Global Responsibility Hans Küng, 2004-02-19 In this timely and urgent work Hans Küng reminds us Every minute the nations of the world spend 1.8 million dollars on military armaments Every hour 1500 children die of hunger related causes Every week during the 1980s more people were detained tortured assassinated made refugee or in other ways violated by acts of repressive regimes than at any other time in history Every month the world's economic system adds over 7.5 billion dollars to the catastrophically unbearable debt burden of more than 1.5 trillion dollars now resting on the shoulders of Third World peoples Every year an area of tropical forest three quarters the size of Korea is destroyed and lost Every decade if present global warming trends continue the temperature of the earth's atmosphere could rise dramatically with a resultant rise in sea levels that would have disastrous consequences particularly for coastal areas of all the earth's land masses In

in what way can spirituality contribute to the newly emerging global ethics Religious scholars distinguish between the esoteric and exoteric sides of belief systems Esotericism centres on the inner awareness and conceals a certain spirituality that is only transmittable to those who could successfully pass through a process of initiatic preparation and transpersonal practices to understand the mystical dimensions of existence In contrast exotericism takes the outer dimension of every day consciousness into account and favours the possibility of the popular understanding of the essence of existence In this perspective truth could be grasped by the public without the need of any transpersonal initiative and transformation of consciousness Esotericism extends beyond religion and has become the spiritual philosophy of life without the need of being essentially religious It has become common notably in the West to identify oneself as spiritualist without having religious affiliations The condition of globality has provided an unprecedented opportunity for spiritual perspectives to grow Ideas perspectives beliefs and philosophies of life are growing outside local national containers to express themselves in different global settings while the forces of globalisation are influencing local identities and cultures While evolving global transformations strengthen people s capability to leave institutionally ordered belief systems it simultaneously enables them to rearrange themselves around alternative perspectives These fundamental transformations cultivate a fabulous landscape for the growth of spirituality

Ethics and Politics Legal Medical Ethics Philosophy Theories Social and Social Media **Normative Justification of a Global Ethic** Uchenna B. Okeja, 2013 The focus of this book is the normativity of global ethic Over the years different cultures and civilizations have been brought closer than never before by globalization This trend has both its negative and positive dimensions Overall the main problem of this present trend of societal organization and human interaction called globalization is a moral issue namely the question how should we treat one another Okeja s global ethic seeks to answer this question It underscores that we should treat one another in our current age of globalization in accordance with the Golden Rule principle The suggestion of this ethic is therefore that we should not treat others the way we would not want to be treated This sounds simple enough The problem however is that it is not exactly clear what this principle of moral conduct would suggest in both simple and complex moral situations Most importantly it is not clear why it is reasonable to treat people the way we would not want to be treated Why in other words should we act in accordance with the Golden Rule principle What is the justification of the demand the Golden Rule makes on us This book answers these and other questions about the normative plausibility of the Golden Rule and thus global ethic from the comparative perspective of ethics in African philosophy It analyzes three stages of the possible normative justification of the moral imperative of global ethic and proposes a deliberative form of justification **The Crisis in Global Ethics and the Future of Global Governance** Peter Burdon, Klaus Bosselmann, Kirsten Engel, 2019 p p1 margin 0 0px 0 0px 0 0px 0 0px font 10 0px Arial This thought provoking book stimulates dialogue and action on the role of global ethics in the governance of individual societies and the international order Such inquiry is imperative given the extraordinary challenges that face the world today Leading figures in environmental ethics philosophy and law approach questions surrounding global ethics and governance from a range of cultural and philosophical perspectives
