Global Resurgence Of Religion And The Transformation Of International Relations:

The Global Resurgence of Religion and the Transformation of International Relations S. Thomas, 2005-10-03 This book is about the global resurgence of culture and religion in international relations and how these social changes are transforming our understanding of International Relation theory and the key policy related issue areas in world politics It is evident in the on going debates over the root causes of 9 11 that there are many scholars journalists and members of the public who still believe culture and religion can be explained away by appeals to more basic economic social or political forces in society Therefore The Global Resurgence of Religion and the Transformation of International Relations presents an argument for taking culture and particularly religion as social forces that are important for understanding world politics in the post Westphalian era

Religion and International Relations Theory Jack L. Snyder, 2011 Annotation Through models that integrate religion into the study of international politics the essays in this collection offer a guide to updating the field

Religion, International Relations and Development Cooperation Berma Klein Goldewijk, 2023-08-28 Religion is high on the agenda of international politics today Though there has been a retreat from religion in Europe the international debate on the meaning and relevance of religion has intensified after the Iranian revolution and has gained new strength with the recent terror attacks the wars in Iraq and Afghanistan the proliferation of intrastate conflict and the process of European integration The issues of secularism and its relationship to democracy globalization and foreign policy are explored in this book It is most relevant for politicians policymakers academic researchers non governmental organisations peace and development practitioners as well as the media The book deals with the practical and policy related consequences of the debate for development organisations and their views on poverty religion and conflict The Society for International Development SID has brought together eminent international writers and leading authorities in the field of religion coming from different backgrounds and regions Among the contributors are Peter Berger Leonardo Boff Abdullahi An Na im Riffat Hassan Thomas Pogge Scott M Thomas and Jonathan Fox

Sacred Aid Michael Barnett, Janice Stein, 2012-08-16 How and why did this happen and what does it mean for humanitarianism writ large

Religious NGOs in International Relations Karsten Lehmann, 2016-01-29 Over the last 30 years non governmental organizations NGOs have become increasingly

present in international discourses and active in international decision making Among the estimated several million NGOs in existence today an increasingly visible number of organizations are defining themselves in religious terms referring to themselves as religious spiritual or faith based NGOs This book documents the initial encounters between the particularly international segment of those organizations and the UN while at the same time covering the Protestant and Catholic spectrum that dominated the early years of their activities in the UN context This book focuses on the construction of the human rights discourse inside two religiously affiliated organizations The Commissions of the Churches on International Affairs CCIA and Pax Romana IMCS ICMICA These organizations have been formally accredited as NGOs by the UN label themselves as religious and look back upon a long and intense cooperation with the UN Lehmann presents material from the archives of those two organizations that has so far rarely been used for academic analysis In doing so as well as documenting the encounters between those organizations and the UN and looking at the Protestant and Catholic spectrum the book provides new insights into the very construction of the notions of the religious and the secular inside those organizations This work will be of great interest to all students of religion and international relations and will also be of interest to those studying related subjects such as global institutions comparative politics and international politics

An Introduction to International Relations and Religion Jeffrey Haynes, 2014-04-23 Not so very long ago it seemed reasonable to assert that the influence of religion on global politics was on the wane As the Western world became increasingly secular and the process of globalisation deepened it seemed inevitable on the surface at least that the voice of religion was to be heard softly if it was to be heard at all This has now changed and changed perhaps irrevocably As Jeff Haynes argues in this thought provoking and important new book various religious actors are now significantly involved in international relations and have become a crucial influence on policy in a post Westphalian world International Relations and Religion guides the reader through the complex issues at the heart of this topic with clarity and insight This updated second edition starts with a close reading of the many theoretical and analytical concepts notably Huntington and the clash of civilisations that have grown up around this area and then concludes with a summary of the issues under discussion and attempts to put into context what it means to live in a world that is increasingly shaped by a whole host of diverse religious groups Essential reading for students of International Relations and Politics

