The Globalization of Security B. Mabee, 2009-05-21 The Globalization of Security is an important rethinking of the connections between globalization and security focusing on a conceptual examination of the role of the state combined with key case studies The book provides a novel historical sociological approach advancing both the understanding of security and the theory of state power

Security Studies Paul D. Williams, 2013 The first part of this book defines the field and offers a short historiography of its development Subsequent parts explore the theoretical approaches of security studies look at the central concepts that underpin contemporary debates look at existing institutional security architecture and examine some of the challenges ahead

The Character of War in the 21st Century Caroline Holmqvist-Jonsäter, Christopher Coker, 2009-12-04 This edited volume addresses the relationship between the essential nature of war and its character at the beginning of the twenty first century The focus is on the conflicts in Iraq and Afghanistan situations that occupy a central role in international affairs and that have become highly influential in thinking about war in the widest sense The intellectual foundation of the volume is Clausewitz s insight that though war has an enduring nature its character changes with time space social structure and culture The fact that war s character varies means that different actors may interpret experience and ultimately wage war differently The conflict between the ways that

war is conceptualised in the prevailing Western and international discourse and the manner in which it plays out on the ground is a key discussion point for scholars and practitioners in the field of international relations Contributions combine insights from social theory philosophy sociology and strategic studies and ask directly what contemporary war is and what the implications are for the future This book will be of much interest to students of war studies strategic studies security studies and IR in general Caroline Holmqvist Jons ter is currently completing a PhD in the conflation of war and policing in international conflicts at the Department of War Studies King s College London Christopher Coker is Professor of International Relations at the London School of Economics and Political Science LSE He is the author of 11 books on war and security issues

War, Armed Force, and the People Walter C. Opello Jr.,2016-10-18 Throughout history innovations in military technology have transformed warfare which in turn affected state formation This interplay between warfare military technology and state formation is the focus of this text Theoretically grounded in the bellicist approach to the study of war and state which posits that war is a normal part of human experience the book argues that the threat of war by powerful predatory neighbors has been until relatively recently the prime mover of state formation Using a historical approach it explains how advances in military technology have transformed war and how new modes of war in turn have transformed forms of politico military rule especially with regard to the relationship between the state armed force and the people

Conflict Refugees Christel Querton,2023-08-10 Uncovers judicial approaches to refugee law across the European Union in the cases of refugees fleeing armed conflicts

Security Studies Associate Professor Elliott School of International Affairs Paul D Williams, Dr,Paul D. Williams,2008-06-03 Security Studies is the most comprehensive textbook available on security studies It gives students a detailed overview of the major theoretical approaches key themes and most significant issues within security studies Part 1 explores the main theoretical approaches currently used within the field from realism to international political sociology Part 2 explains the central concepts underpinning contemporary debates from the security dilemma to terrorism Part 3 presents an overview of the institutional security architecture currently influencing world politics using international regional and global levels of analysis Part 4 examines some of the key contemporary challenges to global security from the arms trade to energy security Part 5 discusses the future of security Security Studies provides a valuable teaching tool for undergraduates and MA students by collecting these related strands of the field together into a single coherent textbook

Economy of Force Patricia Owens,2015-08-27 A provocative new history of counterinsurgency with major implications for the history and theory of war but also the history of social political and international thought and social political and international studies more generally This book will interest scholars and advanced students in the humanities and social sciences

