

Global Nation?

Australia and the Politics of Globalisation

Globalisation is one of the most ubiquitous buzzwords of the late twentieth century, yet its meaning is often elusive. Retrenchments, trade alliances, global warming, currency devaluations and so on are often explained as unavoidable consequences of globalisation. Even everyday things – from the food we eat to the television we watch and the clothes we wear – are apparently influenced by globalisation. This book provides an accessible exploration of the meaning and implications of globalisation. The discussion is carefully grounded in the changing social, economic, ecological and political relationships of Australia. *Global Nation?* also looks at a range of existing and potential responses to the globalisation process, arguing that there may be alternatives, even though we are so often told that there are not.

JOHN WISEMAN lectures in social and economic policy at the Royal Melbourne Institute of Technology. He has published widely on themes related to social justice and social policy and is the co-author of *Making Social Policy in Australia: An Introduction* (1995).

Manfred Steger, Paul Battersby, Joseph Siracusa, 2014-05-22 Global studies is a fresh and dynamic discipline area that promises to reinvigorate undergraduate and postgraduate education in the social sciences and humanities In the Australian context the interdisciplinary pedagogy that defines global studies is gaining wider acceptance as a coherent and necessary approach to the study of global change Through the Global Studies Consortium GSC this new discipline is forming around an impressive body of international scholars who define their expertise in global terms The GSC paves the way for the expansion of global studies programs internationally and for the development of teaching and research collaboration on a global scale Mark Juergensmeyer and Helmut Anheier's forthcoming Encyclopaedia of Global Studies with SAGE is evidence of this growing international collaboration while the work of Professor Manfred Steger exemplifies the flourishing academic literature on globalization RMIT University's Global Cities Institute represents a substantial institutional investment in interdisciplinary research into the social and environmental implications of globalization in which it leads the way internationally Given these developments the time is right for a book series that draws together diverse scholarship in global studies This Handbook allows for extended treatment of critical issues that are of major interest to researchers and students in this emerging field The topics covered speak to an interdisciplinary approach to the study of global issues that reaches well beyond the confines of international relations and political science to encompass sociology anthropology history media and cultural studies economics and governance environmental sustainability international law and criminal justice Specially commissioned chapters explore diverse subjects from a global vantage point and all deliberately cohere around core global concerns of narrative praxis space and place This integrated approach sets the Handbook apart from its competitors and distinguishes Global Studies as the most equipped academic discipline with which to address the scope and pace of global change in the 21st century

Governing under Stress Marjorie Griffin Cohen, Stephen Clarkson, 2013-07-04 This volume is the first work to emerge from a major international comparative research project exploring the political economy of globalization This interdisciplinary team of scholars is focusing on the semi periphery of world power Whether defined in

social cultural economic or simply spatial terms semi peripheral countries share two qualities they are conscious of their subordination to the hegemonic powers at the centre of the global system the United States and the European Union they are also strong enough to have some ability to resist their domination The structural position of these middle powers in global capitalism is unlike those countries at the centre that do not experience domination and different from those Third World countries on the periphery that have no means to achieve more cultural and political autonomy more distinctive and diversified development or greater social equity and better income redistribution Four countries in North America Central America Europe and the Antipodes namely Canada Mexico Norway and Australia have been selected in order to explore the complexities of globalization from the perspective of the semi periphery Opening chapters examine the international institutions including the North America Free Trade Agreement the World Trade Organization and the European Union which now amount to a quasi constitutional conditioning framework for middle powers under globalization In the second part contributors detail the pressures with which these countries have to cope and consider their ability to pursue policies appropriate to the needs and democratically defined goals of each And in the concluding part after discussing the new economic political and social issues of governing under stress they appraise the possibilities for middle powers to chart distinctive national courses in the face of globalization s constraining challenge Moored to the Continent Mark