Towards a Postsecular International Politics L. Mavelli, 2014-08-20 An investigation of the postsecular in International Relations and how an increasingly postsecular international politics is contributing to the emergence of new patterns of authority legitimacy and power in the international system [Routledge Handbook of Religion and Politics](#) ,

Thinking International Relations Differently Arlene Tickner, David L. Blaney, 2013-03-01 A host of voices has risen to challenge Western core dominance of the field of International Relations IR and yet intellectual production about world politics continues to be highly skewed This book is the second volume in a trilogy of titles that tries to put the international back into IR by showing how knowledge is actually produced around the world The

book examines how concepts that are central to the analysis of international relations are conceived in diverse parts of the world both within the disciplinary boundaries of IR and beyond them Adopting a thematic structure scholars from around the world issues that include security the state authority and sovereignty globalization secularism and religion and the international an idea that is central to discourses about world politics but which in given geocultural locations does not necessarily look the same By mapping global variation in the concepts used by scholars to think about international relations the work brings to light important differences in non Western approaches and the potential implications of such differences for the IR discipline and the study of world politics in general This is essential reading for anyone who is concerned about the history development and future of International Relations War and Religion in the Secular Age Davis Brown,2019-11-12

Is religion a factor in initiating interstate armed conflict and do different religions have different effects Breaking new ground in political science this book explores these questions both qualitatively and quantitatively concluding that the answer is yes Previous studies have focused on conflict within states or interstate aggression with overtly religious motivations in contrast Brown shows how religion affects states propensities to militarize even disputes that are not religious in nature Different religions are shown to have different influences on those propensities and those influences are linked to the war ethics inculcated in those religions The book analyses and classifies war ethics contained in religious scripture and other religious classics teachings of religions contemporary epistemic communities and religions historical narratives Using data from the new Religious Characteristics of States dataset project qualitative studies are combined with empirical measurements of governments institutional preferences and populations cultures This book will provide interesting insights to scholars and researchers in international security studies political science international law sociology and religious studies

Religion, Politics and International Relations Jeff Haynes,2011-04-07 Bringing together in one collection his most influential essays spanning two decades of research Jeffrey Haynes seeks to explore the complex relationship between religion politics and international relations *Religion, Religious Ethics and Nursing* Marsha Diane Mary Fowler,2011-11-14 The past 25 years have witnessed an escalating discussion on the role of spirituality within health care This scholarly volume is rooted in the belief that not only is religion integral to nursing care but the religious beliefs of both nurse and patient can significantly influence care and its outcome It offers an in depth analysis of the ways in which religion influences the discipline of nursing its practitioners and treatment outcomes Religions in International Political Economy Sabine Dreher,2020-07-02 This book shows how religions and their internal struggles shape key actors and processes in the international political economy It highlights how fundamentalist business oriented Christians in the United States were instrumental in the neoliberal turn in US hegemony how Christianity in the form of prosperity religion transformed Latin America and how reactionary religious movements sharpened state competition through illiberal politics in Turkey India and elsewhere But reactionary movements are also confronted by liberationist or more progressive movements such as Islamic

feminism that seek to build a more inclusive global economy Religions and their ideas should be seen as a constitutive part of neoliberal globalization and its contestation in IPE

The SAGE Handbook of Diplomacy Costas M. Constantinou, Pauline Kerr, Paul Sharp, 2016-08-12 The SAGE Handbook of Diplomacy provides a major thematic overview of Diplomacy and its study that is theoretically and historically informed and in sync with the current and future needs of diplomatic practice Original contributions from a brilliant team of global experts are organised into four thematic sections Section One Diplomatic Concepts Theories Section Two Diplomatic Institutions Section Three Diplomatic Relations Section Four Types of Diplomatic Engagement

