Global Security Beyond Millenium:

Ethics and Global Security Anthony Burke, Katrina Lee-Koo, Matt McDonald, 2014-06-27 This book will be the first systematic examination of the role that ethics plays in international security in both theory and practice and offers the reader a concrete ethics for global security Questions of morality and ethics have long been central to global security from the death camps world wars and H bombs of the 20th century to the humanitarian missions tsunamis terrorism and refugees of the 21st This book goes beyond the Just War tradition to demonstrate how ethical commitments influence security theory policy and international law across a range of pressing global challenges The book highlights how from patrolling a territorial border to maintaining armed forces security practices have important ethical implications by excluding some from consideration presenting others as potential threats and exposing them to harm and licensing particular actions While many scholars and practitioners of security claim little interest in ethics ethics clearly has an interest in them This innovative book extends the traditional agenda of war and peace to consider the ethics of force short of war such as sanctions deterrence terrorism targeted killing and torture and the ethical implications of new security concerns such as identity gender humanitarianism the responsibility to protect and the global ecology It advances a concrete ethics for an era of global threats and makes a case for a cosmopolitan approach to the theory and practice of security that could inspire a more just stable and inclusive global order This book fills an important gap in the literature and will be of much interest to students of ethics security studies and international relations

The New Agenda for Global Security Stephanie Lawson, 1995 Highly topical analysis of world politics and the role of the UN

The Routledge Research Companion to Security Outsourcing Joakim Berndtsson, Christopher Kinsey, 2016-06-10 Conveniently structured into five sections The Routledge Research Companion to Outsourcing Security

offers an overview of the different ways in which states have come to rely on private contractors to support interventions Part One puts into context the evolution of outsourcing in Western states that are actively involved in expeditionary operations as well as the rise of the commercial security sector in Afghanistan To explain the various theoretical frameworks that students can use to study security military outsourcing Part Two outlines the theories behind security outsourcing Part Three examines the law and ethics surrounding the outsourcing of security by focusing on how states might monitor contractor behaviour hold them to account and prosecute them where their behaviour warrants such action The drivers politics and consequences of outsourcing foreign policy are covered in Part Four which is divided into two sections section one is concerned with armed contractors providing the provision of private security with the main driver being a capability gap on the part of the military law enforcement agencies and section two looks at military contractors supporting military operations right back to antiquity less controversial politically and often technologically driven The final Part takes into consideration emerging perspectives exploring areas such as gender feminist methodology maritime security and the impact of private security on the military profession This book will be of much interest to students of military and security studies foreign policy and International Relations

Governing Borders and Security Catarina Kinnvall, Ted Svensson, 2014-09-19 This book explores and maps the relationship between borders security and global governance Theoretically the book seeks to establish to what degree and in what ways traditional notions of borders security and global governance are being eroded undermined and contested in the context of a globalising world Borders are increasingly being re conceptualised to account for connectivity as well as divisions at the same time as focus is shifting from permanence to permeability The ambivalence ascribed to bordering processes is at heart a security concern borders are not only entwined with state formation but are also attempts at governing securities identities and histories Proceeding from a critical rendering of statist conceptualisations of borders security and governance the book not only emphasises the politics of borders mobility and re locations but also provides a shared groundwork for interrogating the spatial conditions for bordering and border work as manifestations of a continuously deferred becoming rather than being A principal contribution of the volume is its scrutiny of how borders are enacted and perceived in and through the everyday and of how such production and construal can make sense as acts of resistance to various forms of governing Such a focus reveals the necessity of investigating how governing from afar affects the possibilities and tendencies to securitise as well as desecuritise within as well as beyond elite settings This book will be of much interest to students of border studies human geography governmentality global governance and IR critical security studies

