## **Globes From The Western World:**

**Globes from the Western World** Elly Dekker,1993      **The Most Magnificent and Largest Globes of Blaeu, the World's Greatest Globe Maker** Peter C.J. van der Krogt,2022-07-04 Matching pair of terrestrial and celestial globes with a diameter of 26 inches 68 cm with text in Latin The terrestrial globe is composed of 36 half gores and two polar calottes the celestial globe of 24 ecliptical gores The gores are pasted on a plaster sphere rotating on brass pinions within a brass meridian ring incised with a graduated scale Each globe is set into a matching seventeenth century Dutch wooden base with a small wooden compass box mounted on the base plate and with the horizon ring covered scales almanac and calendar etc engraved on paper and handcoloured as originally issued Salescatalogue      *Globes* Sylvia Sumira,2014-05-01 The concept of the earth as a sphere has been around for centuries emerging around the time of Pythagoras in the sixth century BC and eventually becoming dominant as other thinkers of the ancient world including Plato and Aristotle accepted the idea The first record of an actual globe being made is found in verse written by the poet Aratus of Soli who describes a celestial sphere of the stars by Greek astronomer Eudoxus of Cnidus ca 408 355 BC The oldest surviving globe a celestial globe held up by Atlas s shoulders dates back to 150 AD but in the West globes were not made again for about a thousand years It was not until the fifteenth century that terrestrial globes gained importance culminating when German geographer Martin Behaim created what is thought to be the oldest surviving terrestrial globe In *Globes 400 Years of Exploration Navigation and Power* Sylvia Sumira beginning with Behaim s globe offers a authoritative and striking illustrated history of the subsequent four hundred years of globe making Showcasing the impressive collection of globes held by the British Library Sumira traces the inception and progression of globes during the period in which they were most widely used from the late fifteenth century to the late nineteenth century shedding light on their purpose function influence and manufacture as well as the cartographers printers and instrument makers who created them She takes readers on a chronological journey around the world to examine a wide variety of globes from those of the Renaissance that demonstrated a renewed interest in classical thinkers to those of James Wilson the first successful commercial globe maker in America to those mass produced in Boston and New York beginning in the 1800s Along the way Sumira not only details the historical significance of each globe but also pays special attention to their materials and methods of manufacture and how these evolved over the centuries A stunning and accessible guide to one of the great tools of human exploration *Globes* will appeal to historians collectors and anyone who has ever examined this classroom accessory and wondered when why and how they came to be made      *Globes of the Western World* Elly Dekker,Arthur Middleton,Peter Van Der Krogt,1993-11-01      **Bioethics Around the Globe** Catherine Myser,2011-06-10 Contemporary bioethics now roughly 40 years old as a discipline originated in the United States with a primarily Anglo American cultural ethos It continues to be professionalized and institutionalized as a maturing discipline at the intersections of philosophy medicine law social sciences and humanities Increasingly bioethics along with its foundational values concepts

and principals has been exported to other countries not only in the developed West but also in developing and or Eastern countries Bioethics thus continues to undergo intriguing transformations as it is globalized and adapted to local cultures These processes have occurred rapidly in the last two decades with relatively little reflection and examination This volume brings together contributors from a wide variety of disciplines to take a critical empirical look at bioethics around the globe examining how it is being transformed at both local and global levels in this process of cross cultural exporting and importing One concern is to identify sociocultural forces and consequences which may positively or negatively affect ethics and social justice goals This book thereby offers the first comparative anthropology and sociology of globalizing bioethics in the field exploring the global dissemination local adaptations cultural meanings and social functions of bioethics theories practices and institutions and comparing developed and developing countries The volume considers a full range of countries on every inhabited continent including Africa Asia Australia Central and South America Europe the Middle East and North America Topics include government agendas such as nationalism and nation building agendas of powerful associated professions e g medicine law theological and political agendas such as culture wars agendas of entrepreneurial economies of profit and other cultural and ideological agendas consciously or unconsciously advanced or contested by bioethics work in particular countries based on their unique history politics and culture This cross cultural exploration of globalizing bioethics will be of great interest to a field that is increasingly introspective about its underlying sociocultural assumptions and biases At last an unabashedly sociological and anthropological look at the globalization of bioethics a really fresh approach to a maturing discipline The chapters speak from the perspective of sophisticated Western developed exporters of the bioethical paradigm and equally sophisticated Eastern developing and third world and interdisciplinary critics suspicious of the canonical view Trained in the dominant school of American mainstream philosophy Myser draws on her long standing commitment to a social and cultural approach to bioethics to take a fresh look at bioethics globally She grasps the globalization of bioethics and the skepticism about analytical philosophy s Americanized consensus The book sets the stage for a new era in bioethics theory and practice debating whether a universal common morality underlies the rich variation in national and cultural bioethics traditions Robert Veatch Georgetown University This path breaking volume is the first to explore the global export of Western bioethics to a variety of non Western settings Explicitly critical the book also points to the liberating potential of bioethics to achieve social justice and improve the lives of patients around the world The book is a must read for all medical anthropologists interested in bioethics Marcia Inhorn Yale University Bioethics Around the Globe should change the way bioethics is conceived and practiced in the U S and elsewhere Its rich and wide ranging comparative examination opens new possibilities for bioethical reflection I enthusiastically recommend this wonderful book James F Childress University of Virginia The past 40 years have seen a remarkable spread of bioethics to every part of the world Dr Myser s collection is a wonderful and rich exploration of its international impact revealing important similarities and differences from country to

