A Companion to Astronomy and Astrophysics Kenneth R. Lang, 2007-01-15. Astronomy and Astrophysics is a comprehensive fundamental up to date reference book. It is filled with vital information and basic facts for amateur astronomers and professional astrophysicists and for anyone interested in the Universe from the Earth and other planets to the stars, galaxies and beyond. Although serious and thorough, the language and ideas will attract the general reader as well as students and professionals. Astronomy and Astrophysics consists of two main parts: a Timeline and a Dictionary. The Timeline is a concise history arranged chronologically which provides the complete story of cosmic discovery from early Chinese and Greek astronomy to the latest findings of modern astrophysics and robotic spacecraft. It provides a sense of destination and flow in our growing awareness of the Universe. Each entry in the unfolding narrative is written in a concise, light and friendly style that will be appreciated by all without being weighted down with incomprehensible specialized terms. The story of science is one of individuals as well as discoveries and ideas. So our Timeline includes the people who have made major scientific contributions that are related to astronomy and astrophysics. The Dictionary defines all terms and acronyms that deal with our celestial science from important concepts to individual objects and space missions. It is arranged alphabetically and complemented by numerous tables of fundamental data for bright cosmic objects including the celestial coordinates required to observe them. Line drawings are also used to forcefully compact a scientific insight with clear labels and captions. An exceptionally thorough Index cross-references concepts, discoveries and individuals in both the Timeline and Dictionary. The combined result is a unique comprehensive stand alone reference volume in which the reader can quickly locate information while also discovering new and unexpected knowledge.

Index to American Reference Books Annual, 1980-1984 Ruth Blackmore, 1984. 1970 issued in 2 vols. v 1 General reference, social sciences, history, economics, business. v 2 Fine arts, humanities, science and engineering.