Bourdieu in International Relations Rebecca Adler-Nissen, 2013 This book rethinks the key concepts of International Relations by drawing on the work of Pierre Bourdieu The last few years have seen a genuine wave of publications promoting sociology in international relations Scholars have suggested that Bourdieu s vocabulary can be applied to study security diplomacy migration and global environmental politics Yet we still lack a systematic and accessible

analysis of what Bourdieu inspired IR might look like This book provides the answer It offers an introduction to Bourdieu s thinking to a wider IR audience challenges key assumptions which currently structure IR scholarship and provides an original theoretical restatement of some of the core concepts in the field The book brings together a select group of leading IR scholars who draw on both theoretical and empirical insights from Bourdieu Each chapter covers one central concept in IR Methodology Knowledge Power Strategy Security Culture Gender Norms Sovereignty and Integration The chapters demonstrate how these concepts can be reinterpreted and used in new ways when exposed to Bourdieusian logic Challenging key pillars of IR scholarship Bourdieu in International Relations will be of interest to critical theorists and scholars of IR theory

Climate Change, Human Security and Violent Conflict Jürgen Scheffran, Michael Brzoska, Hans Günter Brauch, Peter Michael Link, Janpeter Schilling, 2012-05-26 Severe droughts damaging floods and mass migration Climate change is becoming a focal point for security and conflict research and a challenge for the world s governance structures But how severe are the security risks and conflict potentials of climate change Could global warming trigger a sequence of events leading to economic decline social unrest and political instability What are the causal relationships between resource scarcity and violent conflict This book brings together international experts to explore these questions using in depth case studies from around the world Furthermore the authors discuss strategies institutions and cooperative approaches to stabilize the climate society interaction

Approaches to Global Governance Theory Martin Hewson, Timothy J. Sinclair, 1999-08-26 As the debate over global governance heats up Approaches to Global Governance Theory offers a guide to this new terrain The contributors advocate approaches to global governance that recognize fundamental political economic technological and cultural dynamics that engage social and political theory and that go beyond conventional international relations theory We are offered here a guide to this new terrain Beginning with a chapter tracing the emergence of global governance analysis in the 1990s Approaches to Global Governance Theory also responds to alternative theoretical conceptions James N Rosenau explores the ontology of global governance In addition Robert Latham develops a critique of Rosenau s thinking while Michael G Schechter examines the limits of the Commission for Global Governance s widely publicized 1995 report and Ronen Palan asks critically Who is to be governed by global governance Other chapters develop analyses of global governance phenomena Technological change is addressed by Karen T Litfin on environmental satellites and Edward A Comor on broadcast satellites M Mark Amen examines developments in credit and shifts in political identity are mapped by Yale H Ferguson and Richard W Mansbach Also developments in information and knowledge are considered by Tony Porter In addition chapters advocate new directions for global governance analysis Timothy Sinclair suggests a focus on the level of the commonplace Martin Hewson proposes long term analysis of world order informationalism and Ronnie D Lipschutz makes a case for the importance of global civil society

Governing Human Life Ondrej Ditrych, Constanza Sánchez Avilés, 2023-08-31 This book is a critical analysis tracing the operation of biopolitical mode of power in the global field of drug

control Through a series of theoretically framed investigations that relate current drug control policies to the broader frame of vital politics it attends to the relationship of drug control state of exception and democracy exploring how pressures of resurgent sovereignty and neoliberal governmentality imprint on drug policy Then it turns attention to the relationship of power and knowledge with a particular focus on the evidence based approaches that may at times sustain rather than challenge prohibitionist drug control policies Finally it looks at how the global drug control dispositif shapes life on one of Europe's internal peripheries These investigations are intended to illuminate the operation of the drug control dispositif and its far reaching bio political effects in order to expand the space for devising more competent and compassionate public policies

Violence against Women in and beyond Conflict Julia Carolin Sachseder, 2022-09-16 Violence against Women in and beyond Conflict explores the processes and structures that underlie and contribute to sexual violence and internal displacement in armed conflict utilizing extensive ethnographic research to provide cutting edge insights The author argues that the key to understanding violence against women lies at the intersection of transnational capital race and gender that not only contribute to its production but also to its persistence The book uses the Colombian armed conflict as the primary case study but develops a broader framework for theorizing the relationship between the global political economy the history of coloniality and intersectional constructions of gender and race with regard to conflict and violence It offers an understanding of violence against women as not isolated from but part and a symptom of a larger system of political social and economic inequality that is rooted in colonialism and exploited and exacerbated by transnational capital relations The author also shows how the state and non state actors most prominently paramilitaries are involved in this relationship of violence The book highlights implications for meaningful and sustainable peace in post conflict contexts This book will be of great interest to students and scholars of international relations gender studies and conflict studies as well as policymakers non governmental organizations and practitioners interested in conflict and security

