Globalisation A Systematic Marxian Account:

Globalisation Tony Smith, 2005-12-01 Part One of this book examines the social state neoliberal catalytic state and democratic cosmopolitan models of globalisation Each necessarily tends to function in a manner contradicting essential claims made by its leading advocates This immanent contradiction provides a theoretical warrant for moving to a new position addressing the shortcomings of the previous framework The first three chapters of Part Two are devoted to a Marxian model of capitalist globalisation in which the irresolvable contradictions and social antagonisms of the capitalist global order are explicitly recognised The final chapter is devoted to a Marxian model of socialist globalisation in which those contradictions and antagonisms are overcome bringing the systematic dialectic of globalisation to a close *Criticism of Religion* Roland Boer, 2009 *Criticism of Religion* offers a spirited critical commentary on the engagements with religion and theology by a range of leading Marxist philosophers and critics Lucien Goldmann Fredric Jameson Rosa Luxemburg Karl Kautsky Julia Kristeva Alain Badiou Giorgio Agamben Georg Lukács and Raymond Williams Apart from offering sustained critique the aim is to gather key insights from these critics in order to develop a comprehensive theory of religion The book follows on the heels of the acclaimed *Criticism of Heaven* being the second volume of a five volume series called *Criticism of Heaven and Earth*

Technological Change Aurora Teixeira, 2012-04-11 Technological change is today central to the theory of economic growth It is recognised as an important driver of productivity growth and the emergence of new products from which consumers derive welfare It depends not only on the work of scientists and engineers but also on a wider range of economic and societal factors including institutions such as intellectual property rights and corporate governance the operation of markets a range of governmental policies science and technology policy innovation policy macroeconomic policy competition policy etc historical specificities etc Given that technology is explicitly taken up in the strategies and policies of governments and firms and new actors both in the national and international arenas become involved understanding the nature and dynamics of technology is on demand I anticipate that this book will decisively contribute in this regard

Hegel and Capitalism Andrew Buchwalter, 2015-08-31 Examines Hegel's unique understanding and assessment of capitalism as an economic social and cultural phenomenon Bringing together scholars from varying perspectives this book examines the value of Hegel's thought for understanding and assessing capitalism both as encountered by Hegel himself and in forms it takes today The contributors consider Hegel's complex and multifaceted appraisal of modern market societies which he understands variously as a condition for a proper account of individual freedom the framework for a productive account of social interdependency and the breeding ground for a host of social pathologies concerning individual consumption labor conditions and disparities in wealth between the rich and poor Hegel's ideas about the topic are situated in the context of work by other important thinkers including Adam Smith Immanuel Kant J G Fichte Karl Marx Max Weber and Theodor Adorno along with contemporary social and economic theorists Demonstrating the value of Hegel's philosophy

for addressing issues pertaining to capitalism today the essays bring insight to contemporary concerns such as resurgent neoliberalism economic globalization the subordination of ever more spheres of human life to the logic of economic imperatives and the adequacy of models of utility maximization for comprehending contemporary market societies *The Social Ontology of Capitalism* Daniel Krier, Mark P. Worrell, 2016-11-25 This book addresses core questions about the nature and structure of contemporary capitalism and the social dynamics and countervailing forces that shape modern life From a robust and self consciously sociological framework it analyzes and interrogates such issues as the nature of the social the power of the sacred the nature of authority the problem of representation reification alienation utopia and collective resistance Historical materialism reveals that the scope of productive functions is broader than the crude realism of economism Marx's critical theory of the commodity and his analysis of the capitalist regime of accumulation remain as vital as ever and serve as a guiding light for the continued exploration of the philosophical underpinnings of critical inquiry and praxis *Corporate Power and Globalization in US Foreign Policy* Ronald W. Cox, 2012 This book examines the manifestations of corporate power in US foreign policy and the global economy over the past thirty years culminating in an assessment of the implications of greater concentrations of wealth and power for democracy both in the US and abroad

