God And Time Essays On The Divine Nature:

God and Time Gregory E. Ganssle, David M. Woodruff, 2002 This is a collection of previously unpublished essays written by leading philosophers about God's relation to time. The essays have been selected to represent current debates between those who believe God to be atemporal and those who do not.

God and Time Gregory E. Ganssle, 2025-10-16 The eternal God has created the universe. And that universe is time bound. How can we best understand God's relationship with our time bound universe? For example, does God experience each moment of time in succession or are all times present to God? How we think of God and time has implications for our understanding of the nature of time, the creation of the universe, God's knowledge of the future, God's interaction with his creation, and the fullness of God's life. In this Spectrum Multiview volume four notable philosophers skillfully take on this difficult topic, all writing from within a Christian framework yet contending for different views. Paul Helm argues that divine eternity should be construed as a state of absolute timelessness. Alan G. Padgett maintains that God's eternity is more plausibly to be understood as relative timelessness. William Lane Craig presents a hybrid view that combines timelessness with omnitemporality. And Nicholas Wolterstorff advocates a doctrine of unqualified divine temporality. Each essay is followed by responses from the other three contributors and a final counter response from the original essayist, making for a lively exchange of ideas. Editor Gregory E. Ganssle provides a helpful introduction to the debate and its significance. Together these five scholars conduct readers on a stimulating and mind stretching journey into one of the most controversial and challenging areas of theology today. Spectrum Multiview Books offer a range of viewpoints on contested topics within Christianity, giving contributors the opportunity to present their position and also respond to others in this dynamic publishing format.

God and the Nature of Time Garrett J. DeWeese, 2017-03-02 Is God temporal in time or atemporal outside of time? Garrett DeWeese begins with contemporary metaphysics and physics, developing a causal account of dynamic time. Drawing on biblical material as well as discussions of divine temporality in medieval and contemporary philosophical theology, DeWeese concludes that God is temporal but not in physical time as we measure it. Interacting with issues in the history of philosophy, contemporary philosophy of science, and philosophy of religion, this book offers students a thorough introduction to the key issues and key figures in historical and contemporary work on the philosophy of time and time in theology.

God, Time, and the Incarnation Richard A. Holland Jr., 2012-02-20 The dominant view among Christian theologians and philosophers is that God is timeless, that he exists outside of time in an atemporal eternity. In *God, Time, and the Incarnation*, Richard Holland offers a critical evaluation of this traditional view in light of the most central doctrine of Christianity, the Incarnation of Christ. Holland reviews the history of this controversy, highlighting the various theological problems for which atemporal models have been offered as a solution. He asserts the central importance of the Incarnation for Christian theology and evaluates several atemporal models in light of this doctrine. Finally, he suggests that the traditional atemporal view is not compatible with a robust and orthodox view of the

Incarnation This book rejects the traditional atemporal view of God's relationship to time and argues based on the Incarnation that God experiences temporal sequence in his existence **God, Eternity, and Time** Edmund Runggaldier, 2016-12-05 God is eternal is a standard belief of all theistic religions But what does it mean If on the one hand eternal means timeless how can God hear the prayers of the faithful at some point of time And how can a timeless God act in order to answer the prayers If God knows what I will do tomorrow from all eternity how can I be free to choose what to do If on the other hand eternal means everlasting does that not jeopardize divine majesty How can everlastingness be reconciled with the traditional doctrines of divine simplicity and perfection An outstanding group of American UK German Austrian and Swiss philosophers and theologians discuss the problem of God's relation to time Their contributions range from analyzing and defending classical conceptions of eternity Boethius's and Aquinas's to vindicating everlastingness accounts and from the foreknowledge problem to Einstein's Special Theory of Relativity This book tackles philosophical questions that are of utmost importance for Systematic Theology Its highest aim is to deepen our understanding of religious faith by surveying its relations to one of the most fundamental aspects of reality time *Fifty Years of Philosophy of Religion: A Select Bibliography (1955-2005)* Andy Sanders, Kristof de Ridder, 2007-06-28 The bibliography lists about 10 000 titles of monographs collections and articles in the field of the philosophy of religion and philosophical theology that appeared between 1955 and 2005 The majority of them are in the English language but publications in German Dutch and French are listed as well Though it is not claimed to be exhaustive the bibliography offers a fairly representative survey of scholarly work on the main topics of interest Publications have been systematically classified according to eleven main categories Introductions Surveys and Historical Issues Part I Religious Language Part II Religious Experience Part III Religious Epistemology Part IV Theism Part V Hermeneutics Part VI Religion and Science Part VII Religion and Aesthetics Part VIII Religion and Morality Part IX Religious Pluralism Part X and Feminist Philosophy of Religion Part XI Part III has been subdivided into Religious Experience and Mystical Experience Part VII into The Concept of God arguments for The Existence of God The Problem of Evil and Atheism and Part VII into General and Historical Issues Theological Issues and implications of Modern Physics Cosmology and Biology The bibliography will particularly be useful to scholars teachers and students in the philosophy of religion philosophical theology and systematic theology as well as to those who are interested professionally or otherwise in the results of academic scholarship in those fields Ontology of Divinity Mirosław Szatkowski, 2024-04-22 This volume announces a new era in the philosophy of God Many of its contributions work to create stronger links between the philosophy of God on the one hand and mathematics or metamathematics on the other hand It is about not only the possibilities of applying mathematics or metamathematics to questions about God but also the reverse question Does the philosophy of God have anything to offer mathematics or metamathematics The remaining contributions tackle stereotypes in the philosophy of religion The volume includes 35 contributions It is divided into nine parts 1 Who Created the Concept of