Religion in International Relations Theory Nukhet Sandal, Jonathan Fox, 2013-06-19 There is a growing realization among international relations scholars and practitioners that religion is a critical factor in global politics The Iranian Revolution the September 11 attacks the ethno religious conflicts such as the ones in the former Yugoslavia and Sri Lanka are among the many reasons for this increased focus on religion in international affairs The rise of religious political parties across the world ranging from the Christian Democrats in Europe to Bharatiya Janata Party in India similarly illustrated religion's heightened international profile Despite all this attention it is challenging to situate religion within a discipline which has been dominantly secular from its inception Only a few existent works have ventured to integrate religion into core international relations theories such as Classical Realism Neorealism Neoliberalism Constructivism and the English school This work is the first systematic attempt to comparatively assess the place of religion in the aforementioned theoretical strands of international relations with contemporary examples from around the world Written in an accessible and systematic fashion this book will be an important addition to the fields of both religion and international relations Nukhet A Sandal is Assistant Professor in the Political Science Department at Ohio University Jonathan Fox is Professor in the Department of Political Studies at Bar Ilan University Israel

Faith and Politics in South Asia Astha Chadha, 2024-11-18 This book explores the role of faith and politics in shaping the international relations of South Asia Adopting a neo classical realist framework and a discourse historical approach to analyze how religious actors construct their political identities and interests through the interpretation of sacred texts or exegesis the book makes several key contributions to the field of international relations It introduces the concept of exegesis as a novel analytical tool to understand the role of religion in world politics The book argues that exegesis is not only a theological exercise but also a political one as it shapes the worldviews values norms and interests of religious actors The author applies exegesis to three case studies of South Asia the partition of India and Pakistan the rise of Hindu nationalism in India and the emergence of Islamic radicalism in Pakistan and resurging signs of the same in Bangladesh The research then challenges the conventional assumptions of IR such as the secularization thesis the clash of civilizations and the rational actor model by showing how religious actors are not monolithic homogeneous or irrational but rather diverse heterogeneous and strategic The book offers a nuanced and comprehensive understanding of the role of religion in world politics especially in the context of South Asia Highlighting the diversity and

complexity of the religious landscape in South Asia which is home to various faiths sects movements and ideologies this book will be of interest to academics studying global politics international relations Asian Studies and studies on religion and foreign policy **The Ashgate Research Companion to Modern Theory, Modern Power, World Politics** Nevzat

Soguk, Scott G Nelson, 2016-04-28 Deliberately eschewing disciplinary and temporal boundaries this volume makes a major contribution to the de traditionalization of political thinking within the discourses of international relations Collecting the works of twenty five theorists this Ashgate Research Companion engages some of the most pressing aspects of political thinking in world politics today The authors explore theoretical constitutions critiques and affirmations of uniquely modern forms of power past and present Among the themes and dynamics examined are textual appropriation and representation materiality and capital formation geopolitical dimensions of ecological crises connections between representations of violence and securitization subjectivity and genderization counter globalization politics constructivism biopolitics post colonial politics and theory as well as the political prospects of emerging civic and cosmopolitan orders in a time of national religious and secular polarization Radically different in their approaches the authors critically assess the discourses of IR as interpretive frames that are indebted to the historical formation of concepts and to particular negotiations of power that inform the main methodological practices usually granted primacy in the field Students as well as seasoned scholars seeking to challenge accepted theoretical frameworks will find in these chapters fresh insights into contemporary world political problems and new resources for their critical interrogation Interpreting International Politics Cecelia Lynch, 2013-12-04

Interpreting International Politics addresses each of the major traditional subfields in International Relations International Law and Organization International Security and International Political Economy But how are interpretivist methods and concerns brought to bear on these topics In this slim volume Cecelia Lynch focuses on the philosophy of science and conceptual issues that make work in international relations distinctly interpretive This work both legitimizes and demonstrates the necessity of post and non positivist scholarship Interpretive approaches to the study of international relations span not only the traditional areas of security international political economy and international law and organizations but also emerging and newer areas such as gender race religion secularism and continuing issues of globalization By situating describing and analyzing major interpretive works in each of these fields the book draws out the critical research challenges that are posed by and the progress that is made by interpretive work Furthermore the book also pushes forward interpretive insights to areas that have entered the IR radar screen more recently including race and religion demonstrating how work in these areas can inform all subfields of the discipline and suggesting paths for future research
