Abstract

Economic globalization means change in actual flows and restrictions imposed by the regulatory institutions in the country. This paper analyses the impact of economic globalization on the unemployment and labor force participation rate at national and global level. The general objectives of the study were first, to analyze the trends in labor force participation rates at global and regional; second, to analyze the trends in unemployment rate at global, regional and national; third, to analyze the economic globalization index trends across the world in which only those countries were selected whose KOF globalization index was either less than thirty or greater than eighty percent since 1971 to 2009. Specific objectives of the study were first, to study and specify impact of globalizations on unemployment and Labor Force Participation Rates (LFPR) in Pakistan and second to find out the impact of world economic globalization on the unemployment and World LFPR. The study is based on secondary data collected various from International Labor Organization and KOF index of Globalization. The study concludes that there is a positive significant impact of economic globalization on the unemployment in Pakistan which is as high as forty five percent. In Pakistan over the last twenty years the LFPR has increasing trend and this paper proves significant rise in LFPR. Cost of living has increased and therefore the increase in LFPR was obvious in Pakistan. However at world level the results suggest that there is no significant impact of the world economic globalization on the world unemployment. World economic globalization contributes almost zero percent in LFPR therefore economic globalization does not significantly affect the World LFPR.

Keywords: economic globalization, unemployment, sectors, KOF Index.
