## **Global Trading System At The Crossroads:**

**Global Trading System at the Crossroads** Dilip K. Das, 2001-08-09 Beginning with a detailed discussion of the World Trade Organisation and the Uruguay Round and its achievements this book delves into the causal factors behind the failure to launch the new round of multilateral trade negotiations in Seattle in December 1999 Dilip K Das tries to determine the precise point reached by the global trading system and **Developing Countries and the Global Trading System** John Whalley, 2016-03-07 [China, the European Union and the Restructuring of Global Governance](#) Tanguy De Wilde, Pierre Defraigne, Jean-Christophe Defraigne, 2012-05-01 China the European Union and Global Governance examines the key determinants of European and Chinese approaches to the restructuring of global governance systems Using a multidisciplinary method this collection of chapters analyses four distinct fields that are key for both China and the EU and in the development of their relations and future cooperation the global trading system the international monetary system climate and energy policy and international security In the context of China's growing role in global governance and of EU-China cooperation these contributions emphasize strategies prospects and objectives of both actors They outline possible avenues for an enhanced partnership in light of the changing global order which implies a rethinking of the existing multilateral structures This interdisciplinary study will appeal to researchers and scholars interested in global governance European foreign policy Chinese foreign policy EU-China relations as well as trade the international economy and climate change policies Postgraduate students in international relations international political economy European studies and Chinese studies as well as policymakers in the areas of external relations and EU-China relations will also find much to interest them in this book *Governing Global Trade* Theodore H. Cohn, 2017-05-15 Cohn's topic of global trade is of enormous and proliferating interest He provides a good background from 1945 to the present and on core contemporary themes such as civil society participation and the domesticisation of the trade agenda Whilst there is a wealth of literature on policy oriented aspects such as negotiating rounds there are few that provide the careful comprehensive historical overview that this work offers and none that do so with reference to international institutions such as the G7 Quad OECD and UNCTAD as well as the WTO in global trade governance This seminal work has been awarded the British Columbia Political Science Association Weller Prize for 2003 Cohn's political science background will appeal directly to a university audience and a broader public policy market It is also suitable for those interested in trade in the cognates of economics and law This work's theoretical framework embraces and synthesises the major approaches in the field of international relations and will be appropriate for the dominant schools of realists and liberal institutionalists alike It could therefore be apt for courses on international relations theory or international political economy taught in a theoretical mode This book reinforces and broadens the focus of all previous works in The G8 and Global Governance series **The World Trading System** Norbert Funke, 1994 **The Evolving Global Trade Architecture** Dilip K. Das, 2007 This book is useful for scholars and

practitioners who did not follow the GATT WTO negotiations and who desire to acquire a comprehensive background on the subject Mordechai E Kreinin *Journal of Economic Literature* This comprehensive and accessible book examines the evolution of the multilateral trade regime in the ever changing global economic environment particularly during the WTO era and the ongoing Doha Round Professor Das explores how the creation of the multilateral trade regime or the GATT WTO system has been fraught with difficulties He describes the ways by means of various rounds of negotiations the multilateral trade regime has constantly adjusted itself to the new realities of the global economy One glance at the recent history indicates that the evolution of the multilateral trade regime was far from even handed and steady The GATT WTO system was repeatedly pushed to the brink of utter and ignominious disaster Yet as the author illustrates the participating economies persevered Consequently the fabric of multilateral trade regime is stronger its foundation deeper and its framework wider now than it was a generation ago Unlike the GATT era membership of the present trade regime is close to universal The author concludes that of the two phases the latter has turned out to be the more arduous intricate and complex phase of evolution Students and scholars of economics international trade international political economy and international relations will find this study of great interest The definitions and explanations of terminology and advanced concepts make the book accessible to those without an extensive economic background

Global Constitutionalism and the Path of International Law Surendra R. Bhandari, 2016-04-26 In *Global Constitutionalism and the Path of International Law* Surendra Bhandari succinctly offers an account of the most important growth and features of international law from the perspectives of global constitutionalism The author examines the concept from its constitutive features and the operative standards or *modus operandi* These two aspects offer a new and innovative methodology in explicating the theory of global constitutionalism By examining three cases international trade WTO human rights and the role of Security Council the author demonstrates how the idea of global constitutionalism is shaping and deepening the path of international law in the 21st century and elucidates the development of international law as a body of positive rules