Beyond Appeasement Cecelia M. Lynch, 2018-09-05 The interwar peace movements were according to conventional interpretations naive and ineffective More seriously the standard histories have also held that they severely weakened national efforts to resist Nazi Germany and Stalinist Russia Cecelia Lynch provides a long overdue reevaluation of these movements Throughout the work she challenges these interpretations particularly regarding the postwar understanding of Realism which forms the basis of core assumptions in international relations theory The Realist account labels support for interwar peace movements as idealist It holds that this support largely pacifist in Britain largely isolationist in the United States led to overreliance on the League of Nations appeasement and eventually the onset of global war Through a careful examination of both the social history of the peace movements and the diplomatic history of the interwar era Lynch uncovers the serious contradictions as well as the systematic limitations of Realist understanding and outlines the making of the structure of the world community that would emerge from the war Lynch focuses on the construction of the United Nations as evidence that the conventional history is

incomplete as well as misleading She brings to light the role of social movements in the formation of the normative underpinnings of the U N thus requiring scholars to rethink their understanding of the repercussions of the interwar experience as well as the significance of social movements for international life *Index of Conference Proceedings* British Library. Document Supply Centre,2002 *Defence Policy of Nigeria: Capability and Context* Charles Quarker Dokubo,Celestine Oyom Bassey,2011-01-20 This Reader provides a structurally coherent explanation and review of the magnified role conception and organizational task expansion for the Nigerian military establishment in foreign policy It argues essentially that one of the most problematic and intractable areas of public policy in Nigeria since the Civil War concerns the development of a professional defence establishment adequate to meet the challenges arising from the altered parameters of iour security environment The correction of this condition is the primary motivation of the Armed Forces modernization and augmentation program that touches upon all elements of Nigeria s military power This Reader is at once a review and a critique of the major facets of this modernization and augmentation process of the Nigerian armed forces within the operative context of the changing dimension of threat perception and the strategic parameters that have guided Nigerian military planning since the Civil War in 1970 **China and the United Nations** Janka Oertel,2015-03-26 This comprehensive and innovative book examines and explains the development of the relationship between China and the United Nations in the first decade of the twenty first century Using historical research and contemporary case studies the book stresses the importance of domestic determinants of UN policy and concludes that the chances for international actors to significantly influence Chinese UN policy making remain very limited *Moving Beyond the First Five Years* United States. Congress. House. Committee on Homeland Security. Subcommittee on Border, Maritime, and Global Counterterrorism,2008 **Assessment of Freshwater Fish Seed Resources for Sustainable Aquaculture** Food and Agriculture Organization of the United Nations,2007-01-01 Four of the most important resources to aquaculture outside human and technological resources are land water seed and feed Efficient use of these resources are necessary to guarantee optimum production from aquaculture A project Study and Analysis of Seed Production in Small scale Rural Aquaculture was implemented through a desk study and expert workshop held in Wuxi China from 23 26 March 2006 to assess the status of freshwater fish seed resources and supply and its contribution to sustainable aquatic production This publication is presented in two parts Part 1 contains the proceedings and major recommendations of the expert workshop which tackled three major themes a seed quality genetics technology and certification b seed networking distribution entrepreneurship and certification and c how rural fish farmers can benefit from the freshwater aquaseed sector Part 2 contains the detailed outcomes of the desk study consisting of three regional syntheses Africa Asia and Latin America based on 21 country case studies five thematic reviews quality genetics and breeding seed networks and entrepreneurship seed supply in rural aquaculture farmer innovations and women involvement and three invited papers self recruiting species decentralized seed
