Global Environmental Politics Volume 1 No 2:

Global Environmental Politics Jean-Frédéric Morin, Amandine Orsini, Sikina Jinnah, 2020 Global Environmental Politics provides a fully up to date and comprehensive introduction to the most important issues dominating this fast moving field. Going beyond the issue of climate change the textbook also introduces students to the pressing issues of desertification, trade in hazardous waste, biodiversity protection, whaling, acid rain, ozone depletion, water consumption and over fishing. Importantly the authors pay particular attention to the interactions between environmental politics and other governance issues such as gender, trade, development, health, agriculture and security. **Global Environmental Politics** Pamela S. Chasek, 2018-05-04 For more than twenty years Global Environmental Politics has provided an up to date accurate and unbiased introduction to the world's most pressing environmental issues. This new edition continues this tradition while covering critical new developments in the field. Through case studies on key issues such as climate change, toxic chemicals and biodiversity loss the authors detail the development of major environmental regimes. With new material on the adoption of global Sustainable Development Goals and the 2030 Agenda for Sustainable Development, the December 2015 Paris Climate Change conference and recent meetings of major conventions on desertification, biological diversity and more the authors present a comprehensive overview of contemporary international environmental politics. Global Environmental Politics is vital reading for any student wishing to understand the current state of the field and to make informed decisions about which policies might best safeguard our environment for the future. Global Environmental Politics Gabriela Kütting, 2010-09-13 Global Environmental Politics is the perfect introduction to this increasingly significant area. The text combines an accessible introduction to the most important environmental theories and concepts with a series of detailed case studies of the most pressing environmental problems. Features and benefits of the book: Explains the most important concepts and theories in environmental politics; Introduces environmental politics within the context of political science and international relations theories; Demonstrates how the concepts and theories apply in a wide variety of real world contexts; Case studies include the most important environmental issues from climate change and biodiversity to forests and marine pollution. Each chapter is written by an established international authority in the field. This exciting new textbook is essential reading for all students of environmental politics and will be of great interest to students of International Relations and Political Economy. **Global Environmental Politics** Johannes Urpelainen, 2022-07-29 Emerging economies have fundamentally transformed global environmental politics. Led by China and India they increasingly make or break international negotiations which now require agreement among a large number of governments with widely varied preferences. Emerging economies which still suffer from widespread poverty and frequently struggle with policy implementation often feel that Western led initiatives neglect their needs. What does the global environmental policy landscape look like in the age of a rising Global South? This book explains why emerging economies have come to dominate global environmental politics and examines the implications for future

international cooperation Johannes Urpelainen shows that emerging economies continue to prioritize economic growth and often have limited institutional capacity to contain the environmental destruction that it causes However he argues despite barriers to cooperation innovative bargaining and institutional design offer a way forward Bottom up agreements that respect national sovereignty and invest in capacity building hold more promise than traditional top down treaties with binding commitments The book features detailed discussions of attempts to address hazardous chemicals loss of biodiversity and climate change a comparative analysis of China and India and case studies of nine other emerging economies around the world Global Environmental Politics is an essential forward looking overview of today s most pressing international issue

Global Environmental Politics Pamela Chasek, David L. Downie, 2020-12-30 Global Environmental Politics has provided an accurate up to date and unbiased understanding of the world s most pressing environmental issues for thirty years The eighth edition continues this practice by covering critical new developments in global environmental politics and policymaking Updated case studies on key issues such as on climate change endangered species ozone depletion desertification whaling hazardous wastes toxic chemicals and biodiversity detail the ongoing development of major environmental treaty regimes and new case studies on mercury and marine biodiversity showcase the challenges of creating new treaties during a period of significant global change There is also new material on the implementation of the Sustainable Development Goals the 2030 Agenda for Sustainable Development trade and environment and the impact of the COVID 19 pandemic on environmental diplomacy Updated information about global environmental trends paradigms and actors completes this comprehensive introduction to contemporary international environmental politics Global Environmental Politics is vital reading for students of environmental politics and anyone wishing to understand the current state of the field and to make informed decisions about which policies will best safeguard our environment for the future **The Global**