Scott, 2023-09-29 This book explores a number of closely related logical and metaphysical questions relating to the identity of Jesus Christ In particular it considers What does Jesus Christ name and How may Jesus Christ be the subject of both divine and human attributes given their apparent incompatibility The author draws on analytic and scholastic influences and integrates them into a rehabilitation of the neglected habitus theory of the hypostatic union The theory maintains a real identity between Christ and the Word and emphasises the instrumental or possessory dimension of Christ's relationship to his human nature This approach allows for an account of the hypostatic union that is true to the indispensable articles of classical Christology and which satisfies the demands of logical coherence Yet at no point is the mystery of the Incarnational event reduced to the strictures of creaturely comprehension The book will be of particular interest to scholars of Christology analytic theology and the philosophy of religion The Doctrine of God John C. Kim,2010-03-01 One of the vital issues in contemporary Christian theology is the problem of a renewed understanding of God's eternity and its relation to time. This is not merely a peripheral doctrinal issue but lies at the heart of our understanding of God and humanity and contributes to our entire worldview. This study focuses on a long standing debate between two competing views on God's eternity: one focused on God's absolute timelessness in classical theism and the other on God's temporal everlastingness in contemporary panentheism. In contrast to both of these well worn options this book presents an alternative Trinitarian analogical understanding of God's eternity and its relation to time especially through a critical reflection on Karl Barth's and Hans Urs von Balthasar's engagement of the issue. This analogical approach based on the dynamic and dramatic concepts of God's being in relation and of the Triune God's communicative action in eternity and time has the potential to resolve the debate between absolute timeless eternity and temporal everlasting duration. **In Defense**

of Conciliar Christology Timothy Pawl,2016-03-10 This work presents a historically informed systematic exposition of the Christology of the first seven Ecumenical Councils of undivided Christendom from the First Council of Nicaea in 325 AD to the Second Council of Nicaea in 787 AD. Assuming the truth of Conciliar Christology for the sake of argument Timothy Pawl considers whether there are good philosophical arguments that show a contradiction or incoherence in that doctrine. He presents the definitions of important terms in the debate and a helpful metaphysics for understanding the incarnation. In **In Defense of Conciliar Christology** discusses three types of philosophical objections to Conciliar Christology. Firstly it highlights the fundamental philosophical problem facing Christology: how can one thing be both God and man when anything deserving to be called God must have certain attributes and yet it seems that nothing that can aptly be called man can have those same attributes. It then considers the argument that if the Second Person of the Holy Trinity were immutable or atemporal as Conciliar Christology requires then that Person could not become anything and thus could not become man. Finally Pawl addresses the objection that if there is a single Christ then there is a single nature or will in Christ. However if that conditional is true then Conciliar Christology is false since it affirms the antecedent of the conditional to be true but denies the truth of the consequent. Pawl defends Conciliar Christology against these charges arguing that all three philosophical objections fail to show Conciliar Christology inconsistent or incoherent. **The End of the Timeless God** R. T.

Mullins,2016-01-07 The claim that God is timeless has been the majority view throughout church history. However it is not obvious that divine timelessness is compatible with fundamental Christian doctrines such as creation and incarnation. Theologians have long been aware of the conflict between divine timelessness and Christian doctrine and various solutions to these conflicts have been developed. In contemporary thought it is widely agreed that new theories on the nature of time can further help solve these conflicts. Do these solutions actually solve the conflict? Can the Christian God be timeless? **The End of the Timeless God** sets forth a thorough investigation into the Christian understanding of God and the God-world relationship. It argues that the Christian God cannot be timeless. Providence, Evil and the Openness of God William Hasker,2021-07-16

Providence Evil and the Openness of God is a timely exploration of the philosophical implications of the rapidly growing theological movement known as open theism or the openness of God William Hasker one of the philosophers prominently associated with this movement presents the strengths of this position in comparison with its main competitors Calvinism process theism and the theory of divine middle knowledge or Molinism The author develops alternative approaches to the problem of evil and to the problem of divine action in the world In particular he argues that believers should not maintain the view that each and every evil that occurs is permitted by God as a means to a greater good He contends that open theism makes possible an emphasis on the personalism of divine human interaction in a way that traditional views with their heavy emphasis on divine control cannot easily match The book concludes with a section of replies to critics in which many of the objections levelled against open theism are addressed

Worldviews and the Problem of Evil Ronnie P. Campbell, Jr., 2019-08-14 How does the Christian response to the problem of evil contrast with that of other worldviews Most attempts at answering the problem of evil either present a straightforward account of the truth claims of Christianity or defend a minimalist concept of God This book is different Inside you ll examine four worldviews responses to the problem of evil Then you ll hear the author s argument that Christian theism makes better sense of the phenomenon of evil in the world equipping you to reach an informed conclusion This book s unique approach integrating worldviews with apologetics with theology will give you a better understanding of the debate surrounding the problem of evil in both philosophy and theology Learn to think cogently and theologically about the problem of evil and Christianity s ability to answer its challenges with Worldviews and the Problem of Evil as your guide