Baimbridge, Philip B. Whyman, Brian Burkitt, 2012-03-07 Is there an alternative to EU membership What if Britain left the EU Would it be a disastrous or liberating experience What trade relationships could the UK forge outside the EU How would economic and social policy be different What are the implications for sovereignty and democracy This text seeks to answer these questions through exploring the future options for Britain regarding its relationship with the European Union EU To the British establishment it seemed obvious that joining the process towards greater European integration would reverse the UK s post war declining political influence and accelerate its rate of economic growth Consequently a recurrent theme is that UK participation in ever closer European integration is widely perceived as inevitable In contrast this book both addresses and challenges this presumption by illustrating that a variety of alternative forms of relationship are feasible together with outlining possible policy options that may compliment and enhance the consequences arising from the fundamental decision of how the UK determines its future **After Brexit** Nazaré da Costa Cabral, José Renato Gonçalves, Nuno Cunha

A Concise History of

Australia Stuart Macintyre, 2004-08-24 Australia is the last continent to be settled by Europeans but it also sustains a people and a culture tens of thousands of years old For much of the past 200 years the newcomers have sought to replace the old with the new This book tells how they imposed themselves on the land and brought technology institutions and ideas to make it their own It relates the advance from penal colony to a prosperous free nation and illustrates how in a nation created by waves of newcomers the search for binding traditions has long been frustrated by the feeling of rootlessness This revised edition incorporates the most recent historical research and contemporary historical debates on frontier violence between European settlers and Aborigines and the Stolen Generations It covers the Sydney Olympics the refugee crisis and the Pacific solution More than ever before Australians draw on the past to understand their future

Complementary Medicine in

Australia and New Zealand Hans Baer, 2015-07-17 In the late nineteenth century on the eve of the formation of Australia as a nation state in 1902 the Australian medical system could be best described as a pluralistic one in the sense that while regular medicine constituted the predominant medical system it was not clearly the dominant one in that regular physicians faced competition from a wide array of alternative practitioners As regular medicine increasingly assumed the guise of being scientific it evolved into biomedicine and developed a link with corporate and state interests in the early twentieth century in Australia as in other capitalist developed societies Relying upon state support Australian biomedicine has achieved dominance over alternative medical system such as homeopathy herbal medicine osteopathy chiropractic and naturopathy Various social forces particularly the development of the holistic health movement have served to challenge biomedical

dominance in Australia like elsewhere What started out as a popular health movement in the early 1970s has evolved into the professionalized entity that is generally referred to as complementary medicine in Australia as opposed to complementary and alternative medicine in the US and UK Complementary medicine in Australia encompasses many medical systems and therapies Since the 1980s certain heterodox medical systems particularly chiropractic osteopathy acupuncture and Chinese medicine naturopathy Western herbalism and homeopathy have achieved considerable recognition from the Australian state either at the federal level or at the state and territorial levels Indeed the Australian state appears to have gone further than any other Anglophone country in terms of providing public funding for complementary medicine education Conversely it has committed a limited amount of funding for complementary medicine research compared to the United States Globalizing Education Michael W. Apple, Jane Kenway, Michael Singh, 2005 Because globalization is expressed in many ways and evokes complex responses it demands various lines of analysis Globalizing Education shows how this phenomenon is mediated and mitigated by a range of educational policies pedagogies and politics It identifies the forms of educational governance associated with neoliberal globalism and their manifold effects on nation state education systems highlighting the colonizing minority world imperatives and retraditionalizing ramifications It also shows how the global cultural economy the disjunctive flows of images people and ideas both challenges and reinforces conventional educational trajectories The global national mesh works created by drugs technology and unions are among the complicated connectivities explored This book exposes the more pernicious effects on education of neo liberal and corporate globalization and explores and identifies innovative and transformative educational policies pedagogies and politics **Globalisation** Great Britain: Parliament: House of Commons: Treasury Committee, 2007-10-16 Globalisation is having an enormous impact on the UK's economy creating significant challenges for policy making with the shift in economic power from West to East particularly the rise of China and India in the global economy The effects will be felt on highly skilled jobs as well as some less skilled employment and public policy needs to respond to the likely implications for the labour market The Committee's report considers domestic policy challenges relating to the promotion of innovation and improving the business environment and the skills base in the economy and issues discussed include the drivers of globalisation trade and protectionism global imbalances as well as the beneficial and adverse effects of globalisation for the UK economy The Committee recommends that in order to promote understanding of the impact of globalisation on jobs and communities the Government should publish an annual review of new developments affecting the impact of and prospects for globalisation Given that protectionist sentiment is increasing posing a threat to the progress of both developed and developing countries the Committee supports the Government's promotion of a successful conclusion to the Doha trade round Globalisation is also threatened by the risk of a disorderly unwinding of global imbalances and the success of a reformed International Monetary Fund will be judged by its performance in ensuring global imbalances are properly addressed Human Resources and Gender Issues in Poverty