Environment Regina S. Axelrod, Stacy D. VanDeveer, 2014-02-25 The new edition of Regina S Axelrod and Stacy D VanDeveer s award winning volume The Global Environment Institutions Law and Policy reflects the latest events in global environmental politics and sustainable development while providing balanced coverage of the key institutions issues laws and policies The volume has been reorganized to better highlight global environmental institutions major state and non state actors and includes an expanded set of cases such as climate change biodiversity hazardous chemicals ozone layer depletion nuclear energy and resource consumption Based on reviewer feedback the new edition broadens coverage of the growing global environmental agenda and explores the relationships between states NGOs and international organizations *The Making of International Environmental Treaties* Gerry Nagtzaam, 2009 Gerry Nagtzaam contends that in recent decades neoliberal institutionalist scholarship on global environmental regimes has burgeoned as has constructivist scholarship on the key role played by norms in international politics In this innovative volume the author sets these interest and norm based approaches against each other in order to test their ability to illustrate why and how different environmental norms take hold

in some regimes and not others The book explores why some global environmental treaties seek to preserve and protect some parts of nature from human utilization some seek to conserve certain parts of nature for human development whilst others allow the reckless exploitation of nature without accounting for the consequences It tracks the fate of these three underlying environmental norms preservation conservation and exploitation using case studies on whaling mining in Antarctica and tropical timber The book illustrates how international political battles to shape environmental regimes inevitably result in clashes between these competing environmental norms This unique study will prove a fascinating read for both academics and practitioners in the fields of international environmental politics and international environmental law

International Regulatory Co-operation and International Organisations The Cases of the OECD and the IMO

OECD,2014-11-03 This publication presents findings and two case studies from an April 2014 meeting on the roles of the OECD and the IMO in international international regulatory co operation as well as a contribution from K W Abbott on the links between the two

Security Studies Arda Özkan,Göktürk Tüysüzoglu,2023-07-10 As an important aspect of human polity the concept of security has an important place and space in politics Though regularly mentioned or referred the concept is rarely given a proper definition usually left in the shadows of politics and policymaking and usually referred as a cause to an effect Within the framework of this book classic modern and post modern security issues are analyzed while also focusing on the classical and diverse conceptual dimensions of security current problems are also evaluated especially in the axis of post modern security studies In security studies a distinction is usually made between classical and post modern approaches but in this study both are considered together One of the important features of this work is that it offers a perspective from Turkish experts on the concept of security in international relations

Global Environmental Politics

Hayley Stevenson,2018 This introduction to global environmental politics examines why environmental challenges occur and how we can effectively respond to them

Deleuze and Environmental Damage Mark Halsey,2006 Damage to the environment is one of the most serious threats to quality of life In this book the problems associated with modernist accounts of environmental harm are surveyed and offered in their place is an explication of the main insights associated with post structuralist thought

Legitimacy in International Society I. Miyaoka,2003-11-24 Legitimacy in International Society addresses collective legitimization of emergent norms at international meetings and its effect on state behaviour Drawing mainly on constructivist approaches in International Relations and social psychology Isao Miyaoka discusses the international and domestic sources of legitimacy and the basic conditions under which collective legitimization matters for norm adoption Three case studies examine Japan s responses to wildlife preservationist norms against high seas driftnet fishing scientific whaling and international trade in African elephant ivory

