Phillip Anthony O'Hara

Global Financial Crises And Reforms Cases And Caveats:

Global Financial Crises and Reforms B. N. Ghosh, 2000-12-14 This is an innovative collection of papers written by a panel of highly respected academics and financial experts Whilst providing an insight into the phenomenology of the financial crises of the 1990s in Asia and Latin America the book also explores possibilities for their solution *Global Financial Crises & Reforms*, 2000

Global Political Economy and the Wealth of Nations Phillip Anthony O'Hara, 2004 Documents the major processes performance institutions problems and policies associated with global political economy This book present an analysis of the changing distribution and production of wealth throughout the world the global technological revolution and a special study of Asia and Eastern Europe in the world system *Global Governance and Financial Crises* Meghnad Desai, Yahia Said, 2003-09-25 This book covers topics that span theory policy and history and range over Latin America Asia as well as OECD countries

International Perspectives on Temporary Work John Burgess, Julia Connell, 2004-07 The numbers of workers employed on a temporary basis has grown massively over the last few decades The benefits to firms of hiring workers on a temporary basis are clear and generally can be reduced to their cheaper short term cost The status of workers employed in this manner however means that they are less likely to receive the same rights as their permanent working colleagues This impressive new book provides the first serious analysis of temporary work and its effect on the economy as well as its ramifications for workers

Financial Globalization and Regionalism in East Asia Takuji Kinkyo, Yoichi Matsubayashi, Shigeyuki Hamori, 2013-12-04 With increased resilience in the financial systems emerging Asian economies were less affected by the recent global financial crisis recovering more quickly from the crisis than major advanced economies Yet Asian financial systems remain underdeveloped More open and efficient financial systems continue to be a key priority for Asia s development strategy Emerging Asian economies need to tackle the new challenges to macroeconomic and financial stability posed by financial globalisation This book identifies the key challenges to Asia s financial development in an era of rapid financial globalisation and discusses their policy implications for financial reforms and regional cooperation in East Asia Particular areas of focus include the impact of financial globalisation on economic stability and inequality in East Asian economies the progress of Asia s regional financial cooperation and lessons from the recent European economic crisis and the priority of financial reforms in individual Asian economies Combining advanced econometric methods and in depth case studies this book provides rigorous and contextual analyses of the most critical issues for Asia s financial development It offers a comprehensive and useful guide for students academics and policymakers interested in the current state and future prospects of Asian financial systems

Tax Systems and Tax Reforms in Europe Luigi Bernardi, Paola Profeta, 2004 This impressive book featuring contributions from leading scholars will be of great interest not only to academics but also to those involved in the financial sectors across the world

Good Governance in the Era of Global Neoliberalism Jolle Demmers, Alex E. Fernández Jilberto, Barbara Hogenboom, 2004 By making use of a wide range of

in depth case studies from various developing countries and post communist states this book analyzes the causes and effects of neoliberal restructuring and the process of depolitization that went with it The contributors critically examine the contradictory nature of good governance and the consequences that have been seen to go with it This important book provides a contribution to the literature on good governance It will provide an interesting read for those with an interest in economics and development studies as well as being useful to policy makers and non governmental organizations

BOOK JACKET *Tax Systems and Tax Reforms in New EU Member States* Luigi Bernardi, Mark Chandler, Luca

Gandullia, 2005-02-03 Building on the work carried out in the 2004 Routledge book *Tax Systems and Tax Reforms in Europe* an international team of contributors now turn their attention to the new EU member states The book compares conditions in the new and potential EU Member states to those in the long standing EU countries Topics covered include A Comparative View of Taxation in the EU and in New Members Tax Policy in EU New Members Tax Policy in New Members under the Stability Pact Tax Administration and the Black Economy As well as investigating countries such as the Czech Republic Estonia and the Baltics Hungary Poland and Slovenia this outstanding book contains a foreword by Vito Tanzi and will be a valuable resource for postgraduates and professionals in the fields of economics politics finance and European studies