Philosophical and Political Consequences of the Critique of Political Economy Patrick Murray, Jeanne Schuler, 2023-08-29 This book extends the approach that Murray and Schuler develop in their companion volume *False Moves in Philosophy and Social Theory* *Losing Public Purpose* The chapters form a connected inquiry into consequences of capital a far reaching social form through a critique of political economy and the mindset it shares with much modern philosophy and social theory The authors call this bifurcating mentality factoring philosophy Factoring philosophy mistakes the distinguishable for the separable It splits the subjective and objective form and content and it takes the object of social theory to be an impossible economy in general stripped of constitutive social forms The critique of factoring philosophy structures the collection which makes a wide ranging contribution to the research field of the critique of political economy as critical social theory Ultimately this book solidifies Murray and Schuler's impact on the study of political economy political philosophy modern philosophy Hegel Marx and critical theory *Global Slump* David McNally, 2010-12-09 *Global Slump* analyzes the global financial meltdown as the first systemic crisis of the neoliberal stage of capitalism It argues that far from having ended the crisis has ushered in a whole period of worldwide economic and political turbulence In developing an account of the crisis as rooted in fundamental features of capitalism *Global Slump* challenges the view that its source lies in financial deregulation The book locates the recent meltdown in the intense economic restructuring that marked the recessions of the mid 1970s and early 1980s Through this lens it highlights the emergence of new patterns of world inequality and new centers of accumulation particularly in East Asia and the profound economic instabilities these produced *Global Slump* offers an original account of the financialization of the world economy during this period and explores the

intricate connections between international financial markets and new forms of debt and dispossession particularly in the Global South Analyzing the massive intervention of the world's central banks to stave off another Great Depression Global Slump shows that while averting a complete meltdown this intervention also laid the basis for recurring crises for poor and working class people job loss increased poverty and inequality and deep cuts to social programs The book takes a global view of these processes exposing the damage inflicted on countries in the Global South as well as the intensification of racism and attacks on migrant workers At the same time Global Slump also traces new patterns of social and political resistance from housing activism and education struggles to mass strikes and protests in Martinique Guadeloupe France and Puerto Rico as indicators of the potential for building anti capitalist opposition to the damage that neoliberal capitalism is inflicting on the lives of millions

Value, Money and Capital Guido Starosta, Gastón Caligaris, Alejandro Fitzsimons, 2023-10-05 The book presents a high impact re reading of core topics in the Marx and Marxist debates including value theory the commodity nature of money complex or skilled labour the determination of the value of labour power and the nature of extraordinary surplus value Drawing on this literature the book provides original and innovative insights into key controversies in contemporary capitalism such as the increasingly intellectual character of commodity producing labour the emergence of global value chains the relevance of ground rent bearing commodities and the specific uneven developmental dynamics of resource rich countries in the global process of capital accumulation Contributing to the renewed vitality of critical studies of the economic works of Karl Marx this book will be essential reading for all those interested in contemporary debates within Marxism as well as readers of political economy economics development studies and economic sociology

[The Future of Capitalism After the Financial Crisis](#) Richard Westra, Dennis Badeen, Robert Albritton, 2014-12-17 The Future of Capitalism After the Financial Crisis The Varieties of Capitalism Debate in the Age of Austerity contains thirteen world leading political economists writing from within eight different countries who critically analyze the current crisis tendencies of capitalism both globally and in particular countries Given the likelihood of an increasingly crisis prone future for capitalism it is important not only to rethink capitalism in its current manifestations or varieties It is also important to rethink research methods and conceptual frameworks in preparation for understanding an increasingly rocky future in which capitalism itself could go the way of the many species that in the past were endangered only to become extinct More and more titles of books and articles are suggesting that capitalism or perhaps civilization itself is endangered if we do not make radical changes in the near future This book breaks with academic path dependency and attempts to open new vistas of political economy and of multidisciplinary analysis that are crucially important if our thought processes are to be effective in a world in jeopardy The varieties of capitalism VoC debate itself came into being as the Soviet Union unraveled It drew in scholarship from a cross section of Marxian and heterodox political economy The key argument of VoC was that if capitalism was the only global option then those on the Left must get involved in policy discussions on how capitalist economies can be fashioned to become

