## **Globalization A Short History:**

**Globalization** Jürgen Osterhammel, Niels P. Petersson, 2005 In this work Jürgen Osterhammel and Niels Petersson make the case that globalization is not so new after all Arguing that the world did not turn global overnight the book traces the emergence of globalization over the past seven or eight centuries In fact the authors write the phenomenon can be traced back to early modern large scale trading for example the silk trade between China and the Mediterranean region the shipping routes between the Arabian Peninsula and India and the more frequently travelled caravan routes of the Near East and North Africa all conduits for people goods coins artwork and ideas Globalization Jürgen Osterhammel, Niels P. Petersson, 2021-07-13 Globalization has become a popular buzzword for explaining today's world The expression achieved terminological stardom in the 1990s and was soon embraced by the general public and integrated into numerous languages But is this much discussed phenomenon really an invention of modern times In this work Jürgen Osterhammel and Niels Petersson make the case that globalization is not so new after all Arguing that the world did not turn global overnight the book traces the emergence of globalization over the past seven or eight centuries In fact the authors write the phenomenon can be traced back to early modern large scale trading for example the silk trade between China and the Mediterranean region the shipping routes between the Arabian Peninsula and India and the more frequently traveled caravan routes of the Near East and North Africa all conduits for people goods coins artwork and ideas Osterhammel and Petersson argue that the period from 1750 to 1880 an era characterized by the development of free trade and the long distance impact of the industrial revolution represented an important phase in the globalization phenomenon Moreover they demonstrate how globalization in the mid twentieth century opened up the prospect of global destruction though nuclear war and ecological catastrophe In the end the authors write today's globalization is part of a long running transformation and has not ushered in a global age radically different from anything that came before This book will appeal to historians economists and anyone in the social sciences who is interested in the historical emergence of globalization Globalization W. Nester, 2010-11-14 How did globalization come to dominate our lives What have been are and most likely will be globalization's potential benefits and costs This book explores the world's most powerful force for good and evil from the Renaissance through today and beyond

*Globalizations and the Ancient World* Justin Jennings, 2010-11-08 In this book Justin Jennings argues that globalization is not just a phenomenon limited to modern times Instead he contends that the globalization of today is just the latest in a series of globalizing movements in human history Using the Uruk Mississippian and Wari civilizations as case studies Jennings examines how the growth of the world's first great cities radically transformed their respective areas The cities required unprecedented exchange networks creating long distance flows of ideas people and goods These flows created cascades of interregional interaction that eroded local behavioral norms and social structures New hybrid cultures emerged within these globalized regions Although these networks did not span the whole globe people in these areas developed

globalized cultures as they interacted with one another Jennings explores how understanding globalization as a recurring event can help in the understanding of both the past and the present      Globalization in World History Peter N.

Stearns,2023-11-03 In this fully revised fourth edition this book treats globalization from several vantage points showing how these help grasp the nature of globalization both in the past and today The revisions include greater attention to the complications of racism after 1500 and nationalism after 1850 further analysis of reactions against globalization after World War I and in the 21st century more discussion of student exchanges and fuller treatment of developments since 2008 including the role of the Covid 19 pandemic in contemporary globalization Four major chronological phases are explored in the centuries after 1000 CE after 1500 after 1850 and since the mid 20th century Discussion of each phase includes relevant debates over the nature and extent of the innovations involved particularly in terms of transportation communications technologies and trade patterns The phase approach also facilitates analysis of the range of interactions enmeshed in globalization beyond trade and migration including disease exchange impacts on culture and consumer tastes and for the modern periods policy coordination and international organizations Finally the book deals with different regional positions and reactions in each of the major phases This includes not only imbalances of power and economic benefit but also regional styles in dealing with the range of global relationships This volume is essential reading for undergraduate and postgraduate students of world history economic history and political economy      The Oxford Handbook of the History of Nationalism

Dennis O. Flynn,Arturo Giráldez,2024-10-28 Including 11 essays published over the last 15 years this volume by Dennis O Flynn and Arturo Gir ldez concerns the origins and early development of globalization It opens with their 1995 Silver Spoon

essay and a theoretical essay published in 2002 Subsequent sections deal with Pacific Ocean exchanges interconnections between the Spanish Ottoman Japanese and Chinese empires and the necessity of multidisciplinary approaches to global history The volume follows the evolution of the authors thinking concerning the central role of China in the global silver trade as well as interrelations among silver and non silver markets Research before 2002 paved the way for development of a coherent Birth of Globalization narrative that portrays economic factors in the context of powerful epidemiological ecological demographic and cultural forces In the final essay Flynn and Gir Idez argue for incorporating the work of all academic disciplines when attempting to understand the history of globalization advocating an inclusive historical data base which recognizes contextual realities and an inductive process of reasoning      **Mission as Globalization** David W.

