

The background of the slide features two globes of the Earth, one on the left and one on the right. Each globe is positioned so that it appears to have a human eye on its surface, looking towards the center. The eyes are detailed with eyelashes and irises. The globes are set against a dark, textured background that resembles a night sky or a close-up of a human face.

Globalization and Education Fazal Rizvi, 2002-12 Globalization and Education provides a critical introduction to various theories of globalization and the implications they are assumed to have for educational policy and practice Using the current global financial crisis as a backdrop internationally renowned author Fazal Razvi examine a series of questions about the ways in which globalization has been variously represented in theoretical policy and popular discourses In clear concise language Rizvi argues that the problem is not the idea of globalization itself but a particular ideological representation of the manner in which educational policy and practice should be aligned to its dictates Both an introduction to the topic and a fresh analysis designed to elicit wide ranging discussions the book opens with discussion of some of the key contemporary theories of globalization and education in order to show these are shaped by a neo liberal social imaginary The second half of the book describes some of the discontents such a social imaginary has produced among particular groups of people relegating them to the edges of the global community and resulting in vast and unacceptably high levels of inequalities Not content to accept the popular assumption that there is no alternative to a neoliberal view of globalization the book concludes with an overview of the many alternatives already proposed and the role that education might need to play in articulating a better more democratic and just way of imagining the interconnected and interdependent world Ideal for courses in education policy and education studies this valuable teaching resource is essential reading for anyone who wishes to read more about the issues and controversies at the intersection of globalization education and society

Globalization and Education Nelly P. Stromquist, Karen Monkman, 2000-09-06 The effects of globalization have long been dealt with in terms of economic and technological consequences but what about the influence on education Though still not a precise concept what we understand as Globalization is bringing forth numerous and profound changes in the economic cultural and political life of nations With increased opportunities for interaction and learning education around the world is rapidly becoming transformed The essays contained in this comprehensive yet readable book strive to provide a thorough examination of the impact these changes are having on how education is defined whom it serves and how it is assessed around the world Globalization and Education is

organized into three sections The first addresses conceptual and theoretical issues underlying such notions as globalization internationalization and multilateralism The second presents empirical data from various countries and provides examples of shifts and transformations within a specific level or modality of the educational system The third looks at the totality of educational changes taking the nation as the unit of analysis

Globalization and Education Jeffrey S. Brooks, Anthony H. Normore, Melanie C. Brooks, Nicola Sum, 2022-06-10 This book explores how globalization influences education highlighting marginalized topics and contexts It examines local and global intersections in education featuring issues in countries like Saudi Arabia Guyana and Brazil It aims to expand thinking on education's complexities in a globalized world

Effects of Globalization on Education Systems and Development Macleans A. Geo-JaJa, Suzanne Majhanovich, 2016-11-04 With its comprehensive coverage and quality this provocative book is concerned with the future of developing countries in Africa Asia and Latin America By providing in depth analysis of the economic social and educational challenges of emerging states it offers an alternative roadmap to development The authors in this collection substantiate the notion that emerging states often do not participate in policy choices related to their development when faced with universalization of curriculum and internationalization of education The authors make explicit the direct and indirect effects of globalization on educational systems social equity and the path of development In demonstrating the impact of neoliberalism or market based reforms on the developing world the authors show that education without human rights is vulnerable to negative forces of globalization and internationalization The message of the book is quite pessimistic about possibilities to widen the economic space or increase freedom unless development cooperation is made possible by Helping People Help Themselves as suggested by David Ellerman The authors note that in the past the issue of emerging states as an appendage to the world economy was a fundamental question related to colonialism but now has become a question of imperialism which needs to be examined when considering the current patterns of development

Globalization of Education Joel H. Spring, 2014-06

Continuing Joel Spring's reportage and analysis of the intersection of global forces and education this text offers a comprehensive overview and synthesis of current research theories and models related to the topic. Written in his signature clear narrative style, Spring introduces the processes, institutions, and forces by which schooling has been globalized and examines the impact of these forces on schooling in local contexts. Significant conceptual frameworks are added to this Second Edition, specifically the economization of education, corporatization of education, and the audit state. These concepts are embedded in the global educational plans of major organizations such as the World Bank, the Organization for Economic Development and Cooperation, OECD, World Economic Forum, and multinational corporations. Globalization of Education, Second Edition, features new and updated information on The World Bank, OECD, and the United Nations, The World Trade Organization, and the Global Culture of Higher Education. Corporatization of Global Education, Religious and Indigenous Education Models, The Global Workforce, Migration, and the Talent Auction, Globalization and Complex Thought. **The Impact of Globalization on Education** Ilghiz M. Sinagatullin, 2006. The notion of globalisation and its relation to education is widely being discussed among politicians, philosophers, scholars, educators, and students throughout the world. Some fully reject and refuse to accept this phenomenon; others try to understand and accept this notion; still others completely accept the idea of globalisation and associate with it all progressive changes in the new century's socio-cultural and educational space. Moreover, for a considerable part of the planet's residents, the very spirit of the terms globalism and globalisation still remains an unknown, enigmatic, almost supernatural entity. The contemporary globalising epoch is characterised by pervasive events making a considerable affect on human development, human consciousness, and on various aspects of education and child development, information and knowledge, the digitisation of information and virtualisation of objective reality, the spreading of the English language as an essential global tool for education and international communication, the dissemination of the ideas of global and multicultural education, the rise of the European Union, the market orientation of Russia, and the former entities of the former Socialist block, the spreading of the cultural and educational canons of the Anglo-American or Atlantic civilisation upon other cultures and civilisations, and unparalleled demographic growth, especially in Eastern and Southern cultures. **Second International Handbook on Globalisation, Education and Policy Research** Joseph Zajda, 2015-01-06. This handbook presents a global overview of developments in education and policy change during the last decade.
