Go Skywatching:

Grab 'n' Go Astronomy Neil English, 2014-05-14 Like everyone else most amateur astronomers live busy lives After a long day or work or looking after young children the last thing you want as an observer is to have to lug out a large telescope and spend an hour getting it ready before it can be used Maybe you are going on vacation somewhere in the countryside where there are sure to be dark skies but you don't necessarily want astronomy to dominate the trip Or suppose you are not quite committed to owning a large telescope but curious enough to see what a smaller portable setup can accomplish These are times when a small grab n go telescope or even a pair of binoculars is the ideal instrument And this book can guide you in choosing and best utilizing that equipment What makes a telescope fall into the grab n go category That's easy speed of setting up ease of use and above all portability In Part I of this book we survey the various types of equipment including accessories and mounts that are available and what it is best for what kind of viewing Part II is about using your grab n go telescope to visit a wealth and wide variety of objects There are chapters on solar lunar and planetary observing as well as descriptions of many deep sky objects including double and variable stars planetary emission and reflection nebulae open and globular clusters and distant galaxies This ambitious text is dedicated to those who love to or because of their limited time must observe the sky at a moment's notice whether from the comfort of a backyard or while on business or vacation far from home Everything you need to know is here So get started

Astronomy Alexander Bain,1848 *Navigating the Night Sky* Guilherme de Almeida,2012-11-03 This book will interest anyone who marvels at the night sky and would like to learn to recognise constellations and identify the brightest stars by name Step by step the reader is guided through the knowledge needed to recognise key constellations identify stars and planets and interpret changes in the overall appearance of the sky throughout the year **The Starry Sky Within** Anna Henchman,2014-01-16 Tracing unexplored connections between nineteenth century astronomy and literature The Starry Sky Within offers a new understanding of literary point of view as essentially multiple mobile and comparative Nineteenth century astronomy revealed a cosmos of celestial systems in constant motion Stars comets planets and moons coursed through space in complex and changing relation As the skies were in motion so too was the human subject Astronomers showed that human beings never perceive the world from a stable position The mobility of our bodies in space and the very structure of stereoscopic vision mean that point of view is neither singular nor stable We always see the world as an amalgam of fractured perspectives In this innovative study Henchman shows that the reconceptualization of the skies gave poets and novelists new spaces in which to indulge their longing to escape the limitations of individual perspective She links astronomy and optics to the form of the multiplot novel with its many centers of consciousness complex systems of relation and criss crossing points of view Accounts of a world and a subject both in relative motion shaped the form of grand scale narratives such as Tess of the D Urbervilles Bleak House and Daniel Deronda De Quincey Tennyson and Eliot befriended leading astronomers and visited observatories while Hardy learned about astronomy from the vast popular literature of the day These writers use cosmic distances to dislodge their readers from the earth setting human perception against views from

high above and then telescoping back to earth again What results is a new perception of the mobility of point of view in both literature and science

The Sky Is for Everyone Virginia Trimble, David A. Weintraub, 2023-10-31 An inspiring anthology of writings by trailblazing women astronomers from around the globe The Sky Is for Everyone is an internationally diverse collection of autobiographical essays by women who broke down barriers and changed the face of modern astronomy Virginia Trimble and David Weintraub vividly describe how before 1900 a woman who wanted to study the stars had to have a father brother or husband to provide entry and how the considerable intellectual skills of women astronomers were still not enough to enable them to pry open doors of opportunity for much of the twentieth century After decades of difficult struggles women are closer to equality in astronomy than ever before Trimble and Weintraub bring together the stories of the tough and determined women who flung the doors wide open Taking readers from 1960 to today this triumphant anthology serves as an inspiration to current and future generations of women scientists while giving voice to the history of a transformative era in astronomy With contributions by Neta A Bahcall Beatriz Barbuy Ann Merchant Boesgaard Jocelyn Bell Burnell Catherine Cesarsky Poonam Chandra Xuefei Chen Cathie Clarke Judith Gamora Cohen France Anne C rdova Anne Pyne Cowley Bo ena Czerny Wendy L Freedman Yilen G mez Maqueo Chew Gabriela Gonz lez Saeko S Hayashi Martha P Haynes Roberta M Humphreys Vicky Kalogera Gillian Knapp Shazrene S Mohamed Carole Mundell Priyamvada Natarajan Dara J Norman Hiranya Peiris Judith Lynn Pipher Dina Prialnik Anneila I Sargent Sara Seager Gra ina Tautvai ien Silvia Torres Peimbert Virginia Trimble Meg Urry Ewine F van Dishoeck Patricia Ann Whitelock Sidney Wolff and Rosemary F G Wyse

Human Vision and The Night Sky Michael Borgia, 2006-12-11 For years the images have blazed through your imagination They are the magni cent full color photographs returned by the Hubble Space Telescope and 1 its sister Great Observatories of the grand depths of the cosmos From the pillars of creation considered to be Hubble s signature image to the incomprehensible depths of the Hubble Deep Fields to the intricate details imaged in the surface and cloud tops of Mars or Jupiter the power of the Hubble Telescope to turn on the public to science is unparalleled in the history of modern culture They also have spurred new telescope sales to unimagined highs And after years of watching the heavens through the eyes of NASA you ve decided it s time to see it for yourself You make the trip to the department store and pick up that shiny new 500 te scope set it up and soon you re in business Unfortunately the high initial expectations usually give way to disappointment Instead of seeing the magni cent swirling clouds of gas in the Orion Nebula you see a pale green gray cloud with a couple of nondescript stars lurking nearby The swirling red yellow and brown storms of Jupiter are nowhere to be seen only varying shades of gray in the planet s cloud bands assuming you can see bands at all And Mars After waiting all night for the red planet to rise up over the morning horizon you are greeted by nothing more than a featureless reddish orange dot