Scott,2016-07-26 Through an examination of Methodist mission to Southeast Asia at the turn of the twentieth century this broad ranging book unites the history of globalization with the history of Christian mission and the history of Southeast Asia The book explores the international connections forged by the Methodist Episcopal Church s Malaysia Mission between 1885 and 1915 putting them in the context of a wave of globalization that was sweeping the world at that time including significant developments in Southeast Asia To establish intellectual connections between the study of globalization and this historical setting the book suggests six metaphors for understanding the mission Each metaphor is based on some aspect of secular globalization the Methodist connection as a migratory network mission agencies as multinational corporations the Malaysia Mission as a franchise system the Methodist Episcopal Church as a media conglomerate mission institutions as civil society organizations and Methodist mission as a global vision In chapters exploring each metaphor separately the book reviews how each form of secular globalization functions to create transnational connections before examining the details of how the Malaysia Mission functioned in a similar fashion Along the way the book investigates the lives of all involved in the mission missionaries church members of the mission and mission supporters Although Southeast Asia including the Straits Settlements Federated Malay States Sarawak and Netherlands Indies and the United States are important geographic foci for the book India China Britain Sri Lanka Sweden Germany Australia and Canada all have parts to play In exploring these metaphors the book draws on several scholarly fields including migration studies business history media studies political theory and cultural history blending them together into a social history of the mission By so doing it identifies both ways in which the effects of Christian mission paralleled other globalizing forces and unique contributions Christian mission made to turn of the twentieth century globalization      A Global History of Modern Historiography Georg G Iggers,Q. Edward

Wang,Supriya Mukherjee,2013-09-13 So far histories of historiography have concentrated almost exclusively on the West This is the first book to offer a history of modern historiography from a global perspective Tracing the transformation of historical writings over the past two and half centuries the book portrays the transformation of historical writings under the effect of professionalization which served as a model not only for Western but also for much of non Western historical studies

At the same time it critically examines the reactions in post modern and post colonial thought to established conceptions of scientific historiography A main theme of the book is how historians in the non Western world not only adopted or adapted Western ideas but also explored different approaches rooted in their own cultures **Globalization** William R. Nester,2010 International politics began with the emergence of the first organized states thousands of years ago Global politics is more recent it appeared about five centuries ago when the European powers began to mesh the world s far corners together through conquest and trade Today we live on a planet characterized by globalization or the ever more complex economic cultural technological and environmental interdependence among all people everywhere Until recently globalization s development was slow Although countries increasingly traded allied and negotiated with each other the divisions among them far outweighed the ties and nations often settled their conflicts with war or the threat of war However since 1945 despite or more likely because of the Cold War globalization has developed rapidly and profoundly Today all humans are formally tied to all others through their country s membership in the United Nations and numerous other international organizations along with the immediate benefits of global trade telecommunications travel and the internet Yet globalization has a dark side it destroys as well as creates jobs wealth and lives while every human lives under the shadow of potential nuclear and ecological extinction How did humanity reach a stage of history so filled with such an array of prospects and perils Globalization A Short History of the Modern World explores that all powerful force for good and evil from the Renaissance through today and beyond *Doing Global History* Roland Wenzlhuemer,2019-10-31 The field of Global History has experienced an unprecedented boom in the last two decades and carved itself deeply into the practice of historical research Despite this its conceptual foundations have rarely been explored This introduction to what Global History is brings together theory and practice with 6 key concepts delivered through 6 accessible case studies Re evaluating the central concerns and key approaches in the field it offers an up to date discussion of the foundations of Global History its guiding questions and principal methods at work *Doing Global History* offers students valuable insights into the ways general concepts can be used and applied when doing historical research The 6 concepts connections actors structures space time and transit and their accompanying examples will not only help readers to get a solid grasp of what global history means but will stimulate further engagement in the field Wenzlhuemer successfully shows that global history is best considered as a perspective not a theory or paradigm and guides the reader through ways it can be used in practice to draw new and exciting conclusions Tailored for classroom and student use this book will be invaluable to advanced undergraduates and postgraduates of Global History **A Short History of Brexit** Kevin O'Rourke,2019-01-31 Crisp clear and quietly devastating Guardian Excellent authoritative highly readable Irish Times A succinct expert guide to how we got to Brexit After all the debates manoeuvrings recriminations and exaltations Brexit is upon us But as Kevin O Rourke writes Brexit did not emerge out of nowhere it is the culmination of events that have been under way for decades and have historical roots

