Global Lockdown:

Global Lockdown Julia Sudbury, Julia Chinyere Oparah, 2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company **Impact of COVID-19 Lockdowns on the Regional and Global Oceans and Coasts** D. Swain, Deepak R. Mishra, Stefano Vignudelli, Christine M. Lee, Domenico D'Alelio, 2022-04-19 **Lockdown Cultures** Stella Bruzzi, Maurice Biriotti, 2022-11-10 Lockdown Cultures is both a cultural response to our extraordinary times and a manifesto for the arts and humanities and their role in our post pandemic society This book offers a unique response to the question of how the humanities commented on and were impacted by one of the dominant crises of our times the Covid 19 pandemic While the role of engineers epidemiologists and of course medics is assumed Lockdown Cultures illustrates some of the ways in which the humanities understood and analysed 2020 21 the year of lockdown and plague Though the impulse behind the book was topical underpinning the richly varied and individual essays is a lasting concern with the value of the humanities in the twenty first century Each contributor approaches this differently but there are two dominant strands how art and culture can help us understand the Covid crisis and how the value of the humanities can be demonstrated by engaging with cultural products from the past The result is a book that serves as testament to the humanities reinvigorated and reforged sense of identity from the perspective of UCL and one of the leading arts and humanities faculties in the world It bears witness to a globally impactful event while showcasing interdisciplinary thinking and examining how the pandemic has changed how we read watch write and educate More than thirty individual contributions collectively reassert the importance of the arts and humanities for contemporary society **Lockdown** Daniel Briggs, Luke Telford, Anthony Lloyd, Anthony Ellis, Justin Kotzé, 2021-12-10 This book asks whether the decision to lock down the world was justified in proportion to the potential harms and risks generated by the Covid 19 virus Drawing on global empirical data it explores and exposes the social harms induced by lockdowns many of which are hidden including joblessness mental health problems and an intensification of societal inequalities and divisions It offers data driven case studies on harms such as domestic violence child abuse the distress of being ordered to stay at home and the numerous harms associated with the new wealth industries It explores why some people weren't compliant with lockdown restrictions and examines the already vulnerable social groups who were disproportionately affected by lockdown including those who were locked in care home residents locked up prisoners and locked out migrant workers refugees The book closes with a brief discussion on what the future might look like as we enter a post Covid world drawing on cutting edge social theory Stakeholder Strategies for Reducing the Impact of Global Health Crises Kumar, Vikas, Malhotra, Geetika, 2021-06-11 A global health crisis creates great uncertainty high stress and anxiety within society During such a crisis when information is unavailable or inconsistent and when people feel unsure of what they know or what anyone knows behavioral science indicates an increased human desire for transparency direction and meaning of what has happened At such a time the roles of stakeholders that emerge with their words and actions can help keep people

safe help them cope with emotions and ultimately bring their experience into context leading to meaningful results But as this crisis shifts beyond public health and workplace safety there are implications for business continuity job loss and radically different ways of working While some may already seek meaning from the crisis and move towards the next normal others feel a growing uncertainty and are worried about the future Therefore it is important to analyze the role of stakeholders during these uncertain times Stakeholder Strategies for Reducing the Impact of Global Health Crises provides a comprehensive resource on stakeholder action and strategies to deal with crises by analyzing the needs of society during global health crises how stakeholders should communicate and how resilience and peace can be promoted in times of chaos The chapters cover the roles of stakeholders during a pandemic spanning from the government and international development agencies to industry and non government organizations community based organizations and more This book not only highlights the responsibilities of each of the stakeholders but also showcases the best practices seen during the COVID 19 pandemic through existing theories and case studies This book is intended for researchers in the fields of sociology political science public administration mass media and communication crisis and disaster management and more along with government officials policymakers medical agencies executives managers medical professionals practitioners stakeholders academicians and students interested in the role of stakeholders during global health crises

On Global Learning Jason Ralph, 2023-09-21 Offers a new theory of global learning to assess international society's capacities to deal with security climate and health challenges

Global Value Chain and Inflation Dynamics Vu Chau, Mrs. Marina Conesa Martinez, Mr. Taehoon Kim, John A Spray, 2024-03-22 We study the inflationary impacts of pandemic lockdown shocks and fiscal and monetary stimulus during 2020-2022 using a novel harmonized dataset of sectoral producer price inflation and input output linkages for more than 1000 sectors in 53 countries The inflationary impact of shocks is identified via a Bartik shift share design where shares reflect the heterogeneous sectoral exposure to shocks and are derived from a macroeconomic model of international production network We find that pandemic lockdowns and subsequent reopening policies were the most dominant driver of global inflation in this period especially through their impact on aggregate demand We provide a decomposition of lockdown shock by sources and find that between 20-30 percent of the demand effect of lockdown reopening is due to spillover from abroad Finally while fiscal and monetary policies played an important role in preventing deflation in 2020 their effects diminished in the recovery years

Covid, Biopolitics and the Suspension of the Nomos William Watkin,2025-06-20 This book considers how during the unprecedented global lockdown due to the Covid 19 pandemic the normal order of everyday life of the rule of law of power itself was interrupted and hence the nomos of this earth was suspended Employing the term herd immunity from vaccination science and global lockdown policy as a guiding theme the book considers two central aspects of the pandemic These are the function of herding and collecting as a definition of ontology after Alain Badiou and the concept of immunity as a suspension of oppositional differences in the work of Roberto Esposito It then considers how herd immunity not only disrupts the nomos but also suspends its significance as a guiding principle of state sanctioned legal norms and perhaps permanently Providing critical readings of masking social distancing compliance vulnerability bubbles immunity breathing anti vaxxers nudge theory cocooning lockdown patient zero and the many other terms that became commonplace between 2020 and 2022 the book traces a suspension of legal and social norms a manipulation of our compliance using false science and a reconfiguring of the social nomos in light of the threats of the virus In a highly original mix of contemporary and post war continental philosophy biopolitical theory set theoretical

mathematics extensional logic and the most up to date science in the area it argues that lockdown was not some global biopolitical power grab but actually a weakening of power of nomos This book will appeal to scholars and others in a range of disciplinary areas with interests in the legacy of Covid but especially those working in the areas of continental philosophy contemporary legal theory and biopolitics