Public Perception of International Crises Dmitry Chernobrov,2019-06-24 Winner of the 2019 Edgar S Furniss Book Award from the Mershon Center for International Security How do people make sense of distant but disturbing international events Why are some representations more appealing than others What do they mean for

the perceiver's own sense of self. Going beyond conventional analysis of political perception and imagining at the level of accuracy, this book reveals how self-conceptions are unconsciously but centrally present in our judgments and representations of international crises. Combining international relations and psychosocial studies, Dmitry Chernobrov shows how the imagining of international politics is shaped by the need for positive and continuous societal self-concepts. The book captures evidence of self-affirming political imagining in how the general public in the West and in Russia understood the Arab uprisings, also known as the Arab Spring, and makes an argument both about and beyond this particular case. The book will appeal to those interested in international crises, political psychology, media and audiences, perception and political imagining, ontological security, identity and emotion, and collective memory. *International Political Sociology* Tugba Basaran, Didier Bigo, Emmanuel-Pierre Guittet, R. B. J. Walker, 2016-07-22. This book presents an overview and evaluation of contemporary research in international political sociology (IPS). Bringing together leading scholars from many disciplines and diverse geographical backgrounds, it provides unprecedented coverage of the key concepts and research through which IPS has opened up new ways of thinking about international relations. It also considers some of the consequences of such innovations for established forms of social and political analysis. It thus takes the reader on an intellectual journey engaging with questions about boundaries and limits among the many interrelated worlds in which we now live, the ways we conceptualise them, and how we continually reshape boundaries of identities, spaces, authorities, and disciplinary knowledge. The volume is organized into three sections: Lines, Intersections, and Directions. The first section examines some influences that led to the formation of the project of IPS and how it has opened up avenues of research beyond the limits of an international relations discipline shaped within political science. The second section explores some key concepts as well as a series of heated discussions about power and authority, practices and governmentality, performativity and reflexivity. The third section explores some of the transversal topics of research that have been pursued within IPS, including inequality, migration, citizenship, the effect of technology on practices of security, the role of experts and expertise, data-driven surveillance, and the relation between mobility, power, and inequality. This book will be an essential source of reference for students and across the social sciences. *The Oxford Handbook of Global Studies* Mark Juergensmeyer, Saskia Sassen, Manfred B. Steger (ed), 2019. Since the end of the Cold War, globalization has been reshaping the modern world, and an array of new scholarship has risen to make sense of it in its various transnational manifestations, including economic, social, cultural, ideological, technological, environmental, and in new communications. The chapters discuss various aspects in the field through a broad range of approaches. This handbook focuses on global studies more than on the phenomenon of globalization itself, although the various aspects of globalization are central to understanding how the field is currently being shaped. *Security Beyond the State* Rita Abrahamsen, Michael C. Williams, 2010-11-18. Across the globe, from mega-cities to isolated resource enclaves, the provision and governance of security takes place within assemblages that are de-territorialized in terms of actors.

technologies norms and discourses They are embedded in a complex transnational architecture defying conventional distinctions between public and private global and local Drawing on theories of globalization and late modernity along with insights from criminology political science and sociology *Security Beyond the State* maps the emergence of the global private security sector and develops a novel analytical framework for understanding these global security assemblages Through in depth examinations of four African countries Kenya Nigeria Sierra Leone and South Africa it demonstrates how global security assemblages affect the distribution of social power the dynamics of state stability and the operations of the international political economy with significant implications for who gets secured and how in a global era **Heroism and the Changing Character of War** S. Scheipers,2014-04-01

Post heroism is often perceived as one of the main aspects of change in the character of war a phenomenon prevalent in western societies According to this view demographic and cultural changes in the west have severely decreased the tolerance for casualties in war This edited volume provides a critical examination of this idea *The Oxford Handbook of Late Colonial Insurgencies and Counter-Insurgencies* Martin

Thomas,Gareth Curless,2023 Beginning with Britain s 1948 declaration of a Malayan Emergency and ending with the 1973 withdrawal of US ground troops from Vietnam this Handbook connects ideas about contested decolonization and the insurgencies that inspired it with an analysis of patterns and singularities in the conflicts that precipitated the collapse of overseas empires *Sexual Violence and Armed Conflict* Janie L. Leatherman,2013-04-26

