Global Social Movements:

Transnational Social Movements and Global Politics Jackie Smith, Charles Chatfield, Ron Pagnucco, 1998-01-01

Transnational Social Movements and Global Social Politics examines a cast of global actors left out of the traditional studies of international politics. It generates a theoretically informed view of the relationships between an emerging global civil society partly manifested in transnational social movements and international political institutions. This book consists of fifteen essays all written by experts in the field. The first three parts analyze the rise of transnational social movements in the context of broad twentieth century trends. A fourth part builds a theoretical framework from which organizations influencing global governance can be viewed.

Social Movements and Global Social Change Robert K. Schaeffer, 2014. Social Movements and Global Social Change teaches students not only about how social change occurs but also about how social movements can contribute to this change. The book links two concepts in sociology that are often related in real life but that can seem disconnected in traditional approaches to teaching these courses. The book examines different types of social movements including those often ignored in social change textbooks such as riots, migration and disorganized protest. It also looks at citizens' rights and inequality in connection to social movements and change. The book features global perspectives and examples throughout.

Global Social Movements Continuum, 2004-11-01. Articles by Sarah Ashwin, Upendra Baxi, Jim Beckford, Cynthia Cockburn, John Forrester, Paul Havemann, Paul Lubeck, John Mattausch, Ronaldo Munck, Peter Newell, Deborah Stienstra and Steven Yearley.

The New Global Politics Harry E. Vanden, Peter N. Funke, Gary Prevost, 2017-03-16. Over the past decade there has been an unprecedented mobilization of street protests worldwide from the demonstrations that helped bring progressive governments to power in Latin America to the Arab Spring to Occupy movements in the United States and Europe to democracy protests in China. This edited volume investigates the current status, nature and dynamics of the new politics that characterizes social movements from around the world that are part of this revolutionary wave.

Spanning case studies from Latin America, North and South Africa, the Middle East, Asia, Europe and North America, this volume examines the varied manifestations of the current cycle of protest which emerged from the Global South and spread to the North and highlights their interconnections, the globalized nature of these social movements. Analytically converging around Sidney Tarrow's emphasis on protest cycles, political opportunity structures and identity, the individual chapters investigate processes such as global framing, internationalization, diffusion, scale shifts, externalizations and transnational coalition building to provide an analytic cartography of the current state of social movements as they are simultaneously globalizing while still being embedded in their respective localities. Looking at new ways of thinking and new forms of challenging power, this comprehensive volume will be of great interest to graduates and scholars in the fields of globalization, social movements and international politics.

Social Movements in a Global Context Rod Bantjes, 2007. Social Movements in a Global Context focuses on interpreting the resurgence in popular protest for a growing audience of university students.

Most of this new activity is either in response to or makes use of emerging global regimes hence the book's emphasis on the global context as well as on strategies for trans local mobilization. Equally important is the fact that the book adopts a Canadian perspective and highlights where possible Canadian case studies. The chapters are organized around an explanatory framework such as class analysis or a core analytical question. Some of the chapters deal with historical content but all make links to the immediate present and attempt to engage students in ongoing debates and struggles. The author makes connections between movements and the state focusing on the dynamic of co-optation/coercion. The author also pays attention to the spatial dimensions of movement formation and tactics which are particularly relevant in the present era of globalization.

Social Movements in the Global South S. Motta, A. Gunvald Nilsen, 2011-03-29 Popular struggles in the global south suggest the need for the development of new and politically enabling categories of analysis and new ways of understanding contemporary social movements. This book shows how social movements in Africa, South Asia, Latin America and the Middle East politicize development in an age of neoliberal hegemony.

Global Movement Ruth Reitan, 2013-10-18 Critical research and theorizing on the Anti or Alter Globalization Movement has exploded over the last two decades. This volume provides a platform for scholar activists themselves to share insights from engaged research and to critically reflect on movement histories and internal dynamics. It also highlights ways in which activists are reaching beyond their geographical and issue boundaries to link with others in struggle to construct a broader global movement of the left and beyond. Case studies span the social movement spectrum from more traditional concerns with class, the primacy of the labor movement, economic redistribution and justice through the so-called new movements of identity and post-materialist issues of peace, the environment, gender and indigenous struggles to the newest currents in post-autonomy, post-anarchism and de/anti-coloniality. Together these studies show that what began in Chiapas with the Zapatista cry of *basta ya* as an anti-globalization movement morphed for a time into alter-globalization and global peace and justice and may now be emerging as a counter-hegemonic project of and for global democratization. This book was published as a special issue of *Globalizations*.

Social Movements: The Key Concepts Graeme Chesters, Ian Welsh, 2010-10-04 *Social Movements: The Key Concepts* provides an insightful contemporary introduction to some of the frequently encountered terms and groups that are central to the study of collective action and social and political activism. Following an A-Z format the entries defined and discussed are drawn from the following areas: the old social movements of the nineteenth century; the new social movements of the 1960s and 1970s; the rise of contemporary network movements. Key American, European and global social movements are addressed with each entry related to contemporary developments and emergent tendencies within the field. Including helpful references for further study, this concise and up-to-date guide is of relevance for those studying a range of disciplines including sociology, politics, cultural studies and human geography.

Moghadam,2020-02-17 What is the connection between globalization and social movements How have people collectively responded to globalization s economic political and cultural manifestations and challenges And how are contemporary social movements and networks affecting the progression of globalization This clear and concise book answers these questions by examining social movements and transnational networks in the context of globalization in all its forms economic political cultural and technological alike Deftly combining nuanced theory with rich empirical examples leading scholar Valentine M Moghadam provides four in depth case studies global feminism and transnational feminist networks global Islamism ranging from parliamentary to extremist the global justice movement and the World Social Forum and varieties and gender dynamics of populisms In a new chapter she draws attention to the emergence and growth of right wing populist movements political parties and governments not only in Europe but in the Global South as well Defining globalization as a complex process in which the movement of capital peoples organizations movements and ideas takes on an increasingly international form the author shows how growing physical and electronic mobility has helped to create dynamic global social movements Exploring the historical roots of Islamism feminism global justice and populism Moghadam also shows how these movements have been stimulated by relatively recent globalization processes She reveals their similarities and differences internal differentiation relationship to globalization and states and the opportunities and challenges that the movements face Assessing the extent to which the movements contribute to democracy or conversely endanger it she
