Global Politics Of Unequal Development:

The Global Politics of Unequal Development Anthony Payne, 2017-09-16 Although the phrase North South divide is not heard so much these days what separates rich countries from poor countries is a question that is still very much with us Anthony Payne offers a new way of thinking about these issues grounded in the insights of global political economy and interpreting contemporary global politics as a contest between the development strategies of competing countries *Issues In International Relations* Trevor C. Salmon, Mark F. Imber, 2008-06-06 Students come to study International Relations at university driven by a variety of motives and active concern to study great contemporary issues such as the causes and persistence of war threats of nuclear proliferation and terrorism the persistence of global poverty amid globalization's riches and longer term threats to sustainable development Building on the success of the first edition *Issues in International Relations 2ed* provides students with a clear but stimulating introduction to the most significant issues within international relations in the 21st Century Written by experienced teachers in a jargon free way it assumes no prior knowledge of the subject and allows students approaching International Relations for the first time to gain confidence in what is an often complicated and confusing discipline Completely revised throughout with the addition of ten new chapters this textbook introduces key conceptual issues including theories of international relations power sovereignty and globalisation considers contemporary global problems such as force and security law and military intervention terrorism the environment religion explains the relationship between global politics and economics with chapters on international organisations international political economy and development provides students with boxed revision style notes and case studies throughout the text and a guide to further reading and websites at the end of each chapter This book is ideal reading for students on introductory international relations courses *Making Global Trade Governance Work for Development* Carolyn Deere Birkbeck, 2011-08-18 Discussion of the governance of global trade and the multilateral trading system is too often dominated by developed country scholars and opinion makers with inadequate attention given to developing country perspectives *Making Global Trade Governance Work for Development* gathers a diversity of developing country views on how to improve the governance of global trade and the WTO to better advance sustainable development and respond to the needs of developing countries With contributions by senior scholars commentators and practitioners the essays combine new empirically grounded research with practical insights about the trade policy making process They consider the specific governance issues of interest to developing countries and acknowledge the changing dynamics in the global economy and in trade decision making Hugo Chávez and the Bolivarian Revolution Barry Cannon, 2013-07-19 The emergence of Hugo Chávez in Venezuela has revived analysis of one of Latin America's most enduring political traditions populism Yet Latin America has changed since the heyday of Perón and Evita Globalisation implemented through harsh IMF inspired Structural Adjustment Programmes has taken hold throughout the region and democracy is supposedly the only game in town This book

examines the phenomenon that is Hugo Chavez within these contexts assessing to what extent his government fits into established ideas on populism in Latin America The book also provides a comprehensive and critical analysis of Chavez's emergence his government's social and economic policies its foreign policy as well as assessing the charges of authoritarianism brought against him Written in clear accessible prose the book carries debate beyond current polarised views on the Venezuelan president to consider the prospects of the new Bolivarian model surviving beyond its leader and progenitor Hugo Chavez

The Long Battle for Global Governance Stephen Buzdugan, Anthony Payne, 2016-01-08 The Long Battle for Global Governance charts the manner in which largely excluded countries variously described as ex colonial underdeveloped developing Third World and lately emerging have challenged their relationship with the dominant centres of power and major institutions of global governance across each decade from the 1940s to the present The book offers a fresh perspective on global governance by focusing in particular on the ways in which these countries have organised themselves politically the demands they have articulated and the responses that have been offered to them through all the key periods in the history of modern global governance It re tells this story in a different way and in so doing describes and analyses the current rise to a new prominence within several key global institutions notably the G20 of countries such as Brazil China India and South Africa It sets this important political shift against the wider history of longstanding tensions in global politics and political economy between so called Northern and Southern countries Providing a comprehensive account of the key moments of change and contestation within leading international organisations and in global governance generally since the end of the Second World War this book will be of great interest to scholars students and policymakers interested in politics and international relations international political economy development and international organisations