Every year hundreds of thousands of women become victims of sexual violence in conflict zones around the world in the Democratic Republic of Congo alone approximately 1 100 rapes are reported each month This book offers a comprehensive analysis of the causes consequences and responses to sexual violence in contemporary armed conflict It explores the function and effect of wartime sexual violence and examines the conditions that make women and girls most vulnerable to these acts both before during and after conflict To understand the motivations of the men and occasionally women who perpetrate this violence the book analyzes the role played by systemic and situational factors such as patriarchy and militarized masculinity Difficult questions of accountability are tackled in particular the case of child soldiers who often suffer a double victimization when forced to commit sexual atrocities The book concludes by looking at strategies of prevention and protection as well as new programs being set up on the ground to support the rehabilitation of survivors and their communities Sexual violence in war has long been a taboo subject but as this book shows new and courageous steps are at last being taken at both local and international level to end what has been called the greatest silence in history *A Criminology of War?* Ross McGarry,Sandra

Walklate,2021-01-20 In recent years the academic study of war has gained renewed popularity in criminology This book illustrates its long standing engagement with this social phenomenon within the discipline Foregrounding established criminological work addressing war and connecting it to a wide range of extant sociological literature the authors present and further develop theoretical and conceptual ways of thinking critically about war Providing a critique of mainstream

criminology the authors question whether a criminology of war is possible and if so how this seemingly new horizon of the discipline might be usefully informed by sociology *Iraq in Fragments* Eric Herring, Glen Rangwala, 2006 When the United States led the invasion of Iraq in March 2003 it expected to be able to establish a prosperous liberal democracy with an open economy that would serve as a key ally in the region It sought to engage Iraqi society in ways that would defeat any challenge to that state building project and U S guidance of it Eric Herring and Glen Rangwala argue that state building in Iraq has been crippled less by preexisting weaknesses in the Iraqi state Iraqi sectarian divisions or U S policy mistakes than by the fact that the US has attempted with only limited success to control the parameters and outcome of that process They explain that the very nature of U S state building in Iraq has created incentives for unregulated local power struggles and patron client relations Corruption smuggling and violence have resulted The main legacy of the US led occupation the authors contend is that Iraq has become a fragmented state that is one in which actors dispute where overall political authority lies and in which there are no agreed procedures for resolving such disputes As long as this is the case the authority of the state will remain limited Technocratic mechanisms such as training schemes for officials political fixes such as elections and the coercive tools of repression will not be able to overcome this situation Placing the occupation within the context of regional global and U S politics Herring and Rangwala demonstrate how the politics of coercion and economic change have transformed the lives and allegiances of the Iraqi population As uncertainty about the future of Iraq persists this volume provides a much needed analysis of the deeper forces that give meaning to the daily events in Iraq

Failed Peacemaking Sandra Pogodda, Oliver P. Richmond, Gözim Visoka, 2023-07-10 This book investigates why peace and reform processes across the world have recently been stagnating or have become blocked They have failed to maintain security rights development and justice in the liberal international order The book identifies the related rise of counter peace processes at the heart of failed peacemaking efforts and explores the implications for an emerging multi polar order where local and international tools for peace and reform appear to be ineffective Across a range of recent cases from Cambodia the Balkans the Sahel region DRC Colombia Afghanistan and many others such dynamics are becoming clearer In particular small scale blocking tactics across different peace processes have been evolving into larger political strategies which are then disseminated within revisionist and revanchist international networks Ultimately this phenomenon has undermined liberal international order Spoilers and tactical blockages to peace have connected across local national regional and international scales highlighting ideological divisions Drawing on counter revolutionary theory the concept of counter peace is used as a tool to critically interrogate a systemic array of blockages to peace Distinct counter peace patterns are now entangled in peace and reform processes including the stalemate pattern the limited counter peace and the unmitigated counter peace patterns Across cases once tactical blockages begin to form these patterns they become systemic and ultimately enable conflict escalation Consequently the intimate entanglement of the existing international peace architecture

with counter peace processes points to ideological divisions in international order as well as the growing gulf between diminished practices of peace and reform with critical scholarship on peace justice and sustainability
