Between Security Markets and Protection Rackets Marc von Boemcken,2013-02-20 Security is a social practice which constitutes different formations of political order Developing a political economy of security practice the author distinguishes these formations with a view to the actual exchanges between various providers and receivers of security services He thus departs from a popular perspective in political science which charts ongoing transformations in the global security landscape along a series of categorical divisions between state and non state or between the public and the private A more rewarding analytical perspective conceives the two most dominant security formations in the contemporary world as either based on commercial or on compulsory relations

Private Security Contractors and New Wars Kateri Carmola,2010-02-05 This book addresses the ambiguities of the growing use of private security contractors and provides guidance as to how our expectations about regulating this expanding service industry will have to be adjusted In the warzones of Iraq and Afghanistan many of those who carry weapons are not legally combatants nor are they protected civilians They are contracted by governments businesses and NGOs to provide armed security Often mistaken as members of armed forces they are instead part of a new protean proxy force that works alongside the military in a multitude of shifting roles and overseen by a matrix of contracts and regulations This book analyzes the growing industry of these private military and security companies PMSCs used in warzones and other high risk areas PMSCs are the result of a unique combination of circumstances including a change in the idea of soldiering insurance industry analyses that require security contractors and a need for governments to distance themselves from potentially criminal conduct The book argues that PMSCs are a unique type of organization combining attributes from worlds of the military business and humanitarian organizations This makes them particularly resistant to oversight The legal status of these companies and those they employ is also hard to ascertain which weakens the multiple regulatory tools available PMSCs also fall between the cracks in ethical debates about their use seeming to be both justifiable and objectionable This transformation in military operations is a seemingly irreversible product of more general changes in the relationship between the individual citizen and the state This book will be of much interest to students of private security companies war and conflict studies security studies and IR in general Kateri Carmola is the Christian A Johnson Professor of Political Science at Middlebury College in Vermont She received her Ph D from the University of California Berkeley

The Licit Life of Capitalism Hannah Appel, 2019-12-13 The Licit Life of Capitalism is both an account of a specific capitalist project U S oil companies working off the shores of Equatorial Guinea and a sweeping theorization of more general forms and processes that facilitate diverse capitalist projects around the world Hannah Appel draws on extensive fieldwork with managers and rig workers lawyers and bureaucrats the expat wives of American oil executives and the Equatoguinean women who work in their homes to turn conventional critiques of capitalism on their head arguing that market practices do not merely exacerbate inequality they are made by it People and places differentially valued by gender race and colonial histories are the terrain on which the rules of capitalist economy are built Appel shows how the corporate form and the contract offshore rigs and economic theory are the assemblages of liberalism and race expertise and gender technology and domesticity that enable the licit life of capitalism practices that are legally sanctioned widely replicated and ordinary at the same time as they are messy contested and arguably indefensible
