International Fiscal-financial Spillovers: The Effect of Fiscal Shocks on Cross-border Bank Lending Sangyup Choi, Davide Furceri, Chansik Yoon, 2019-07-12 This paper sheds new light on the degree of international fiscal financial spillovers by investigating the effect of domestic fiscal policies on cross border bank lending By estimating the dynamic response of U S cross border bank lending towards the 45 recipient countries to exogenous domestic fiscal shocks both measured by spending and revenue between 1990Q1 and 2012Q4 we find that expansionary domestic fiscal shocks lead to a statistically significant increase in cross border bank lending The magnitude of the effect is also economically significant the effect of 1 percent of GDP increase decrease in spending revenue is comparable to an exogenous decline in the federal funds rate We also find that fiscal shocks tend to have larger effects during periods of recessions than expansions in the source country and that the adverse effect of a fiscal consolidation is larger than the positive effect of the same size of a fiscal expansion In contrast we do not find systematic and statistically significant differences in the spillover effects across recipient countries depending on their exchange rate regime although capital controls seem to play some moderating role The extension of the analysis to a panel of 16 small open economies confirms the finding from the U S economy **A**

Fund. Strategy, Policy, & Review Department, International Monetary Fund. Monetary and Capital Markets Department, 2013-03-09 This paper provides case studies of 13 of the largest non UMP countries The case studies begin with an overview of recent macro economic developments as well as capital flow patterns during the crisis up to the first U S tapering announcement in May 2013 Country experiences with capital inflows are judged along five dimensions i the size of capital inflows ii policies used to manage inflows iii external stability measured by exchange rate overvaluation and current account deficits relative to fundamentals 2 iv asset price and credit market reactions and v financial sector stability Case studies mostly draw on published IMF Staff Reports for each country as well as the 2013 Pilot External Stability Report IMF 2013d *International Trade and Finance* Peter B. Kenen, 1997-11-13 This collection of essays is intended to help define an agenda for future research in the field of international trade and finance Economic Development and World Debt Soumitra Sharma, H.W. Singer, 1989-07-03 The papers presented here were first given at the International Conference of Economists at the University of Zagreb in Yugoslavia The book contains a rare selection of divergent theoretical and practical views on the acute problem of international debt and its repercussions on world economic growth at large and the developing countries in particular **Unintended Consequences of U. S. Monetary Policy Shocks: Dutch Disease and Capital Flow Measures in Emerging Markets and Developing Economies** Juan Yepez, 2021-08-06 Dutch disease is often referred as a situation in which large and sustained foreign currency inflows lead to a contraction of the tradable sector by giving rise to a real appreciation of the home currency This paper documents that this syndrome has been witnessed by many emerging markets and developing economies EMDEs as a result of surges in capital inflows driven by accommodative U S monetary policy In a sample of 25 EMDEs from 2000 17 U S monetary policy shocks coincided with episodes of currency appreciation and a contraction in tradable output in these economies The paper also shows empirically that the use of capital flow measures CFMs has been a common policy response in several EMDEs to U S monetary policy shocks Against this background the paper presents a two sector small open economy augmented with a learning by doing LBD mechanism in the tradable sector to rationalize these empirical findings A welfare analysis provides a rationale for the use of CFMs as a second best policy when agents do not internalize the LBD externality of costly resource misallocation as a result of greater capital inflows However the adequate calibration of CFMs and the quantification of the LBD externality represent important implementation challenges Fifty Years After Bretton Woods Mr. James M. Boughton, K. Sarwar Lateef, 1995-04-14 This volume edited by James M Boughton and K Sarwar Lateef contains the proceedings of a conference held in Madrid Spain in 1994 by the IMF and the World Bank to commemorate the fiftieth anniversary of the Bretton Woods conference of July 1944 that created the two institutions The conference provided a forum for reflection and for reassessing the roles of the institutions as they approach the twenty first century **Global Growth and Financial Spillovers and the South African Macro-economy** Mthuli Ncube, Eliphaz Ndou, Nombulelo Gumata, 2016-04-29 To what extent is South Africa affected by G8

economies and BRIC growth shocks This book identifies channels that amplify these shock effects the relevance of third country transmission effects and the effects of the first and second rounds of US quantitative easing The changing reactions of South African variables over time to financial shocks emanating from the US and selected countries in the Euro area is presented The book quantifies the effects of capital flow shocks determines the counterfactuals of asset prices and economic growth variables and compares the contribution of capital flows and domestic macro factors on asset prices The effects of the exchange rate depreciation are contrasted to the decline in investment as key drivers of the trade balance Stock market interdependence is determined amongst South African Indian and Brazilian equities The contributions of stock price returns and volatility on South African economic growth are contrasted The authors construct a financial stress index for South Africa and determine how it amplifies shocks

The Economic Impact of Fiscal Policy Uncertainty: Evidence from a New Cross-Country Database Mr. Gee Hee Hong, Shikun (Barry) Ke, Anh D. M. Nguyen, 2024-09-27 Fiscal policy uncertainty FPU ambiguity in government spending and tax plans as well as in public debt valuation is widely regarded as a source of economic and financial disruptions However assessing its impact has so far been limited to a few large economies In this paper we construct a novel database of news based fiscal policy uncertainty for 189 countries Importantly we track fiscal uncertainty events that generate global attention that we refer to as the global fiscal policy uncertainty This uncertainty has contractionary effects reducing industrial production in both advanced and emerging market economies with impacts greater than country specific fiscal policy uncertainty Additionally global fiscal policy uncertainty raises sovereign borrowing costs and generates synchronous movements in the global financial variables even after accounting for US monetary policy shocks
