**and Cases of Globalization : Case Studies** Saji George, Dileep Kumar Mohanachandran, Hadiza Abubakar, 2025-04-16. Times are changing, business formats are changing, trends are changing, people are changing, culture is changing, technology is changing, nations are changing. Change has been in a continuum. Over a period of time, humankind has become more organized, businesses have become more organized, communities have become more organized, nations have become more organized. As we transit to a new era, there has been a paradigm shift towards artificial intelligence, machine learning, even the concept of nationalization has changed to the concept of humanization, or what's better called globalization. Globalization basically deidentifies national borders, cultures, economies, and more so, governance. It removes all barriers for the free movement of man, materials, and money, thus converting planet Earth into a global village. This book concentrates on global business houses which have contributed immensely in making this planet a global village. It looks into understanding how some of the Fortune 500 companies have globalized over a period of time, the impediments they faced in the process of globalization, and how they overcame the obstacles. The case study approach dives deep into the realistic world of businesses and tries to understand how decisions are made in real time, taking the business environment into consideration. The outcomes of these decisions act as guidelines to reinforce the good and phase out the odd. Real life and real time situations differ from an idealistic theoretical perspective. The exposure to these real life and real time cases incorporates analysis of various variables on various parameters, adapting to a dynamic business environment and solving and directing decision making. This leads to better insights into how theory and practice interact in different contexts and how stakeholders respond to these situations, leading to optimum outcomes. The case studies have been carefully selected as these relate to global companies from diverse fields listed in Fortune 500 companies, and the people involved are the best of business professionals who have identified the

respective challenges when going global and constructed ways to deal with these challenges effectively and efficiently and took their respective companies become the top globalized companies of the globe The book would be useful to postgraduate students who are studying courses of international business or globalization
