Global System Politics Economics And Culture:

The Global System Barrie Axford, 1995 This book provides a comprehensive discussion of the nature and impact of globalization in modern times It offers an analysis and critique of the major theories of the world system whilst developing an original position of its own through a reworking of structurationist and institutionalist analysis A feature of Axford's analysis is his consideration of several different dimensions along which globalizing tendencies have emerged In addition to economic interdependence the book concentrates upon political and cultural globalization It does so through reference to a wide range of illustrative materials including the idea of a new world information order the European Union as a new sort of political form and the Islamic banking system as an instance of the localization of global cultural products The Global System will be of interest to all those concerned with the phenomenon of globalization and will be of value to students in politics economics and cultural studies

National Culture and the New Global System Frederick Buell, 1994-09 The three worlds theory is perhaps still the basis for our dominant assumptions about geopolitical and geocultural order writes Frederick Buell but its hold on our imagination and faith is passing fast In its place a startlingly different model the notion that the world is somehow interconnected into a single system has emerged expressing the perception that global relationships constitute not three separate worlds but a single network In the wake of disillusionment with anticolonial nationalism and in response to a wide variety of economic political demographic and technological changes Buell argues we have come increasingly to view the world as complexly interconnected In National Culture and the New Global System he considers how the notion of national culture has been conceived and reconceived in the postwar period For much of the period the three world theory provided economic political and cultural models for mapping a world of nation states More recently new notions of interconnectedness have been developed ones that have had profound and sometimes startling effects on cultural production and theory Surveying recent cultural history and theory Buell shows how our understanding of cultural production relates closely to transformations in models of the world order

Social Theory and Regional Studies in the Global Age Saïd Amir Arjomand, 2014-05-21 A pioneering approach to social theory that rectifies overreliance on Western historical experience of development and modernization In this pioneering volume leading international scholars argue for the development of a new approach to social theory that draws on regional studies for the conduct of comparative analysis in the global age Social Theory and Regional Studies in the Global Age moves beyond facile generalizations based on the historical experience of modernization in the West by highlighting differences rather than similarities and contrasts rather than commonalities and by examining civilizational processes and culturally specific developmental patterns distinctive of different world regions Essays combine comparative and historical sociology with civilizational analysis and the study of multiple and alternative modernities Different patterns of modernization are compared within the framework of global local compressed communication and interaction that results from globalization The introductory chapter puts the present effort in the context

of the seminal work of three generations of comparative sociologists and what follows is a penetrating analysis of modernization and globality opening the way for rectifying the erasure of the historical experience of a very sizeable portion of humankind from the foundation of social theory **Showcasing Globalisation?** Nicola Jo-Anne Smith, 2005 This book examines in depth what is perhaps the test case for globalization the Irish Republic Not only is Ireland hailed as the most globalized economy in the world but its transformation into the Celtic Tiger in the 1990s is seen to demonstrate how nations can flourish in the new global economy By implication if other countries are to emulate Ireland's success they too must submit to the exogenous forces of globalization *Territoriality in the Globalizing Society* J.v. Hagen, Stefan

Immerfall, 2012-12-06 Globalization is one of the buzz words in the 1990s It points to a world in which geographic location becomes increasingly irrelevant a vision that has aroused both hopes and fears Surprisingly globalization is accompanied by increasing regionalization This volume is a timely contribution to the debate on globalization and regionalism Coming from several disciplines its contributors explore the consequences of a world with no geographical barriers Refuting simple notions of globalization they argue that location and space will remain important dimensions of economic and social development In view of this the book develops a more balanced view of the tension between globalization and regionalism
