Global Restructuring And The Power Of Labour:

Global Restructuring and the Power of Labour Bill Dunn, 2004-05-28 Bill Dunn considers and contests accounts of globalization and post Fordism that see structural economic change in the late Twentieth century as having fundamentally worsened the conditions and weakened the potential of labour Including a comparative survey of restructuring in four major industries automobiles construction microelectronics and finance the book suggests the timing of change and its complex and contradictory nature undermine structural explanations of labour s situation It redirects attention towards labour s political defeats and own institutional shortcomings *Globalization and Labour in the Twenty-First Century* Verity

Burgmann, 2016-04-14 The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license Globalization has adversely affected working class organization and mobilization increasing inequality by redistribution upwards from labour to capital However workers around the world are challenging their increased exploitation by globalizing corporations In developed countries many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances in developing countries militant new labour movements are emerging Drawing upon insights in anti determinist Marxian perspectives Verity Burgmann shows how working class resistance is not futile as protagonists of globalization often claim She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century With case studies from around the world including Greece since 2008 she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change Aging and less agile manifestations of the labour movement decline while new expressions of working class organization and mobilization arise to better battle with corporate globalization This book will be of interest to students and scholars of labour studies globalization political economy Marxism and sociology of work Labour and

Development in East Asia Kevin Gray, 2014-10-10 The Chinese Communist Party s response to the wave of factory strikes in the early summer of 2010 has raised important questions about the role that labour plays in the transformation of world orders In contrast to previous policies of repression towards labour unrest these recent disputes centring round wages and working conditions have been met with a more permissive response on the part of the state as the CCP ostensibly seeks to facilitate a transition away from a model of political economy based on low road labour relations and export dependence *Labour and Development in East Asia* shows that such inter linkages between labour geopolitical transformations and states developmental strategies have been much more central to East Asia s development than has commonly been recognised By adopting an explanatory framework of the labour geopolitics development nexus the book theorises and provides an historical analysis of the formation and transformation of the East Asian regional political economy from the end of the

Second World War to the present with particular reference to Japan South Korea Taiwan and China This book will be required reading for students and scholars of international relations development studies and comparative politics

Historical Dictionary of Organized Labor Sjaak van der Velden, 2021-04-22 From the start of its existence organized labor has been the voice of workers to improve their economic social and political positions Beginning with small and very often illegal groups of involved workers it grew to the million member organizations that now exist around the globe It is studied from many different perspectives historical economic sociological and legal but it fundamentally involves the struggle for workers rights human rights and social justice In an often hostile environment organized labor has tried to make the world a fairer place Even though it has only ever covered a minority of employees in most countries its effects on their political economic and social systems have been generally positive Despite growing repression of organized labor in recent years membership numbers are still growing for the benefit of all employees including the non members Historical Dictionary of Organized Labor Fourth Edition makes the history of this important feature of life easily accessible The reader is guided through a chronology an introductory essay 600 entries on the subject appendixes with statistical material and an extensive bibliography including Internet sites This book gives a thorough introduction into past and present for historians economists sociologists journalists activists labor union leaders and anyone interested in the development of this important issue

Constructing Marxist Ethics , 2015-02-04 Does Marxism possess an ethical impulse Is there a moral foundation that underpins the Marxist critique of capitalism and the vision for social progress The essays collected in Constructing Marxist Ethics Critique Normativity Praxis argue that there is such an ethical grounding for Marxist theory The essays each from different vantage points construct what a Marxian ethics should look like what kind of values should be at the heart of the Marxian enterprise Contributors are Dan Albanese Paul Blackledge Bob Cannon Tony Burns Ian Fraser Ruth Groff Wadood Hamad Christoph Henning Peter Hudis Lauren Langman George E McCarthy Sean Sayers Michael J Thompson and Lawrence Wilde

International Abstracts of Human Resources , 2006 **The New Politics of Transnational Labor** Marissa Brookes, 2019-03-15 Over the years many transnational labor alliances have succeeded in improving conditions for workers but many more have not In The New Politics of Transnational Labor Marissa Brookes explains why this dichotomy has occurred Using the coordination and context appropriate CCAP theory she assesses this divergence arguing that the success of transnational alliances hinges not only on effective coordination across borders and within workers local organizations but also on their ability to exploit vulnerabilities in global value chains invoke national and international institutions and mobilize networks of stakeholders in ways that threaten employers core material interests Brookes uses six comparative case studies spanning four industries five countries and fifteen years From dockside labor disputes in Britain and Australia to service sector campaigns in the supermarket and private security industries to campaigns aimed at luxury hotels in Southeast Asia Brookes creates her new theoretical framework and speaks to debates in international and

comparative political economy on the politics of economic globalization the viability of private governance and the impact of organized labor on economic inequality From this assessment Brookes provides a vital update to the international relations literature on non state actors and transnational activism and shows how we can understand the unique capacities labor has as a transnational actor **Asymmetric Crisis in Europe and Possible Futures** Johannes Jäger, Elisabeth

Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics *Condensed Capitalism* Daniel Sidorick, 2017-02-15 Corporations often move factories to areas where production

costs notably labor taxes and regulations are sharply lower than in the original company hometowns Not every company however followed this trend One of America s most iconic firms the Campbell Soup Company was one such exception it found ways to achieve low cost production while staying in its original location Camden New Jersey until 1990 The first in depth history of the Campbell Soup Company and its workers *Condensed Capitalism* is also a broader exploration of strategies that companies have used to keep costs down besides relocating to cheap labor havens lean production flexible labor sourcing and uncompromising antiunionism Daniel Sidorick s study of a classic firm that used these methods for over a century has therefore special relevance in current debates about capital mobility and the shifting powers of capital and labor Sidorick focuses on the engine of the Campbell empire the soup plants in Camden where millions of cans of food products rolled off the production line daily It was here that management undertook massive efforts to drive down costs so that the marketing and distribution functions of the company could rely on a limitless supply of products to sell at rock bottom prices It was also here that thousands of soup makers struggled to gain some control over their working lives and livelihoods countering company power with their own strong union local Campbell s low cost strategies and the remarkable responses these elicited

from its workers tell a story vital to understanding today's global economy Condensed Capitalism reveals these strategies and their consequences through a narrative that shows the mark of great economic and social forces on the very human stories of the people who spent their lives filling those familiar red and white cans Labour and Transnational Action in Times of Crisis Andreas Bieler, Roland Erne, Darragh Golden, Idar Helle, Knut Kjeldstadli, Tiago Matos, Sabina Stan, 2015-07-10 Processes of neoliberal globalization have put national trade unions under pressure as the transnational organization of production puts these labour movements in competition with each other The global economic crisis has intensified these pressures further And yet economic and political integration processes have also provided workers with new possibilities to organize resistance Emphasizing the importance of agency this book analyzes transnational labour action in times of crisis historically and now It draws on a variety of fascinating cases across formal and informal collectives in order to clarify which factors facilitate or block the formation of solidarity Moving beyond empirical description of cases to an informed understanding of collective action across borders the volume provides an insightful theorization of transnational action

Strikes Around the World, 1968-2005, 2007 Are strikes going out of fashion or are they an inevitable feature of working life This is a longstanding debate The much proclaimed withering away of the strike in the 1950s was quickly overturned by the resurgence of class conflict in the late 1960s and 1970s The period since then has been characterized as one of labor quiescence Commentators again predict the strikes demise at least in the former heartlands of capitalism Patterns of employment are constantly changing and strike activity reflects this The continuing decline of manufacturing in mature industrialized economies is of major importance here though the global relocation of manufacturing may lead to some relocation of strikes Simultaneously we see the growth of disputes in the service sector the tertiarization of strikes This is evident particularly in public services including health care social care and education and is accompanied by a feminization of strikes given the prevalence of women working there This unique study draws on the experience of fifteen countries around the world South Africa Argentina Canada Mexico United States Korea Australia New Zealand Belgium Denmark France Germany the Netherlands Sweden and the United Kingdom Covering the high and low points of strike activity over the period 1968-2005 the study shows continuing evidence of the durability adaptability and necessity of the strike The Routledge International Handbook of Transnational Studies Margit Fauser, Xóchitl Bada, 2024-01-23 The Routledge International Handbook of Transnational Studies offers a comprehensive overview of the dynamic evolution and the most recent debates in this interdisciplinary field The collection assembles scholarship from the social sciences and the humanities that share a critical perspective extending beyond the nation state The contributions investigate sustained connections events and activities across state borders and acknowledge prevailing global power asymmetries The handbook examines the dynamics of transnational processes across seven main themes epistemological and methodological principles transnational migrant practices and family remittances mobilities and self identities social protection organizations and social movements

culture religion and the arts and architecture and urban planning The contributors engage with theoretical developments and analyze empirical cases involving a wide array of critical contemporary topics such as expatriate voting first and second generation return migration state sponsored cross border marriages access to health care transnational social work global religious aesthetics transnational art corridors literary translation remittance financed architecture and transnational processes of real estate development and gentrification among others They display a series of cross cutting approaches including postcolonial theory racism and gender and a focus on agency state policies and macro structures and transnational inequalities This book features multidisciplinary scholars in transnational studies from Australia Belgium Canada Finland Germany Italy Malaysia Mexico the Philippines Poland Spain Sweden the United Kingdom and the United States This handbook will be of interest to scholars interested in global and transnational perspectives across a wide range of disciplines It will serve as a key resource for academics students and other interested audiences seeking to familiarize themselves with the study of contemporary issues that cross state borders

Globalization, Democratization and Multilateralism Stephen Gill, 2016-07-27 Globalization involves structural changes in forms of state society and culture ecology and political economy and in ethics and expectations In this collection globalization and multilateralism are linked to questions of epistemology ontology and strategy Epistemology entails critical questioning of the nature of knowledge and its foundations Ontology concerns the significant factors in global political economy Strategy involves how to move world affairs from its present condition towards normative goals enunciated in the MUNS programme so as to promote collective ability to channel structural change in a more democratic direction