Institutional Learning and Knowledge Transfer Across Epistemic Communities Elias G. Carayannis, Ali Pirzadeh, Denisa Popescu, 2011-11-25 Over the past several decades as the pace of globalization has accelerated operational issues of international coordination have often been overlooked For example the global financial crisis that began in 2007 is attributed in part to a lack of regulatory oversight As a result supranational organizations such as the G 20 the World Bank and the International Monetary Fund have prioritized strengthening of the international financial architecture and providing opportunities for dialogue on national policies international co operation and international financial institutions Prevailing characteristics of the global economic systems such as the increasing power of financial institutions changes in the structure of global production decline in the authority of nation states over their national economy and creation of global institutional setting e g global governance have created the conditions for a naturally evolving process towards enabling national epistemic communities to create institutions that comply with global rules and regulations can control crises In this context transfer of technical knowledge from the larger organizations and its global epistemic communities to member communities is becoming a policy tool to convince participants in the international system to have similar ideas about which rules will govern their mutual participation In the realm of finance and banking regulation the primary focus is on transfer of specialized and procedural knowledge in technical domains such as accounting procedures payment systems and corporate governance principles thereby promoting institutional learning at national and local levels In this volume the authors provide in depth analysis of initiatives to demonstrate how this type of knowledge generated at the international organization level is codified into global standards and disseminated to members particularly in the developing world where the legal and

regulatory infrastructure is often lacking They argue that despite the challenges when a country intends to join the global system its institutions and economic structures need to move toward the global norms In so doing they shed new light on the dynamics of knowledge transfer financial regulation economic development with particular respect to supporting global standards and avoiding future crises Financial Crises Brenda Spotton Visano,2006-04-18 This study explores the major patterns of change in the evolution of financial crises as enduring phenomena and analyzes the paradoxical position that crises are at once similar to and different from each other Brenda Spotton Visano examines economic psychological and social elements intrinsic to the process of capitalist accumulation and innovation to explain the enduring similarities of crises across historical episodes She also assesses the impact that changing financial and economic structures have on determining the specific nature of crises and the differential effect these have in focal point manner and extent of transmission to other otherwise unrelated parts of the economy Financial Crises offers a consistent method for interpreting variations in financial crises through time and allows for a better overall appreciation for both the transitory fragility and enduring flexibility of financial capitalism and the potential vulnerability created by on going financial development Topical and informative this key book is of keen interest to all those studying and researching international economics and political economy The Macroeconomics of Global Imbalances Marc Uzan,2008-10-27 This book unites an impressive cabinet of experts to examine questions of global imbalances with particular focus on Europe and Asia demonstrating how Asia has transformed itself and laying out the challenges ahead in the monetary sphere **The Global Commercial Aviation Industry** Sören Eriksson,Harm-Jan Steenhuis,2015-07-16 This book provides a state of the art overview of the changes and development of the civil international aircraft aviation industry It offers a fully up to date account of the international developments and structure in the aircraft and aviation industries from a number of perspectives which include economic geographical political and technological points of view The aircraft industry is characterized by very complex high technology products produced in relatively small quantities The high technology requirements necessitate a high level of R D In no other industry is it more of inter dependence and cross fertilisation of advanced technology Consequently most of the world s large aircraft companies and technology leaders have been located in Europe and North America During the last few decades many developing countries have tried to build up an internationally competitive aircraft industry The authors study a number of important issues including the political economy of the aircraft industry globalization in this industry innovation newly industrializing economies and the aircraft industry This book also explores regional and large aircraft transformation of the aviation industry in Central and Eastern Europe including engines airlines airports and airline safety It will be of great value to students and to researchers seeking information on the aircraft industry and its development in different regions International Remittance Payments and the Global Economy Bharati Basu,James T. Bang,2014-08-07 International Remittance Payments are described mainly as money sent by immigrants to their families and friends in their home countries

These payments provide an important source of income that is mostly used to provide for a variety of basic needs of the non migrating members of immigrant families and thus remittance payments can be considered as a tool to reduce the poverty level of the labor sending countries. However remittances are also used for asset accumulation by some families and for some countries they constitute a good part of foreign funds coming into the country. In spite of their increasing volume over the last few decades a lot of things about remittances are not known and studies estimate that about half of these money transfers are not even recorded. Since these payments are shown to reduce poverty and help economic progress in the remittance receiving countries a better knowledge about remittances would help the debates surrounding immigration remittances and their relation to the global economy. This book provides an overview of remittances in different parts of the world over the last thirty years. It looks at the labor sending and labor receiving countries separately. The text examines the trends, uses, motivations behind sending remittances, cost of sending them and how they are affected by the nature and the development level of different institutional factors. The remittance flows are growing over time and they are used mostly for reducing the uncertainty of life in the less developed parts of the world. However motivation for sending remittances could be improved and thus remittances could be more conducive to economic development if 1 the relation between the remittance decision and the migration decision is better understood and 2 the costs of international money transfers are reduced. More studies about those issues would benefit the international community. Efforts should be made in all fronts to encourage such international flow of funds not only to have a redistribution of income all over the world but also to synchronize the efforts towards global economic development and a better integration of the world economy. This book is aimed researchers, policy practitioners and post graduates studying International Economics or International Economic Relations or Political Science or Economic Development.

