Global Environmental Crises An Australian Perspective:

Global Environmental Crises Graeme Aplin, 1995 This book explores the diverse environmental problems we currently face Emphasizing problems in Australia this book is built around case studies focusing on health population land water forests the atmosphere and urbanization This new edition includes substantial new data extensive coverage of global environmental problems and new material on population water and international cooperation *The Green City* Nicholas Low, Brendon Gleeson, Ray Green, Darko Radovic, 2016-05-09 A team of city building professionals explain in straightforward terms how the idea of ecological sustainability can be embodied in the everyday life of homes communities and cities to make a better future The book considers and answers three questions What does the global agenda of sustainable development mean for the urban spaces where most Environmental Crises Tatvana Saillko, 2014-09-19 Provides students with an in depth historic and contemporary understanding of the causes magnitude and implications of the different types of environmental crises in the countries of the former Soviet Union and Eastern Europe **Geographies of Australian Heritages** Roy Jones, Brian J. Shaw, 2017-11-30 In any settler and or postcolonial society heritage is a complex and contested topic that involves indigenous imperial and other migrant components In Australia this situation is compounded by the unique characteristics of the country s natural environment the considerable diversity of its migrant intake and the demographic and technological imbalances between its indigenous and settler populations This volume brings together internationally recognized academics and emerging scholars whose expertise extends through the areas of tourism planning heritage management environmental studies and state and local government Through a representative set of case studies from across the country s states and capital cities the contributors demonstrate the range and diversity of heritage issues currently confronting Australia and consider possible ways of resolving these *The Making of International Environmental Treaties* Gerry Nagtzaam, 2009 Gerry Nagtzaam contends that in recent decades neoliberal institutionalist scholarship on global environmental regimes has burgeoned as has constructivist scholarship on the key role played by norms in international politics In this innovative volume the author sets these interest and norm based approaches against each other in order to test their ability to illustrate why and how different environmental norms take hold in some regimes and not others The book explores why some global environmental treaties seek to preserve and protect some parts of nature from human utilization some seek to conserve certain parts of nature for human development whilst others allow the reckless exploitation of nature without accounting for the consequences It tracks the fate of these three underlying environmental norms preservation conservation and exploitation using case studies on whaling mining in Antarctica and tropical timber The book illustrates how international political battles to shape environmental regimes inevitably result in clashes between these competing environmental norms This unique study will prove a fascinating read for both academics and practitioners in the fields of international environmental politics and international environmental law **Encyclopedia of Environmental**

Change John A Matthews, 2013-12-13 Accessibly written by a team of international authors the Encyclopedia of Environmental Change provides a gateway to the complex facts concepts techniques methodology and philosophy of environmental change This three volume set illustrates and examines topics within this dynamic and rapidly changing interdisciplinary field The encyclopedia includes all of the following aspects of environmental change Diverse evidence of environmental change including climate change and changes on land and in the oceans Underlying natural and anthropogenic causes and mechanisms Wide ranging local regional and global impacts from the polar regions to the tropics Responses of geo ecosystems and human environmental systems in the face of past present and future environmental change Approaches methodologies and techniques used for reconstructing dating monitoring modelling projecting and predicting change Social economic and political dimensions of environmental issues environmental conservation and management and environmental policy Over 4 000 entries explore the following key themes and more Conservation Demographic change Environmental management Environmental policy Environmental security Food security Glaciation Green Revolution Human impact on environment Industrialization Landuse change Military impacts on environment Mining and mining impacts Nuclear energy Pollution Renewable resources Solar energy Sustainability Tourism Trade Water resources Water security Wildlife conservation The comprehensive coverage of terminology includes layers of entries ranging from one line definitions to short essays making this an invaluable companion for any student of physical geography environmental geography or environmental sciences **International Environmental Law** Gerry Nagtzaam, Evan van Hook, Douglas

Guilfoyle, 2019-10-23 This book seeks to better understand how International Environmental Law regimes evolve The authors address throughout the major environmental economic and political tensions that have both shaped and constrained the evolution of international environmental policy within regimes and its expression in international legal rule and norm development Readers will gain an increased understanding of the growing role played by non state actors in global environmental governance including environmental non government organisations scientists the United Nations and corporations The authors also look ahead to the future of International Environmental Law evaluating key challenges and decisions that the discipline will face The text is clear concise and accessible It is ideally suited to students and professionals interested in International Environmental Law and individuals who are intrigued by this dynamic area of law The

^AOxford Companion to Global Change Andrew Goudie, David Cuff, 2008-11-21 The Oxford Companion to Global Change is a fresh look at the world and the compelling environmental issues of the early 21st century including global warming and its technical and regional implications as well as the prospects for current energy supplies and the promise of new technologies In one convenient volume it brings together current knowledge about the relations between technological social demographic economic and political factors as well as biological chemical and physical systems It is an essential reference work for law and policy practitioners researchers and other professionals seeking to understand any aspect of global change **Planet**
