No insurance resource would be complete without a comprehensive glossary of terms. We've compiled a list of terms and their definitions to better help you navigate the sometimes confusing world of insurance.

**Acceleration Clause** - The part of a contract that says when a loan may be declared due and payable.

**Accidental Death Benefit** - In a life insurance policy, benefit in addition to the death benefit paid to the beneficiary, should death occur due to an accident. There can be certain exclusions as well as time and age limits.

**Active Participant** - Person whose absence from a planned event would trigger a benefit if the event needs to be canceled or postponed.

**Activities of Daily Living** - Bathing, preparing and eating meals, moving from room to room, getting into and out of beds or chairs, dressing, using a toilet.

**Actual Cash Value** - Cost of replacing damaged or destroyed property with comparable new property, minus depreciation and obsolescence. For example, a 10-year-old sofa will not be replaced at current full value because of a decade of depreciation.

**Actuary** - A specialist in the mathematics of insurance who calculates rates, reserves, dividends and other statistics. (Americanism: In most other countries the individual is known as "mathematician.")

**Adjustable Rate** - An interest rate that changes, based on changes in a published market-rate index.

**Adjuster** - A representative of the insurer who seeks to determine the extent of the insurer's liability for loss when a claim is submitted.

**Admitted Assets** - Assets permitted by state law to be included in an insurance company's annual statement. These assets are an important factor when regulators measure insurance company solvency. They include mortgages, stocks, bonds and real estate.

**Agent - individual** who sells and services insurance policies in either of two classifications:

*Independent agent* represents at least two insurance companies and (at least in theory) services clients by searching the market for the most advantageous price for the most coverage. The agent's commission is a percentage of each premium paid and includes a fee for servicing the insured's policy.

*Direct or career agent* represents only one company and sells only its policies. This agent is paid on a commission basis in much the same manner as the independent agent.

**Aggregate Limit** - Usually refers to liability insurance and indicates the amount of coverage that the insured has under the contract for a specific period of time, usually the contract period, no matter how many separate accidents might occur.

**Annual Administrative Fee** - Charge for expenses associated with administering a group employee benefit plan.

**Annual Crediting Cap** - The maximum rate that the equity-indexed annuity can be credited in a year. If a contract has an upper limit, or cap, of 7 percent and the index linked to the annuity gained 7.2 percent, only 7 percent would be credited to the annuity.

**Annuitization** - Process by which you convert part or all of the money in a qualified retirement plan or nonqualified annuity contract into a stream of regular income payments, either for your lifetime or the lifetimes of you and your joint annuitant. Once you choose to annuitize, the payment schedule and the amount is generally fixed and can't be altered.
