Michaelson, 2018-10-26 The pricing of goods services intangible property and financial instruments within a multi divisional organization particularly in regard to cross border transactions has emerged as one of the most contentious areas of international tax law This is due in no small measure to the rise of transfer pricing regulations as governments seek to stem the flow of their tax revenue from their jurisdictions This thoroughly practical work provides guidance on an array of critical transfer pricing issues The guide s relevance is further enhanced by the inclusion of country chapters covering domestic transfer pricing issues in a variety of key national jurisdictions

Tax Compliance Costs for Companies in an Enlarged European Community Michael Lang, 2008-01-01 When it comes to taxation administrative costs to the tax authorities and compliance costs to the taxpayers arise A lot of studies have already been conducted in order to shed more light on such hidden costs of taxation Particularly in the field of transfer pricing administrative and compliance costs are assumed to be

quite high due to the obligation of computing and documenting an arm's length price for each intra group transaction. Apparently European policy makers have also become aware of this problem since the European Commission's report released in 2001 'Company Taxation in the Internal Market' recommends targeted measures in the short run and comprehensive ones in the long run crossing the border line of the currently prevailing transfer pricing approach inter alia in order to combat compliance costs in the field of transfer pricing. Eighteen national reports from countries all over the world and a general report deal with the basics of administrative and compliance costs of taxation in general as well as compliance costs in the field of transfer pricing in particular. The book is completed by three special reports on certain issues. The findings of the reports included is greatly influenced by the discussions on the occasion of the Jean Monnet Conference on this topic which was held in spring 2006 in Rust Austria under the academic guidance of the Institute for Austrian and International Tax Law at the Vienna University of Economics and Business Administration.

Back cover Transfer Pricing and Value Creation Raffaele Petruzzi, Romero J.S. Tavares Esq., 2019-09-02 Value Creation and its effects on Transfer Pricing and tax law Emerging from the OECD G20 BEPS Project a new somewhat fuzzy notion of Value Creation came to permeate not only Transfer Pricing language but also wider allocation rules and anti abuse provisions in international tax law. The notion of Value Creation reframes the interpretation and application of the Arm's Length Principle ALP that is embedded in Articles 7 and 9 of the OECD Model Convention. This new Value Creation notion and approach assist in understanding key enterprise functions while different industry sectors manifest these concepts in various ways. Situating such notions and this approach within the law of tax treaties and analyzing terms of the OECD Transfer Pricing Guidelines alongside their factual context is the aim of this book. Here law students address Transfer Pricing and Value Creation in sectors as varied as commodities trade automotive consumer products food and beverages pharmaceutical and life sciences telecommunications and the key topic of value creation in a digitalized economy. Our LL.M students were required to address issues not explored in legal research and to discuss factual topics relevant for Transfer Pricing. All students focused on topics that are new to the international tax debate that keep evolving and on factual matters that often escape legal research.

Just Security in an Undergoverned World William Durch, Joris Larik, Richard Ponzio, 2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity's very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity's future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors It offers just security as a new framework for