Global Governance and Biopolitics David Roberts, 2009-12-10 This seminal work is the first fully to engage human security with power in the international system It presents global governance not as impartial institutionalism but as the calculated mismanagement of life directing biopolitical neoliberal

ideology through global networks undermining the human security of millions The book responds to recent critiques of the human security concept as incoherent by identifying and prioritizing transnational human populations facing life ending contingencies en mass Furthermore it proposes a realignment of World Bank practices towards mobilizing indigenous provision of water and sanitation in areas with the highest rates of avoidable child mortality Roberts demonstrates that mainstream IR s nihilistic domination of security thinking is directly responsible for blocking the realization of greater human security for countless people worldwide whilst its assumptions and attendant policies perpetuate the dystopia its proponents claim is inevitable Yet this book presents a viable means of achieving a form of human security so far denied to the most vulnerable people in the world

Exporting Paradise? EU Development Policy towards Africa since the End of the Cold War Tiago Faia, 2012-11-30 The central aim of this book is to define the approach of EU development policy regarding Africa since the end of the Cold War It focuses on the impact of EU development policy on the domain of international development and the objective of the EU to become a prominent international actor The book relies on Martha Finnemore s Social Constructivist research It concentrates on the dynamics maintained by the EU with the normative basis that characterises the structure and agents of international development and assesses how it affected EU behaviour as expressed through its development policy concerning Africa By doing so it exposes both the marked effect of EU development policy in the domain of international development and the form of paradise model of development the EU promoted in Africa Therein the volume largely confirms the identified agents as the source of the norms that define the structure of international development and

the EU as its derivative It argues that EU development policy is currently a general projection of the normative structure of international development specifically regarding the policy orientation of its identified agents As a result the book contends that the EU fell short of its efforts to export its form of paradise to Africa since the end of the Cold War as a corollary of its limitations to stand as a distinct and leading actor in the domain of international development Democracy and Public-Private Partnerships in Global Governance M. Bexell,U. Mörth,2010-08-04 There has been rapid proliferation of public private partnerships in areas of human rights environmental protection and development in global governance This book demonstrates how different forms of partnership legitimacy and accountability interact and pinpoints trade offs between democratic values in partnership operations **Development Organizations** Rebecca Schaaf,2013-07-03 Continuing debates over the meaning of development and awareness of the persistence of poverty have resulted in increasing concern over how to do development There are growing numbers of development organizations undertaking different activities at different scales with different motivations and differing levels of success It is necessary to identify and evaluate these varied organizations in order to recognize their successes and failures Development Organizations is the first introductory text to focus specifically on the variety of organizations involved in development policy and practice It explores the range and role of organizations including community based organizations and civil society actors international non governmental organizations state and other national based actors global forms of governance international financial institutions and transnational corporations The historical and contemporary role of each of these actors is considered with analysis of complex theoretical debates surrounding their existence and their activities The book also explores the political and contested nature of development activities promoted by these organizations and their effects on society the economy and the environment These issues are also considered in context of the Millennium Development Goals the agenda which currently impacts on the operation and outcomes of the broad range of development organizations This invaluable text is richly complimented throughout with case studies to help illustrate the operations of development organizations from the impact of multinational oil companies in the Niger delta to the impact of IMF reforms in Latin America and the Caribbean This clearly written and user friendly text contains a wealth of features to assist student learning including start of chapter learning outcomes and end of chapter summaries discussion topics and suggestions for further reading and relevant websites *New Perspectives in International Development* Melissa Butcher,Theo Papaioannou,2013-02-14 New Perspectives in International Development focuses on the latest thinking in the field moving the debate into areas such as the connection between security conflict and development managing energy crises the impact of environmental and climate change and the role that technology can play in alleviating these challenges The book explores the theme of development as a process of change as historical transformation in relation to contested sites of power it considers how human agency can affect change and the different scales from the local to the transnational at which change can occur The interaction between these threads highlights the

complex processes involved in international development that cannot be understood in isolation Writers bring their own theoretical and empirical tools from social sciences including geography politics economics and environmental science Chapters move from the theoretical to include case studies placing theory in the context of the deliberate actions of people to improve their lives The book concludes by suggesting possible ways forward to link development theories models and practices New Perspectives in International Development is the second of two books in The Open University's International Development series