Decentralization and Infrastructure in the Global Economy Jonas Frank, Jorge

Martinez-Vazquez, 2015-07-03 The subnational dimension of infrastructure has emerged as one of the greatest challenges in contemporary public finance policy and management. Ensuring the efficient provision of infrastructure represents a challenge for all countries irrespective of their level of centralization or decentralization. This book proposes an innovative approach for the strengthening of decentralized public investment and infrastructure management. **Decentralization and Infrastructure in the Global Economy: From Gaps to Solutions** covers the most important aspects of infrastructure investment in a decentralized setting. It discusses infrastructure gaps and the quality of subnational spending, how functional responsibilities, financing and equalization can be designed, sector specific arrangements in high expenditure areas such as health, education and roads, key steps of the public investment cycle and management and analyses the political economy and corruption challenges that typically accompany decentralized infrastructure projects. This book challenges some of the well accepted principles of intergovernmental fiscal relations and will be useful to researchers and practitioners of public finance policy and management.

Linking Local and Global Economies Carlo Pietrobelli, Arni Sverrisson, 2003-08-28 Clusters of small

and medium sized enterprises SMEs have to adapt continually to a fast changing environment This new book containing contributions on countries ranging from Italy and Mexico to China and India recognises the disparity between conditions in these countries and poses some interesting questions about what might be termed post clu Expanding Frontiers of Global Trade Rules Nitya Nanda,2008-02-07 This book analyses one of the most controversial areas in the political economy of international trade namely the issues surrounding the creation of newtrade rules Various concerns are addressed including the environment labour standards intellectual property rights trade facilitation competition policy investment and government procurem *The Impact of China on Global Commodity Prices* Masuma Farooki,Raphael Kaplinsky,2013-06-17 Drawing on a large number of diverse sources How China Disrupted Global Commodities comprehensively and systematically evidences the trends in the prices of different sets of commodities analyses the drivers of China s demand for commodities the factors constraining global supply and in the role which the financialisation of commodities is playing in constraining commodity production It also documents and the growing role of China as a foreign investor in the commodities sectors All of these trends are woven together to explore the fabric of strategic choices confronting public and private sector decision makers Managing Global Risks in the Urban Age Yee-Kuang Heng,2016-03-03 The first full length exposition of what it terms a global city global risks nexus this volume crosses disciplinary boundaries to draw upon research from Security Studies Geography Sociology and Urban Studies Innovative in its approach integrating theories about Global Cities with those positing a Global Risk Society Yee Kuang Heng positions this research in the midst of two concurrent global trends that will gain more significance in coming years The world is experiencing the consequences of not only rapid globalisation but also urbanization In 2008 the UN declared that more than half the world s population was now urban At the same time highly connected global cities like New York London Tokyo and Singapore also face rapidly spreading global risks such as pandemics and financial crises Unique in developing a typology of global risks that threaten a global city like Singapore beyond its Asian focus the book also draws out thematic and policy lessons pertinent to other global cities Global cities do not simply materialize They are dependent on a range of stakeholders at various levels that produce and re produce its command and control capabilities in the face of global risks Singapore s experiences managing global risks in the financial aviation and maritime domains are common concerns shared by many countries and cities that have or aspire to develop similar critical infrastructure *Innovative Fiscal Policy and Economic Development in Transition Economies* Aleksandr Gevorkyan,2013-07-03 This book explores the problems of fiscal policy as an instrument of economic and social development in the modern environment primarily focusing on the transition economies of Eastern Europe Caucasus and Central Asia Evaluating the transformational experience in these countries this work meets a need for a critical analysis in the aftermath of the 1990s market liberalization reforms of current trends and to outline the roadmap for future development
