s conceived relation between the production of truth and production of wealth captures the essence of hypothesis offered in this study Foucault 1980 93 94 maintains that In the last analysis we must produce truth as we must produce wealth indeed we must produce truth in order to produce wealth in the first place Based on a hybrid methodology combining hermeneutics of understanding and hermeneutics of suspicion this monograph proposes that the failure to produce wealth has had particular roots in the failure in the production of truth and trust At the heart of the proposed theoretical model is the following formula the Iranian subject s confused preference structure culminates in the formation of unstable coalitions which in turn leads to institutional failure creating a chaotic social order and a turbulent history as experienced by the Iranian nation in the modern era As such the society oscillates between the chaotic states of socio political anarchy emanating from irreconcilable differences between and within social assemblages and their affiliated hybrid forms of regimes of truth in the springs of freedom and repressive states of order in the winters of discontent Each time after the experience of chaos the order is restored based on the emergence of a final arbiter Iranian leviathan as the evolved coping strategy for achieving conflict resolution This highly volatile truth cycle produces the experience of socio economic backwardness and violence The explanatory power of the theoretical framework offered in the study exploring the relation between the production of truth trust and wealth is demonstrated via providing historical examples from strong events of Iranian modern history The significant policy implications of the model are explored This monograph will appeal to researchers scholars graduate students policy makers and anyone interested in the Middle Eastern politics Iran development studies and political economy

artificial architecture created by the British and French is tearing apart at the seams and no amount of stitching can keep it together The Muslim rulers who have long played the role of maintaining the artificial architecture in the Middle East have lost their most potent weapon fear This was their only method of maintaining Sykes Picot as well as themselves in power Looking forward there are huge unprecedented demographic economic political social technological and geopolitical trends taking shape that will subsume everything standing in its way and sweep away those who try to maintain the status quo In order to understand the present the past needs to be evaluated The actions intrigues plots and plans of the past have come to shape the Middle East today and understanding them will give us a better idea of the current situation of the region To comprehend the Middle East of the future an accurate assessment of the region today is necessary in order to place the emerging trends in their correct context This book looks to provide answers to a number of questions How did the Muslims led by the Ottomans go from a global power to the sick man of Europe Was the Sykes Picot agreement a folly by the French and British empires and poor strategic planning Or part of a carefully constructed plan to divide the Muslim world in order to control it Does the Arab spring confirm the end of Sykes Picot and a new dawn for the people of the region What are the most important emerging trends going forward What do these mean for the region and beyond What myths exist of the region which are simply untrue and upon closer scrutiny do not stack up to the facts *City of Knowledge in Twentieth Century*

**Fuelling Empire** Karl Ittmann, 2025-05-26

Beginning in the late nineteenth century British companies used the resources of empire to create an imperial oil industry that controlled 20% of global oil reserves by 1939 and allowed for the movement of capital and labor between regions and companies The imperial oil complex encompassed colonies Burma and Trinidad and dependent states Iraq and Iraq In both the imperial state used its political and military power to support British oil interests The oil complex drew on the resources of empire but also bolstered it with profits and tax revenues while a global set of oil sites supplied the British military and civilian consumers British companies built an infrastructure of oil production that gave them quasi state power in oil regions while connecting these areas to global and imperial networks of communication and transportation Fueling Empire highlights the significance of Britain to the development of the global oil industry It demonstrates the ways in which the global histories of oil and empire are inextricably interlinked The imperial oil complex relied on a racially stratified hierarchy of labour where white supervisors managed indigenous and migrant workers The harsh conditions of work and low pay fuelled labour conflicts that resonated with emerging colonial nationalist movements that sought to limit the power of oil companies Despite robust private and state security operations the imperial oil complex faced greater insecurity before World War II While the imperial oil complex survived the war in the postwar era decolonization and Britain's financial weakness led to its decline