Handbook of Global Environmental Politics

Peter Dauvergne,2012-01-01 The second edition of this Handbook contains more than 30 new and original articles as well six essential updates by leading scholars of global environmental politics This landmark book maps the latest theoretical and

empirical research in this energetic and growing field Captured here are the pioneering and lively debates over concerns for the health of the planet and how they might best be addressed The introduction explores the intellectual trends and evolving parameters in the field of global environmental politics It makes a case for an expansive definition of the field one that embraces an interdisciplinary literature on the connections between global politics and environmental change The remaining chapters are divided into four broad themes states and cooperation global governance the political economy of governance and knowledge and ethics with each section covering key emerging issues In depth explorations are given to topics such as climate change multinational corporations international agreements and UN organizations regulations and business standards trade and international finance multilevel and transnational governance and ecological citizenship Handbook of Global Environmental Politics Second Edition is a comprehensive review of the field and offers cutting edge ideas for further research As such scholars students and policymakers will find themselves looking to it for many years to come

Understanding Business Environments Michael Lucas, 2005-07-08 What are the forces shaping today's business world Understanding Business Environments provides key readings which introduce the student to the factors underlying the business environment Including chapters by gurus such as Anthony Giddens Stuart Hall and Will Hutton the book covers social forces including the social structure and long term social change technological factors including Information Technology and new production technologies economic factors including the impact of macroeconomic policy and of the financial system political factors including the legal environment and government business relations *A Research Agenda for Global Environmental Politics* Peter Dauvergne, Justin Alger, 2018-09-28 In a world confronted with escalating environmental crises are academics asking the right questions and advocating the best solutions This Research Agenda paves the way for new and established scholars in the field identifying the significant gaps in research and emerging issues for future generations in global environmental politics **Between Preservation and Exploitation** Kemi

Fuentes-George, 2016-04-01 A study of biodiversity governance analyzes the factors that determine the effectiveness of transnational advocacy networks and the importance of justice claims to conservation In the late 2000s ordinary citizens in Jamaica and Mexico demanded that government put a stop to lucrative but environmentally harmful economic development activities bauxite mining in Jamaica and large scale tourism and overfishing on the eastern coast of the Yucatán Peninsula In each case the catalyst for the campaign was information gathered and disseminated by transnational advocacy networks TANs of researchers academics and activists Both campaigns were successful despite opposition from industry supporters Meanwhile simultaneous campaigns to manage land in another part of the Yucatán and to conserve migratory birds in Egypt had far less success In this book Kemi Fuentes George uses these four cases to analyze factors that determine the success or failure of efforts by TANs to persuade policymakers and private sector actors in developing countries to change environmental behavior Fuentes George argues that in order to influence the design and implementation of policy TANs must

generate a scientific consensus create social relationships with local actors and advocate for biodiversity in a way that promotes local environmental justice Environmentally just policies would allow local populations access to their lands provided they use natural resources sustainably Justice claims are also more likely to generate needed support among local groups for conservation projects In their conservation efforts Jamaica Mexico and Egypt were attempting to meet their obligations under the UN Convention on Biological Diversity and other regional agreements Fuentes George s innovative analysis shows the importance of local environmental justice for the implementation of international environmental treaties

Climate Change Solutions and Environmental Migration Anna Ginty,2021-04-20 This book lifts the taboo on maladaptation a different driver of environmentally induced migration which shines a light on the negative consequences arising from the solutions to climate change adaptation and mitigation policies Through a systematic analysis and critique of existing mitigation and adaptation policies under the United Nations Framework Convention on Climate Change UNFCCC and international development community and supplemented by a small empirical study in Indonesia this book catalogues how maladaptation is manufactured under existing climate change solutions It posits that customary communities in general and women in particular are disproportionately affected by the dominant market driven logics that underscore current climate change solutions adopted by the UNFCCC The injustice of maladaptation is highlighted as multi faceted and explored using political economic social and ecological lenses and the concept of environmental reintegration is also explored as a possible solution to this issue Further possibilities are then presented in the Afterword as a combination of what the new post neoliberalism conjuncture could potentially look like This volume will be of great interest to students scholars and practitioners of climate change environmental policy environmental migration and displacement development studies I NGOs and civil society actors and activists more broadly