Eradication R. N. Ghosh, Rony Gabbay, Abu Siddique, 2001 There Are Complex Linkages Between Human Resources Development And Gender Issues On The One Hand And The Problem Of Poverty Eradication On The Other This Volume Contains 17 Chapters Which Aim At Disentangling These Complex Issues Of Development A Main Theme Underlying The Volume Is That Economic Growth In Itself Is Not To Be Confused With The Broader Question Of Economic Development That Should Lead To Improvement In The Standard Of Living Simultaneously With Empowerment Of Women Inter Generational And Inter Class Equity And Efficient Management Of The Environment Many Of The Papers In The Volume Are Focused On The Countries Of The Indian Ocean Region **On Not Speaking Chinese** Ien Ang, 2005-07-08 In this major new book leading cultural thinker Ien Ang engages with urgent questions of identity in an age of globalisation and diaspora The starting point for Ang's discussion is the experience of visiting Taiwan Ang a person of Chinese descent born in Indonesia and raised in the Netherlands found herself faced with an almost insurmountable difficulty surrounded by people who expected her to speak to them in Chinese She writes It was the beginning of an almost decade long engagement with the predicaments of Chineseness in diaspora In Taiwan I was different because I couldn't speak Chinese in the West I was different because I looked Chinese From this autobiographical beginning Ang goes on to reflect upon tensions between Asia and the West at a national and global level and to consider the disparate meanings of Chineseness in the contemporary world She offers a critique of the increasingly aggressive construction of a global Chineseness and challenges Western tendencies to equate Chinese with Asian identity Ang then turns to the West exploring the paradox of Australia's identity as a Western country in the Asian region and tracing Australia's uneasy relationship with its Asian neighbours from the White Australia policy to contemporary multicultural society Finally Ang draws together her discussion of Asia and the West to consider the social and intellectual space of the in between arguing for a theorising not of difference but of togetherness in contemporary societies

Third Way Economics P. Whyman, 2005-12-16 The apparent success of a new variant of social democracy has created considerable interest in the Third Way This book synthesizes a core economic strategy from the most significant Third Way administrations It explores the theoretical foundations to Third Way Economics before evaluating its economic strategy against conclusions drawn from contemporary economics literature and the relative performance of contemporary left of centre governments It additionally contrasts Third Way Economics with more traditional social democratic economic policy in adapting to the challenges posed by today's economy *Rethinking Australian Citizenship* Wayne Hudson, John Kane, 2000-06 The notion of citizenship is now being taken up internationally as a way to rethink questions of social cohesion and social justice In Europe the concept of national identity is under close scrutiny while the pressures of globalizing markets and the power of transnational corporations everywhere raise questions about the true place and meaning of citizenship in civil society In Australia a traditional view of citizens belonging to a single nation made up of one people with a special relationship to one land has been thrown open to challenge by a range of differing perspectives *Rethinking Australian*

Citizenship considers the major debates Some chapters look at contemporary theoretical debates while others reinvent Australian citizenship from a particular perspective on civil life The result is a rich and coherent volume that shows the diverse ways in which Australian citizenship can be rethought

