*Beyond devolution and decentralisation* Alistair Cole, 2013-07-19 *Beyond devolution and decentralisation* compares the politics policies and polity building dynamics of devolution in Wales and decentralisation in the French region of Brittany Empirically the book draws conclusions from in depth fieldwork within two regions and reports the findings of a comparative public opinion survey Theoretically it contributes towards our understanding of the comparative study of regions Perhaps most impressive is how the case studies generally are based on but also cast light back to the nuanced theoretical framework on regional capacity established at the outset The book uncovers the dynamics of devolution in Wales and decentralisation in Brittany through extensive face to face interviews over 200 interviews were carried out from

2001 to 2004 a formative stage in the development of the devolved institutions in Wales and a period of expectation in Brittany as well. The book will be of interest to the professional research community and to practitioners in Britain, France and beyond as well as to students on comparative politics, British, Welsh politics, French politics, European studies and public policy courses.

**Decentralized Development in Latin America** Paul Lindert, Otto Verkoren, 2010-03-02. Much of the scholarly and professional literature on development focuses either on the macro level of national policies and politics or on the micro level of development projects and household or community socio-economic dynamics. By contrast, this collection pitches itself at the meso level with a comparative exploration of the ways in which local institutions, municipalities, local governments, city authorities, civil society networks and others have demanded and taken on a greater role in planning and managing development in the Latin American region. The book's rich empirical studies reveal that local institutions have engaged upwards with central authorities to shape their policy and resource environments and in turn been pressured from below by local actors contesting the ways in which the structures and processes of local governance are framed. The examples covered in this volume range from global cities such as Mexico and Santiago to remote rural areas of the Bolivian and Brazilian Amazon. As a result, the book provides a deep understanding of the diversity and complexity of local governance and local development in Latin America while avoiding the stereotyped claims about the impact of globalisation or the potential benefits of decentralisation as frequently stated in less empirically grounded analysis.

**Cities and Local Governments in Central Asia** Madina Junussova, 2020-02-28. This book presents the changing roles of urban governments and how local governments struggle to gain administrative, fiscal and political power to combat current urban challenges in Kazakhstan. Focusing on the cities and regions selected by the national government of Kazakhstan to be the drivers of national economic development, the author analyses the impact of decentralization on the role of local governments. The book examines the practical experiences of city and regional governments with an emphasis on urban planning, public investment in national projects and management of urban transport. Due to the complexity and irregular distribution of political reforms at different levels of local government in Kazakhstan, three separate studies are presented, each looking at a specific aspect of decentralization reform and local government function related to physical urban development and distribution of public investment. The author argues that if the national government of Kazakhstan wants to concentrate economic resources in urban agglomerations, it is not enough to assume that local governments are ready to play the role of efficient planners and managers of urban development. A useful analysis illustrating cities and urban conglomerations as engines of growth in economic development, this book will be of interest to academics studying Central Asian Studies, in particular political and economic development, Development Studies and Urban Studies. **Governance in the New South Africa** Guy C. Z. Mhone, Omano Edigheji, 2003. The major challenges

confronting South Africa since the advent of non racial multiparty democracy have been the need to promote democratic governance economic growth global competitiveness and to improve the standard of living of its people especially the previously disadvantaged majority Black population These challenges have coincided with the ascendancy of globalisation with its attendant social economic and political imperatives all of which have consequences for governance and development at the national level not least in emerging economies like South Africa This important book assesses the implications of global imperatives for the nature capacity character and scope of democratic governance and the pursuit of equitable development in the new South Africa A major conclusion is that the implementation of domestic economic reforms predicated on market fundamentalism with its dominant logic and paradigm of globalisation and economic management is incompatible and irreconcilable with the quest for democratic governance and equitable development The contributors contend that such an approach reproduces a substantively undemocratic and inequitable society Governance in the New South Africa concludes by offering some considerations related to how substantive democracy and equitable development may be promoted in South Africa on the basis of democratic governance and developmentalism      Globalization, Competitiveness and Human Security Cristóbal Kay, 2012-10-12 This collection explores the connections between globalization competitiveness and human security and their relevance for development studies These issues amongst others are also explored in a number of case studies taken from Asia Africa and Latin America      Digital Governance and Decentralisation M.R. exhibited in young people's online practices to young people's everyday social and cultural engagement through new media. It brings new insights by understanding the meanings of young people's mundane and everyday online engagement for their citizenship learning, identity performance and their formation of political subjectivity. Readers will gain insights into citizenship in China and young people and the Chinese Internet.

Decentralised Government in an Integrating World Dan Stegarescu, 2006-03-08

The book offers a comprehensive empirical analysis of the determinants of changes in the distribution of expenditure and revenue-raising powers among fiscal tiers in OECD countries. Using a new indicator of fiscal decentralisation which accounts for subnational decision-making autonomy, common decentralisation trends are investigated. Then empirical evidence from panel analyses is provided for the role of costs, preferences and institutions in explaining fiscal federal structures and for the impact of economic and political integration on the degree of government decentralisation, particularly among EU countries. Finally, the historical experience of Germany is used to explore long-term developments in the public sector.