country It will have an important impact Daniel Callahan The Hastings Center **The Congressional Globe** United States. Congress,1872 **The Spatial Reformation** Michael J. Sauter,2019-01-11 In The Spatial Reformation Michael J Sauter offers a sweeping history of the way Europeans conceived of three dimensional space including the relationship between Earth and the heavens between 1350 and 1850 He argues that this spatial reformation provoked a reorganization of knowledge in the West that was arguably as important as the religious Reformation Notably it had its own sacred text which proved as central and was as ubiquitously embraced Euclid s Elements Aside from the Bible no other work was so frequently reproduced in the early modern era According to Sauter its penetration and suffusion throughout European thought and experience call for a deliberate reconsideration not only of what constitutes the intellectual foundation of the early modern era but also of its temporal range The Spatial Reformation contends that space is a human construct that is it is a concept that arises from the human imagination and gets expressed physically in texts and material objects Sauter begins his examination by demonstrating how Euclidean geometry when it was applied fully to the cosmos estranged God from man enabling the breakthrough to heliocentrism and by extension the discovery of the New World Subsequent chapters provide detailed analyses of the construction of celestial and terrestrial globes Albrecht Dürer s engraving Melencolia the secularization of the natural history of the earth and man and Hobbes s rejection of Euclid s sense of space and its effect on his political theory Sauter s exploration culminates in the formation of a new anthropology in the eighteenth century that situated humanity in reference to spaces and places that human eyes had not actually seen The Spatial Reformation illustrates how these disparate advancements can be viewed as resulting expressly from early modernity s embrace of Euclidean geometry *The Da Vinci Globe* Stefaan Missinne,2019-01-17 A chance discovery at a distinguished London map fair in 2012 by a Belgian globe collector produced the most unique of finds a distinct globe with mysterious images such as old ships sailors a volcano a hybrid monster pentimenti waving patterns conic individualised mountains curving rivers vigorous coastal lines chiaroscuro and an unresolved triangular anagram which remains an enigma The globe is hand engraved in great detail on ostrich egg shells from Pavia by a left handed Renaissance genius of unquestionable quality It shows secret knowledge of the map world from the time of Columbus Cabral Amerigo Vespucci and Leonardo da Vinci Central and North America are covered by a vast ocean The da Vinci globe originates from Florence and dates from 1504 It marks the first time ever that the names of countries such as Brazil Germania Arabia and Judea have appeared on a globe A Leonardo drawing for this globe showing the coast of the New World and Africa has been discovered in the British Library This book brings the reader through a fabulous journey of scholars maps riddles rebuses iconographic symbols and enigmatic phrases such as HIC SVNT DRACONES to illuminate the da Vinci globe It details 500 years of mystery fine scholarship and expert forensic testing at numerous material science laboratories the world over The da Vinci globe now takes its rightful place surpassing the Lenox globe its copper cast identical twin as the most mysterious globe of our time As such this

monograph is an essential text in Leonardo studies and in the history of cartography The Congressional Globe J.C. Rives, 1856 Weekly Globe, 1842 **The geography of the globe** John Olding Butler, 1858 The Geography of the Globe John Olding Butler, 2025-08-21 Reprint of the original first published in 1858 The Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage *Genre Studies Around the Globe* Natasha Artemeva, 2016-03-13 *Genre Studies around the Globe Beyond the Three Traditions* exemplifies rich and vibrant international scholarship in the area of non literary genre studies in the early 21st century Based on the Genre 2012 conference held in Ottawa Canada the volume brings under one cover the three Anglophone traditions English for Specific Purposes the Sydney School Rhetorical Genre Studies and the approaches to genre studies developed in other national linguistic and cultural contexts Brazilian Chilean and European The volume contributors investigate a variety of genres ranging from written to spoken to multimodal and discuss issues central to the field of genre studies genre conceptualization in different traditions its theoretical underpinnings the goals of genre research and pedagogical implications of genre studies This collection is addressed to researchers teachers and students of genre who wish to familiarize themselves with current international developments in genre studies **The World's History: Western Europe** Hans Ferdinand Helmolt, 1907 *The History of Cartography, Volume 4* Matthew H. Edney, Mary Sponberg Pedley, 2020-05-15 Since its launch in 1987 the History of Cartography series has garnered critical acclaim and sparked a new generation of interdisciplinary scholarship Cartography in the European Enlightenment the highly anticipated fourth volume offers a comprehensive overview of the cartographic practices of Europeans Russians and the Ottomans both at home and in overseas territories from 1650 to 1800 The social and intellectual changes that swept Enlightenment Europe also transformed many of its mapmaking practices A new emphasis on geometric principles gave rise to improved tools for measuring and mapping the world even as large scale cartographic projects became possible under the aegis of powerful states Yet older mapping practices persisted Enlightenment cartography encompassed a wide variety of processes for making circulating and using maps of different types The volume's more than four hundred encyclopedic articles explore the era's mapping covering topics both detailed such as geodetic surveying thematic mapping and map collecting and broad such as women and cartography cartography and the economy and the art and design of maps Copious bibliographical references and nearly one thousand full color illustrations complement the detailed entries The Congressional globe, 1868 **Jurisprudence for an Interconnected Globe** Catherine Dauvergne, 2018-04-27 This title was first published in 2003 This book explores the interaction of globalization and the development of law The framework of the book is established by William Twining who asks how legal concepts can be generalised within a variety of legal orders This theme is taken up by a group of leading Australian scholars who produce essays on international economic law including financial regulation and human rights and citizenship migration and crime

under the headings Globalization and the Laws of Money Globalization and the Laws of People Globalization Cultures and Comparisons This collection marks an important step towards the construction of a jurisprudence for a connected but still culturally diverse globe     The World's History: Western Europe. The Atlantic ocean Hans Ferdinand Helmolt,1907 An English adaptation of Helmolt s Weltgeschichte with a rejection of sections which did not seem quite adequate from the point of view of its English readers C f Publisher s note     Infertility Around the Globe Marcia Claire Inhorn, Frank van Balen, 2002-05-30 These essays examine the global impact of infertility as a major reproductive health issue one that has profoundly affected the lives of countless women and men The contributors address a range of topics including how the deeply gendered nature of infertility sets the blame on women s shoulders     **Plotting the Globe** Avraham Ariel, Nora Ariel Berger, 2005-12-30 People use concepts such as time and date to structure their lives on a daily basis They often measure their travel by marking points arranged along great circles on the globe Yet most do not understand the origin and history of these terms and the stories of the intrepid adventurers scientists and seafarers who shaped our picture of the world today Ariel transports readers to faraway lands and ancient cultures that span more than 3500 years of exploration Phoenicians Spaniards Portuguese British French and many others star in an epic that stretches from Lapland to Cape Horn via Greenwich Paris the Andes and the Fortunate Islands This book is a collection of stories and myths about geography navigation and geodesy the science that deals with the Earth s figure and the interrelationship of selected points on its surface that reaches far beyond dry scientific texts to concentrate on the people behind the discoveries The knowledge and understanding of abstract notions such as the Prime Meridian the Equator and the International Date Line is conveyed through emphasis on the human spirit that motivated the pioneer scientists and sailors It is a tale littered with heroes and villains battles tragedies and international intrigue Readers will learn of a time when nothing was certain even the shape and size of the earth were the subjects of fierce competition conflict and politics