The Oxford Handbook of Economic Imperialism Zak Cope, Immanuel Ness, 2022 Including thirty four chapters written by academics and experts in the field of international political economy The Oxford Handbook of Economic Imperialism examines the history of economic imperialism from the early modern age to the present The Handbook demonstrates the persistence of economic imperialism in today's postcolonial world and the enduring control wielded by great powers even after the end of formal empire Moreover the Handbook reveals how emerging powers are expanding economic control in new geographic and geopolitical contexts and highlights the significance of economic imperialism in the structures relations processes and ideas that sustain poverty and conflict worldwide

Globalisation contested Louise Amoore, 2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license This exciting book provides an illuminating account of contemporary globalisation that is grounded in actual transformations in the areas of production and the workplace It reveals the social and political contests that give global its meaning by examining the contested nature of globalisation as it is expressed in the restructuring of work Rejecting conventional explanations of globalisation as a process that automatically leads to transformations in working lives or as a project that is strategically designed to bring about lean and flexible forms of production this book advances an understanding of the social practices that constitute global change Through case studies

that span from the labour flexibility debates in Britain and Germany to the strategies and tactics of corporations and workers the author examines how globalisation is interpreted and experienced in everyday life Contestation she argues is about more than just direct protests and resistances It has become a central feature of the practices that enable or confound global restructuring This book offers students and scholars of international political economy sociology and industrial relations an innovative framework for the analysis of globalisation and the restructuring of work

Historical Materialism and Globalisation Mark Rupert, Hazel Smith, 2016-04-29 Now that Soviet style socialism has collapsed upon itself and liberal capitalism offers itself as the natural necessary and absolute condition of human social life on a worldwide scale this book insists that the potentially emancipatory resources of a renewed and perhaps reconstructed historical materialism are more relevant in today's world than ever before Rather than viewing global capitalism as an eluctable natural force these essays seek to show how a dialectic of power and resistance is at work in the contemporary global political economy producing and contesting new realities and creating conditions in which new forms of collective self determination become thinkable and materially possible It will be vital topical reading for anyone interested in international relations international political economy sociology and political theory

The State in Africa Tatah Mentan, 2025-09-28 This book critically analyzes the complex relationship between the African state and capitalist globalization It describes in great detail the significant effects of the various historical trajectories of global capitalist expansion on the nature and functions of the African state while focusing on the present triumph of globalized neo liberalism on the African continent The history of the state in Africa has been misread and misinterpreted through the Eurocentric convictions of European African scholars alike The State in Africa has since its colonial inception has served as the best possible political shell for capitalism enabling it to penetrate again possession and establish itself firmly and securely regardless of institutional and leadership instability at the helm The glaring artificiality of the state in Africa coupled with the failure of the local ruling classes to rise above the limitations of their provenance is to blame for the myriad crises of one party authoritarianism violent coups and military dictatorship It is also to blame for the progressive alienation of the African people and the prevailing crises of identity and citizenship Independence does not seem to have changed much as the state is still controlled by the most powerful foreign economically dominant class which has appropriated political power as well to further compound the subjection and exploitation of the oppressed Africans Today the continent continues to grapple with underdevelopment civil wars intra state conflicts political instability state failure and outright collapse thus calling into question the viability and survivability of the Westphalian state model in Africa

Power and Transnational Activism Thomas Olesen, 2010-12-03 Offering new and critical insights on global activism and power it features case studies on China and Tibet HIV AIDS climate change child labour the WTO women and the UN the global public sphere world social forums and global civil society

The International Handbook on Gender, Migration and Transnationalism Laura Oso, Natalia Ribas-Mateos, 2013-01-01 The highly unique International Handbook on

Gender Migration and Transnationalism represents a state of the art review of the critical importance of the links between gender and migration in a globalizing world. It draws on original largely field based contributions by authors across a range of disciplinary provenances worldwide. This unprecedented and ambitious Handbook addresses core debates on issues of gender migration transnationalism and development from a migrationdevelopment nexus. Using an analytical approach it explores the influence of global changes namely the analysis of transnational migration flows from the perspective of the articulation of production and reproduction chains. Particular attention is paid to so called global care chains with new models developed around the emerging trends played out by women in contemporary mobility flows. This path breaking Handbook will provide a thought provoking read for a multidisciplinary audience of academics researchers and students of social science disciplines encompassing economics sociology geography demography political science and political sociology migration studies family and gender studies and labour markets. The Handbook will also be of major interest to and importance for local and national governments international agencies and their policymakers and administrators.

Research Handbook on Transnational Labour Law Adelle Blackett, Anne Trebilcock, 2015-09-25. The editors' substantive introduction and the specially commissioned chapters in the Handbook explore the emergence of transnational labour law as a field along with its contested contours. The expansion of traditional legal methods such as treaties is juxtaposed with the proliferation of contemporary alternatives such as indicators framework agreements and consumer led initiatives. Key international and regional institutions are studied for their coverage of such classic topics as freedom of association equality and sectoral labour standard setting as well as for the space they provide for dialogue. The volume underscores transnational labour law's capacity to build bridges including on migration climate change and development.