stretching back well beyond that Brexit has a history O'Rourke one of the leading economic historians of his generation explains not only how British attitudes to Europe have evolved but also how the EU's history explains why it operates as it does today and how that history has shaped the ways in which it has responded to Brexit Why are the economics the politics and the history so tightly woven together Crucially he also explains why the question of the Irish border is not just one of customs and trade but for the EU goes to the heart of what it is about The way in which British Irish and European histories continue to interact with each other will shape the future of Brexit and of the continent Calm and lucid *A Short History of Brexit* rises above the usual fray of discussions to provide fresh perspectives and understanding of the most momentous political and economic change in Britain and the EU for decades *A Short History of Western Ideology* Rolf Petri, 2018-02-22 We are arguably living in a postideological era However when we tune into the TV news we can hear political leaders talk about advanced societies geopolitical experts suggest humanitarian interventions and sober events presenters qualify a murder as barbaric What does this mean In this comprehensive book Rolf Petri reveals how our everyday political language is full of ideological representations of the world and places them in an accessible historical narration From the secularization of Europe and the Enlightenment project of civilization to the contemporary preoccupation with ecological catastrophes or the end of history *A Short History of Western Ideology* carves out the central elements of western ideology It focuses on a wide variety of issues including religion colonialism race and gender which are essential for how we conceive of the modern world By creating an awareness of the ideological character of the western worldview its limits and its flaws this book warns us of the dangers that derive from a self-righteous mindset It is stimulating and important reading for history and politics students seeking to understand the ideology of the western world *The New World History* Ross E. Dunn, Laura J. Mitchell, Kerry Ward, 2016-08-23 *The New World History* is a comprehensive volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field The forty-four articles in this book take stock of the history evolving literature and current trajectories of new world history These essays together with the editors' introductions to thematic chapters encourage educators and students to reflect critically on the development of the field and to explore concepts approaches and insights valuable to their own work The selections are organized in ten chapters that survey the history of the movement the seminal ideas of founding thinkers and today's practitioners changing concepts of world historical space and time comparative methods environmental history the big history movement globalization debates over the meaning of Western power and ongoing questions about the intellectual premises and assumptions that have shaped the field *A Brief History of Globalization* Alex MacGillivray, 2006-01-10 Globalization is fast becoming the most overused and least understood word in the world The accelerating political economic cultural and environmental interconnections that it describes are powerful and controversial But what does it really mean Ever since Pythagoras first imagined the world as a sphere revolving around the sun our planet has been shrinking This book covers globalization from all angles from 15th

century explorations to the rise of the multi national corporation from the Great Wall of China to the birth of the football World Cup Opening the lid on the complex economics behind the controversies MacGillivray gives equal play to technology and culture politics and war Alex MacGillivray is an activist inquisitive enough to find out where globalization has come from and a historian rash enough to say where it is going next Rich in detail wide ranging in scope and even handed in its assessment of the benefits and dangers of globalization here is the full story of how a mysterious flat earth became a global village

*Talking Dialogue* Karsten Lehmann, 2021-02-22 Throughout the last two decades the modern dialogue movement has gained worldwide significance The knowledge about its origins is however still very limited This book presents a wide range of insights from eleven case studies into the early history of several important international interreligious interfaith dialogue organizations that have shaped the modern development of interreligious dialogue from the late nineteenth century up to the present Based on new archival research they describe on the one hand how these actors put their ideals into practice and on the other how they faced many challenges as pioneers in the establishment of new interreligious interfaith organizational structures This book concludes with a comparison of those case studies bringing to light new and broader historico sociological understanding of the beginnings of international and multi religious interreligious interfaith dialogue organizations over more than one century The World s Parliament of Religions 1893 The Religi ser Menschheitsbund 1921 The World Congress of Faiths 1933 1950 The Committee on the Church and the Jewish People of the World Council of Churches 1961 The Temple of Understanding 1968 The International Association for Religious Freedom 1969 The World Conference on Religion and Peace 1970 The Council for a Parliament of the World s Religions 1989 1991 The Oxford International Interfaith Centre 1993 The United Religions Initiative 2000 The Universal Peace Federation 2005 Based on these analyses the authors identify three distinct groups with sometimes conflicting interests that are shaping the movement individual religious virtuosi countercultural activists and representatives of religious institutions Published in cooperation with the King Abdullah Bin Abdulaziz International Centre for Interreligious Intercultural Dialogue Vienna