competitive as well as progressive However the financial crisis has seen policy across the advanced economies veer toward competitiveness coupled with austerity The lesson for the Left is that alternatives to capitalism must be sought in the here and now *Capital in the Mirror* Dan Krier, Mark P. Worrell, 2020-04-01 Aesthetic objects crafted as poetic reflections of the contradictory worlds that they inhabit are simultaneously theorized and theorizing In *Capital in the Mirror* eminent critical theorists explore the aesthetic dimension for reflective visions of capital that are difficult to obtain through even the most rigorous statistical analyses Chapters address inequality alienation ideology warfare and other problems of contemporary capitalism through the cultural prisms of Herman Melville Thomas Mann Charles Dickens J W Goethe Friedrich Hölderlin Walt Whitman Bertolt Brecht and science fiction cinema Famous narrative elements in their works such as Ahab's pursuit of the white whale in Melville's *Moby Dick* demonic production and perverse desire in Mann's *Doctor Faustus* socially electrified bodies of Whitman's *Leaves of Grass* and dystopian projections of current sci fi cinema are theorized as stylistically distorted reflections of social life within capital The authors reveal theoretical powers latent within these condensed images that prefigure the dark dynamics of capitalism Focusing on dark images of domination and also prophetic images of transformation the book points the way toward emancipation social regeneration and human flourishing

Althusser Gregory Elliott, 2006-08-01 First published in 1987 Althusser *The Detour of Theory* was widely received as the fullest account of its subject to date Drawing on a wide range of hitherto untranslated material it examined the political and intellectual contexts of Althusser's return to Marx in the mid 1960s analysed the novel character of the Marxism developed in his major works charted their author's subsequent evolution from his self criticism to the proclamation of a crisis of Marxism and concluded with a balance sheet of Althusser's contribution to historical materialism For this second edition Gregory Elliott has added a substantial postscript in which he surveys the posthumous edition of the French philosopher's work published in the 1990s from the early writings of the 1940s through to the late texts of the 1980s relating the unknown Althusser revealed by them to the familiar figure of For Marx and Reading Capital together with a comprehensive bibliography of Althusser's oeuvre **A Marxist Philosophy of Language** Jean-Jacques Lecercle, 2006-08-01 The purpose of this book is to give a precise meaning to the formula English is the language of imperialism Understanding that statement involves a critique of the dominant views of language both in the field of linguistics the book has a chapter criticising Chomsky's research programme and of the philosophy of language the book has a chapter assessing Habermas's philosophy of communicative action The book aims at constructing a Marxist philosophy of language embodying a view of language as a social historical material and political phenomenon Since there has never been a strong tradition of thinking about language in Marxism the book provides an overview of the question of Marxism in language from Stalin's pamphlet to Voloshinov's book taking in an essay by Pasolini and it seeks to construct a number of concepts for a Marxist philosophy of language The book belongs to the tradition of Marxist critique of dominant ideologies It should be particularly useful to those who in the

fields of language study literature and communication studies have decided that language is not merely an instrument of communication

Taking Socialism Seriously Richard Schmitt, Anatole Anton, 2012-03-22 Taking Socialism Seriously raises essential questions about what socialism is and how socialists can reach it by addressing a long list of potential quandaries The contributions compiled by Anatole Anton and Richard Schmitt describe how socialism differs from a reformed and more humane form of capitalism Various chapters discuss suitable forms of love and family in a socialist society and economic arrangements within a socialist system They also break important new paths by calling for significant social change examining detailed questions that have previously been neglected and setting a new direction for radical theorists Critics are often convinced that there is no alternative and therefore are content to reform capitalism This book affirms that another world is possible

Mute Compulsion Søren Mau, 2023-01-31 Despite insoluble contradictions intense volatility and fierce resistance the crisis ridden capitalism of the 21st century lingers on To understand capital's paradoxical expansion and entrenchment amidst crisis and unrest Mute Compulsion offers a novel theory of the historically unique forms of abstract and impersonal power set in motion by the subjection of social life to the profit imperative Building on a critical reconstruction of Karl Marx's unfinished critique of political economy and a wide range of contemporary Marxist theory philosopher Søren Mau sets out to explain how the logic of capital tightens its stranglehold on the life of society by constantly remoulding the material conditions of social reproduction In the course of doing so Mau intervenes in classical and contemporary debates about the value form crisis theory biopolitics social reproduction humanism logistics agriculture metabolism the body competition technology and relative surplus populations
