**Cities in Transition** Rita Schneider-Sliwa, 2006-01-23 This book was written with the aim of showing that even in the era of globalization developments appearing in cities are not subject to almost unconditional global forces Rather universal forces are decisive eventualities in the process of urban restructuring often influencing its course and speed yet developments and particularities within a city strongly influence the course of events and the extent to which negative characteristics of globalization might occur Berlin Brussels Hanoi Ho Chi Minh City Hong Kong Jerusalem Johannesburg Moscow St Petersburg Sarajevo and Vienna Using these important cities the special relationship between global and local regional forces is analyzed The case studies were selected based on their political and cultural context and the fact that their social and political fabric was subject to major changes in the recent past How global processes manifest themselves locally depends to a great extent on how development processes and endogenic potentials are initiated locally in order to cope with the new global economic and societal conditions

*Globalization and Urban Development* Harry W. Richardson, Chang-Hee C. Bae, 2009-09-02 Most research on globalization has focused on macroeconomic and economy wide consequences This book explores an under researched area the impacts of globalization on cities and national urban hierarchies especially but not solely in developing countries Most of the globalization urban research has concentrated on the global cities e g New York London Paris Tokyo that influence what happens in the rest of the world In contrast this research looks at the cities at the receiving end of the forces of globalization The general finding is that large cities on balance benefit from globalization although in some cases at the expense of widening spatial inequities

*Globalization and Urban Implosion* Remo Dalla Longa, 2009-12-03 In the past twenty years globalization has rendered many economic and social urban functions obsolete Large cities face a form of implosion which necessitates a rethinking of both contents and containers This book will mainly concentrate on the latter aspect Thus the need to replace old functions with new ones is clear especially within complex urban areas where the connections between public and private assets are strongest In this context new forms of urban models Public Private Partnerships tools and drivers various decision makers who have to operate within complex urban areas have to be considered Hence the creation or destruction of values depends on how new functions replace old ones This also explains new and important forms of competitive advantage among large globalized cities This book presents a model of complex urban interventions Based on a literature review the model integrates different forms of Public Private Partnerships PPPs new tools and instruments associated with governance issues challenges and new profiles of public drivers By analyzing a number of European urban centers this book illustrates the implementation of the general model in specific case studies and furthermore shows the essential differences between post socialist and Western cities

Globalization, Urban Progress, Urban Problems, Rural Disadvantages Stefanie Knauder, 2018-05-08 This title was first published in 2000 This text demonstrates the mutual effects of and interconnections between globalization urbanization and rural stagnation both theoretically and empirically It places its comprehensive empirical investigation on two levels of urbanization the peri urban and the fully urbanized areas and includes the analysis of the rural conditions into the context of the Southern African region and also into the context of global processes in an historical and interdisciplinary perspective The text analyzes the magnitude of the two gaps and the process of social change between the three areas objectively by showing the changing social interaction patterns the differences in housing and other socio economic variables and subjectively through showing the judgement of the people of these variables the degree of satisfaction and depression As the majority of variables reveal poverty the root causes for it in Mozambique Africa and the Third World are analyzed and aspects of an alternative development and an alternative globalization are presented

*Strategies for Urban Development in Leipzig, Germany* Jean-Claude Garcia-Zamor, 2013-10-18 The demographic pressure caused by migration offers a considerable challenge for urban centers today It results in an uneven development of the community and focus of urban planners becomes how to provide decent low cost housing and transportation in order to facilitate the integration of poorer residents among the rest of the community In large industrialized countries the challenges of urban policy makers are made even more complicated since these governments depend on state or federal legislators to obtain the massive amounts of funding required for adequately addressing these local issues that are in global cause The book analyzes the strategies for urban development in Leipzig Germany and shows how civic leaders were able to harmonize planning and equity They relied heavily on two interesting approaches in that process the promotion of culture as a key component of urban development and the reconciliation of the inevitable process of gentrification with social equity The book also looks at the globalization aspect of urban development reviews research in social equity in urban development in Europe and the United States and describes sustainability as an important element of urban renaissance