The Political Economy of Migration and Post-industrialising Australia Patrick Brownlee,2020-08-31 During the 1980s and 1990s Australia s migration intake turned rapidly towards recruiting business professionals managers and entrepreneurs to support the country s entry into an economic system marked by global value chains This book analyses the policy idea termed Productive Diversity introduced by the Australian government as a way of conceptualising the belief that migrants would bring business acumen and a global outlook to help Australia compete as a trading nation The book examines this germinal period of Australia s economic reorientation through a close inspection of policy documents parliamentary hearings economic and migration statistics and interviews with the architects of the policy It provides a comprehensive account of how the policy framework emerged how it was implemented and studies the rationale in recruiting self starters and managers to connect with global trade flows This work will be of interest to students and researchers of migration studies especially Australian migration diversity policies sociology multiculturalism economics development studies and Asia Pacific studies The methods and data will also be of value to political economists and policy makers

Governing Rural Development Lynda Cheshire,2016-04-22 In recent decades the responsibility for initiating regeneration programmes has been placed firmly in the hands of rural communities with the rationale being that local people are best placed to know their own problems and consequently to develop their own solutions Despite the popularity of this approach the self help approach has its own problems and can be seen as an attempt by governments to reduce public spending This book provides a critical account of the discourses and practices of self help in contemporary rural development policies of Australia and other western nations Although it examines the problems of the self help approach it moves beyond a straightforward exposition of the impediments to self help Instead taking a Foucauldian governmentality perspective it puts forward a theoretical analysis of the self help concept assessing it as a means of governing rural development in an advanced liberal manner It argues that self help should not be regarded as either the empowerment or the abandonment of rural citizens by a shrinking state but rather the application of new ways of thinking about and acting upon rural development

Rethinking Welfare Iain Ferguson,Michael Lavalette,Gerry Mooney,2002-04-18 I would encourage undergraduates students to read it for it does summarise well a classical Marxist analysis of social policy and welfare Social Policy The anti capitalist movement is increasingly challenging the global hegemony of neo liberalism The arguments against the neo liberal agenda are clearly articulated in Rethinking Welfare The authors highlight the growing inequalities and decimation of state welfare and use Marxist approaches to contemporary social policy to provide a defence of the welfare state Divided into three main sections the first part of this volume looks at the growth of inequality and social and environmental degradation Part Two centres on the authors argument for the

relevance of core Marxist concepts in aiding our understanding of social policy This section includes Marxist approaches to a range of welfare issues and their implications for studying welfare regimes and practices Issues covered include Class and class struggle Opression Alienation and the family The last part of the book explores the question of globalization and the consequences of international neo liberalism on indebted countries as well as the neo liberal agenda of the Conservative and New Labour governments in Britain The authors conclude with the prospect of an alternative welfare future which may form part of the challenge against global neo liberalism

Rethinking Drug Use in Sport Bob Stewart,Aaron Smith,2014-01-10

Drug free sport is an unattainable aspiration In this critical paradigm shifting reappraisal of contemporary drug policy in sport Bob Stewart and Aaron Smith argue that drug use in sport is an inexorable consequence of the nature structure and culture of sport itself By de mythologising and de moralising the assumptions that prop up current drug management controls and re emphasising the importance of the long term well being and civil rights of the athlete they offer a powerful argument for creating a legitimate space for drug use in sport The book offers a broad ranging overview of the social and commercial pressures impelling drug use and maps the full historical and social extent of the problem With policy analysis at the centre of the discussion the book explores the complete range of social management policy scientific technological and health issues around drugs in sport highlighting the irresolvable tension between the zero tolerance model as advanced by WADA and the harm reduction approach adopted by drug education and treatment agencies While there are no simple solutions as long as drugs use is endemic in wider society the authors argue that a more nuanced and progressive approach is required in order to safeguard and protect the health social liberty and best interests of athletes and sports people as well as the value of sport itself
