Global trends Ingomar Hauchler, Paul M. Kennedy, 1994 **Atlas of World History** Patrick Karl O'Brien, Patrick O'Brien, 2002 Synthesizing exceptional cartography and impeccable scholarship this edition traces 12 000 years of history with 450 maps and over 200 000 words of text 200 illustrations **World Christianity, 1970-2000** Winston Crawley, 2001 In *World Christianity 1970 2000* Dr Winston Crawley seeks to continue the overview and analysis of current progress in world Christianity contained in Dr Ralph Winter's work *Twenty Five Unbelievable Years 1945 1969* and Kenneth Scott Latourette's *History of the Expansion of Christianity* Crawley examines the final thirty years of the millennium using Latourette's criteria of numerical growth geographic expansion vitality as shown by new initiatives and influence in society This summary of recent world Christian history provides a great backdrop for believers to face the new millennium with hope determination and an expectation of seeing God work in the world in even greater ways Provided by the publisher **The Return of the White Plague** Matthew Gandy, Alimuddin Zumla, 2003-10-17 The dramatic increase since the 1980s in the global prevalence of tuberculosis is a story of medical failure This collection provides an international survey of current thought on the spread and control of tuberculosis covering historical social political and medical aspects **Future Survey Annual**, 1996 **International Handbook on Geographical Education** Rod Gerber, 2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book Not least because of the twenty four chapters eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union CGEIUG My successors Joe Stoltman Hartwig Haubrich Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education **International Handbook of Cross-Cultural Counseling** Lawrence H. Gerstein, 2009-07-24 The *Handbook of International Counseling* is an effort to bring together the current practices values attitudes and beliefs about counseling from countries around the globe The editors have selected leading experts in the field of counseling in a wide and culturally representative group of countries throughout the world This book will be the first volume that undertakes such an ambitious goal in the field of counseling **Civilization's Crisis: A Set Of Linked Challenges** John Scales Avery, 2017-04-20 Modern

Space-Age Science and Stone-Age Politics John Scales Avery,2016-02-07 Space age science and stone age politics make an extraordinarily dangerous mixture It seems probable that in the future the rapidity of scientific and technological change will produce ethical dilemmas and social tensions even more acute than those we experience today It is likely that the fate of our species and the fate of the biosphere will be made precarious by the astonishing speed of scientific and technological change unless this progress is matched by the achievement of far greater ethical and political maturity than we have yet attained

International Norms and Mobilization for Democracy Manuel Orozco,2018-02-06 This title was first published in 2002 This volume demonstrates that international action for democracy does not solely rest on American democracy promotion strategies but that it actually depends on a variety of global actors and interactions It is suitable for policy experts non governmental organizations international aid agencies and courses on international relations theory comparative politics and Latin American politics The book introduces a theoretical framework about the effect of international norms on democracy promotion connects the role of international institutions and norms with advocacy movements in shaping the mobilization to promote democracy analyses the relationship between the international dimension of democracy promotion and democratization explains the effect of international democracy promotion in the political transition of Nicaragua from 1979 to 2001 and brings into analysis the various modalities of democracy promotion and their effects

World Trade after the Uruguay Round Andras Inotai,Harald Sander,2002-01-31 The completion of the Uruguay round promised a new era in international trading relations However there remains a wide range of issues which could threaten international trading stability including regionalisation and regionalism increased non tariff forms of protection and the proliferation of unilateral and bilateral trade deals This work assesses both the immediate impact of the GATT deal and the future of the world trading system It concludes with an assessment of the long term possibilities for creating a mutually beneficial world economic system

The Need for a New Economic System John Scales Avery,2016-02-07 It is clear that our present economic system is unsustainable Never ending exponential industrial growth on a finite planet is a logical absurdity We are already using resources at a rate which it would take 1 6 planet earths to replace We are already undermining the ecological systems which support all of life Our present economic system has led to an unbelievable degree of economic inequality To maintain this inequality both between nations and within nations military force is used and democracy is replaced by oligarchy The future of human civilization is endangered both by the threat of thermonuclear war and by the threat of catastrophic climate change and both of the twin threats are results of our present

economic system This book documents in detail the serious economic problems of today's world and it also proposes sustainable solutions

The Coming Age of Scarcity Michael N. Dobkowski, Isidor Wallimann, 1998-03-01 Michael Dobkowski and Isidor Wallimann have edited a book that although ominous is not a fatalistic look at the future The Coming Age of Scarcity lays out the perils of not recognizing the reality of genocide or of acknowledging the full implications of warfare Showing how scarcity and surplus populations can lead to disaster The Coming Age of Scarcity is about evil It tells of ethnic cleansing and excavates the world's expanding killing fields The writers in this volume are all too aware that the future suggests that present day population growth land resources energy consumption and per capita consumption cannot be sustained without leading to greater catastrophes The essays in this volume ask What is the solution in the face of mass death and genocide As philosopher John K Roth says in the Foreword The essays can sensitize us against despair and indifference because history shows that human made mass death and genocide are not inevitable and no events related to them will ever be
