Global Greenhouse Regime Who Pays:

The Global Greenhouse Regime Kirk R. Smith, 2013-12-16 Effective policies to prevent global warming and climatic change are urgently required by the world community. However, international negotiations on this issue repeatedly come up against the problems of allocating responsibility for the greenhouse effect and bearing the costs of remedying the situation. This volume offers a multidisciplinary response to the challenge. It presents the scientific, economic and political issues and goes on to describe the policy options available. The different ways of determining responsibility for greenhouse gases and calculating obligations to pay for hazards to the environment are analyzed. The contributors examine the implications for various countries while a concluding chapter explores climatic change negotiations: what is at stake and for whom.

The Common But Differentiated Responsibility Principle in Multilateral Environmental Agreements Tuula Honkonen, 2009-01-01

Built in to every multilateral environmental agreement is a dilemma: how to incorporate justice and fairness on the one hand and effectiveness on the other. Our immense difficulty in meeting this two-edged imperative highlights the fact that we are at best at an early stage in the development of international environmental ethics and that no coherent and effective ethical system yet exists in this context. This remarkable book starts from a conviction that the principle of common but differentiated responsibility (CBDR) offers the best way forward toward the much desired goal of sustainable development. Presenting a full-scale multidisciplinary assessment of the feasibility of the principle of CBDR in multilateral environmental agreements encompassing legal and policy status perspectives as well as historical developments and future prospects, this study identifies issues and aspects in the theoretical and practical application of the CBDR principle. The author responds with in-depth knowledge and awareness to such specific questions as the following: What does the principle of common but differentiated responsibility entail in international environmental law with special reference to international environmental treaties? How is the principle reflected in the burden sharing design of current agreements? What problems and challenges does the practical application of the CBDR principle present to the international community and individual countries as well as to the international environmental regimes themselves? What factors should be taken into account when assessing the success or failure of the principle? What is the status of the principle in international environmental law currently and possibly in the future and what are its implications in the broader international context? The author examines methods for differentiation from both theoretical and actual treaty level viewpoints. She offers examples from the negotiation history of international environmental treaties to shed light on the importance of information sharing and wide participation during the negotiations. Recognizing that in the international environmental field problems of economic development and the geopolitics of global wealth distribution soon come to the fore and that each state's right to development should not be too heavily restricted under international environmental regimes, she demonstrates that the CBDR principle has a strong potential to

formally integrate the environment and development at the international level The study will be of immeasurable value in promoting understanding of how CBDR actually works It will help lawyers and policymakers perceive how different parties want to use the principle and to discern clearly what options could be chosen by the parties which aspects are crucial and what factors influence the effectiveness of the arrangements *Climate Ethics* Stephen Gardiner, 2010-07-30 This collection gathers a set of seminal papers from the emerging area of ethics and climate change Topics covered include human rights international justice intergenerational ethics individual responsibility climate economics and the ethics of geoengineering *Climate Ethics* is intended to serve as a source book for general reference and for university courses that include a focus on the human dimensions of climate change It should be of broad interest to all those concerned with global justice environmental science and policy and the future of humanity **Fair Weather** Ferenc L. Planet Tom Athanasiou,1998 Global warming Soil loss Freshwater scarcity Extinction Overconsumption Toxic waste production Habitat and biodiversity erosion These are only a few of our most urgent ecological crises There are others as

well and despite the popularity of good news environmentalism few of them are going away In this wide ranging grimly entertaining commentary on the environmental debate Tom Athanasiou finds that these problems are exacerbated if not caused by the planet s division into warring camps of rich and poor Writing with passionate intelligence Athanasiou proposes a simple yet radical solution stop indulging easy calming fantasies in which everything seems to change but nothing important changes at all Instead do what needs to be done now while there is still time and goodwill The bottom line he concludes is that there will be no sustainability without a large measure of justice Without profound political and economic change he argues there can be no effective global environmental action no real effort to save the planet **International**

Environmental Law, Policy, and Ethics Alexander Gillespie,2014-08-21 This second edition of International Environmental Law Policy and Ethics revises and expands this groundbreaking study into the question of why the environment is protected in the international arena This question is rarely asked because it is assumed that each member of the international community wants to achieve the same ends However in his innovative study of international environmental ethics Alexander Gillespie explodes this myth He shows how nations like individuals create environmental laws and policies which are continually inviting failure as such laws can often be riddled with inconsistencies and be ultimately contradictory in purpose Specifically he seeks a nexus between the reasons why nations protect the environment how these reasons are reflected in law and policy and what complications arise from these choices This book takes account of the numerous developments in international environmental law and policy that have taken place the publication of the first edition most notably at the 2002 World Summit on Sustainable Development and the 2012 Rio 20 United Nations Conference on Sustainable Development Furthermore it addresses recent debates on the economic value of nature and the problems of the illegal trade in species and toxic waste The cultural context has also been considerably advanced in the areas of both intangible and tangible heritage with increasing attention being given to conservation wildlife management and the notion of protected areas The book investigates the ways in which progress has been made regarding humane trapping and killing of animals and how in contrast the Great Apes initiative and similar work with whales have failed Finally the book addresses the fact that while the notion of ecosystem management has been embraced by a number of environmental regimes it has thus far failed as an international philosophy [The Governance of Climate Change](#) David Held,Marika Theros,Angus Fane-Hervey,2013-05-09

Climate change poses one of the greatest challenges for human society in the twenty first century yet there is a major disconnect between our actions to deal with it and the gravity of the threat it implies In a world where the fate of countries is increasingly intertwined how should we think about and accordingly how should we manage the types of risk posed by anthropogenic climate change The problem is multi faceted and involves not only technical and policy specific approaches but also questions of social justice and sustainability In this volume the editors have assembled a unique range of contributors who together examine the intersection between the science politics economics and ethics of climate change The

book includes perspectives from some of the world's foremost commentators in their fields ranging from leading scientists to political theorists to high profile policymakers and practitioners. They offer a critical new approach to thinking about climate change and help express a common desire for a more equitable society and a more sustainable way of life. *Developing The Environment* C Barrow, 2014-09-19 This book presents a comprehensive overview of global environmental problems past present and future examining their roots and implications and suggesting where possible ways in which they might be mitigated or avoided by careful management.

Global Greenhouse Regime Who Pays : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
