D'Agostino, Marilyn Marks Rubin, 2017-11-28 *Governing in a Global World* captures the panorama of women governing around the world Even though the modern era marks history's greatest advancements for women worldwide they hold fewer than 30 percent of decision making positions and are often missing from negotiating tables where policies are made and conflicts resolved The opening chapters present trends and context for studying women in public service by focusing on path setters across the globe the status of women in the world's executive and legislative bodies and their participation in public service across several nations Later chapters examine power leadership and representation of women in public service with several chapters looking at women governing from a regional perspective in the Middle East Sub Sahara Africa Latin America and China The final chapter presents empirical evidence that shows how policies to increase women's representation in the public arena reduce gender inequality more than any other policy intervention Taken together the chapters illustrate the worldwide importance of and challenges to promoting gender equality and women governing **Democracy in a Global World** Deen K. **Britain in a Global World** Mark Baimbridge, Philip B. Whyman, Brian Burkitt, Ruth Lea, Ian Milne, John Mills, Philip Davies, Patrick Minford, Eric Nowell, Matthew Elliott, Brian Hindley, Brent Cameron, David Lascelles, Philip Booth, Marc Glendening, John Redwood, Roger Helmer, Andrew Mullen, David Howell, Vo Phuong Mai Le, 2011-10-20 This edited collection explores the future options for the UK regarding its relationship with the European Union EU Since Britain applied for membership in 1961 the nature of the relationship between the UK and the EU has been central to economic and political debate being widely perceived as inevitable because withdrawal from the process would leave Britain isolated and largely powerless However this book challenges this presumption by illustrating that it could be in Britain's long term interest to seek positive and plausible global policy options if it were to be released from the rigidities and constraints imposed by aspects of EU membership e.g. economic policy agriculture and fisheries trade relations taxation policy labour relations social policy human rights and civil liberties foreign policy sovereignty and national identity Britain might benefit from a looser relationship Hence the effective choice Britain possesses is between an essentially European future or a comprehensive global strategy

Kamola,2019-06-07 Following World War II the American government and philanthropic foundations fundamentally remade American universities into sites for producing knowledge about the world as a collection of distinct nation states As neoliberal reforms took hold in the 1980s visions of the world made popular within area studies and international studies found themselves challenged by ideas and educational policies that originated in business schools and international financial institutions Academics within these institutions reimagined the world instead as a single global market and higher education as a commodity to be bought and sold By the 1990s American universities embraced this language of globalization and globalization eventually became the organizing logic of higher education In *Making the World Global* Isaac A Kamola examines how the relationships among universities the American state philanthropic organizations and international financial institutions created the conditions that made it possible to imagine the world as global Examining the Center for International Studies Harvard Business School the World Bank the Social Science Research Council and NYU Kamola demonstrates that how we imagine the world is always symptomatic of the material relations within which knowledge is produced      *The Global Contemporary Art World* Jonathan Harris,2017-07-27 The final installment in the critically acclaimed trilogy on globalization and art explores the growing dominance of Asian centers of art This book takes readers on a fascinating journey around five Asian centers of contemporary art and its myriad institutions agents forms materials and languages while posing vital questions about the political economy of culture and the power of visual art in a multi polar world He analyzes the financial powerhouse of Art Basel Hong Kong new media art in South Korea the place of the Kochi Biennale within contemporary art in India transnational art and art education in China and the geo politics of art patronage in Palestine and he develops a highly original synthesis of theoretical perspectives and empirical research Drawing on detailed case studies and personal insights gained from his extensive experience of the contemporary art scene in Asia Professor Harris examines the evolving relationship between the western centers of art practice collection and validation and the emerging peripheries of Asian Tiger societies with burgeoning art centers And he arrives at the somewhat controversial

conclusion that dominance of the art world is rapidly slipping away from Europe and North America The Global Contemporary Art World is essential reading for undergraduates and postgraduate students in modern and contemporary art art history art theory and criticism cultural studies the sociology of culture and globalization studies It is also a vital resource for research students academics and professionals in the art world

**The African Transformation of Western Medicine and the Dynamics of Global Cultural Exchange** David Baronov,2010-05-14 Beginning with the colonial era Western biomedicine has radically transformed African medical beliefs and practices Conversely in using Western biomedicine Africans have also transformed it The African Transformation of Western Medicine and the Dynamics of Global Cultural Exchange contends that contemporary African medical systems no less biomedical than Western medicine in fact greatly enrich and expand the notion of biomedicine reframing it as a global cultural form deployed across global networks of cultural exchange The book analyzes biomedicine as a complex and dynamic sociocultural form the conceptual premises of which make it necessarily subject to ongoing change and development as it travels the globe David Baronov captures the complexities of this cultural exchange by using world systems analysis in a way that places global cultural processes on equal footing with political and economic processes In doing so he both allows the story of Africa s transformation of Western biomedicine to be told and offers new insights into the capitalist world system

**Off-Grid Solar Electrification in Africa** Nathanael Ojong,2022-11-15 This book evaluates off grid solar electrification in Africa by examining how political economic institutional and social forces shape the adoption of off grid solar technologies including how issues of energy injustice are manifested at different levels and spaces The book takes a historical contemporary and projective outlook using case studies from pre and ongoing electrification communities in non Western countries such as Ghana Kenya Rwanda Senegal Malawi Tanzania and Nigeria Beyond the diverse nature of these countries in terms of their geographical location in West East and Southern Africa each offers a different experience in terms of colonial history economic and institutional infrastructure social and cultural context and level of adoption of off grid solar technologies Notably the book contributes to the off grid solar and energy justice scholarship in low income non Western

contexts It examines various approaches to energy justice and does so by engaging with Western and non Western philosophical notions of the concept It takes into consideration the major principles of Ubuntu philosophy with the adoption of off grid solar technologies hence enriching the energy justice framework Finally the book interrogates the degree to which the social mission that catalysed the expansion of the off grid solar sector is being undermined by broader structural dynamics of the capital investment upon which it is reliant It also argues that the ascendance of off grid solar electrification in Africa is transformative in that it enables millions of people without access to or facing uncertainties linked to centralised grid energy to have access to basic energy services
