Goal Programming Model for Managing Interest-rate Risk in Banks and Thrifts G. Geoffrey Booth,Wolfgang Bessler,William G. Foote,1988 This paper develops and uses a multiperiod goal programming model to examine the normative effects of changing interest rates on the rearrangements of bank and thrift balance sheets and associated profits A two stage state preference framework allows a dynamic interpretation of the model s prescribed decisions as well as a natural incorporation of profit sensitivity to interest rate risk The model includes on and off the balance sheet decision variables Corporate Governance Optimisation Choirunnisa Arifa,Sardar Islam,2025-09-18 Corporate Governance Optimisation introduces an innovative approach to addressing some of the most pressing challenges in modern corporate governance Combining game theory mechanism design and hedge accounting this research monograph offers a comprehensive framework for resolving agency conflicts mitigating financial risks and improving organisational performance

At the heart of this book is an integrated model that unites governance risk management and hedge accounting demonstrating how these elements work together to address information asymmetry incentive misalignment and decision making complexities Grounded in rigorous research and real life data the book provides practical insights into how hedge accounting can stabilise financial outcomes support effective governance and enhance corporate value Designed for academics researchers and professionals in accounting finance and corporate governance this book bridges theory and practice offering a robust foundation for understanding and applying advanced governance models It is particularly valuable for those interested in how mathematical frameworks like game theory can be used to solve real world corporate challenges While rooted in financial optimisation the book s findings have broad implications for policy strategy and risk management in diverse organisational contexts

Success Management Ali Soofastaei,2020-12-18 Success management is a very exciting topic that can not only help us to achieve different interests but also provide us with a powerful tool to keep them as permanent benefits in life This book aims to help people who have decided to choose a better path in life and improve their quality of life in different aspects Those who despite the desire to progress need validated methods to save their time and money in order to achieve success and sustain it in life The presented principles in this book are based on scientific standards in a very simple language and with dozens of examples so that the reader can easily communicate with them This book presents a comprehensive executive program to guide the reader step by step from the current situation to the desired situation This practical program is not limited to a specific time and place and successful people throughout history and across the world have used it consciously or unconsciously The numerous actual examples presented in the book show the practical power of the principles and rules that have been addressed in various chapters In short this book gives you all the tools you need to design and build an ideal life Approved tools with which no excuses for failure have been accepted

Advances on Mathematical Modeling and Optimization with Its Applications Gunjan Mukherjee,Biswadip Basu Mallik,Rahul Kar,Aryan Chaudhary,2024-03-28 Advances on Mathematical Modeling and Optimization with Its Applications discusses optimization equality and inequality constraints and their application in the versatile optimizing domain It further covers non linear optimization methods such as global optimization and gradient based non linear optimization and their applications Discusses important topics including multi component differential equations geometric partial differential equations and computational neural systems Covers linear integer programming and network design problems along with an application of the mixed integer problems Discusses constrained and unconstrained optimization equality and inequality constraints and their application in the versatile optimizing domain Elucidates the application of statistical models probability models and transfer learning concepts Showcases the importance of multi attribute decision modeling in the domain of image processing and soft computing The text is primarily for senior undergraduate and graduate students and academic researchers in the fields of mathematics statistics and computer science
