**Conventions, Treaties And Other Responses To Global Issues - Volume I** Gabriela Maria Kutting, 2009-08-25 *Conventions Treaties and other Responses to Global Issues* is a component of *Encyclopedia of Institutional and Infrastructural Resources* in the global *Encyclopedia of Life Support Systems EOLSS* which is an integrated compendium of twenty one Encyclopedias This theme *Conventions Treaties and other Responses to Global Issues* deals with the issue of international resource regimes These are formal responses by states to the threats posed by trans boundary pollution or the distribution of resources In the past thirty years the number of international environmental agreements has steadily risen to reach record numbers and these agreements have secured a firm place in the hierarchy of international affairs There is a

loose assumption that this is a good thing and that this rise has resulted in a commensurable improvement in environmental protection and resource allocation But is this actually the case In fact is there a positive correlation at all Or are there negative correlations What are the connections between environmental diplomacy and environmental protection and how can environmental protection be achieved These are just a few of the questions that will be addressed in this theme whilst at the same time giving an overview of the most important international resource regimes and the most influential international organizations having an environmental impact The theme takes the following shape the first section introduces issues of international environmental law and its history showing that international law can take many different forms Here we explain what policy tools states have in drafting responses to global environmental issues The second section deals with the most prominent international environmental agreements and gives a state of the art overview of existing regimes The third and last section of this theme introduces the key actors in the international arena besides states such as international organizations and civil society actors such as pressure groups These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs
