Ecological Thinking A New Approach To Educational Change:

Ecological Thinking Shoshanah Keni, 2002 In *Ecological Thinking* Shoshana Keiny relates the arguments of this book to the new ecological paradigm based on open instead of closed systems which see humans not as outsiders but as part of the system Keiny uses the term ecological thinking as a holistic framework for thinking about ways in which teachers need to be engaged in participatory interactive learning processes which seek to generate new understanding and knowledge that changes their professional context Ecological Thinking is based on several projects in which teacher educators researchers parents and or other members of the community collaborated in order to jointly transform education Written as a personal narrative Keiny illustrates an Action Research process that emphasizes the interplay between praxis and theory **The SAGE Handbook of Educational Action Research** Susan E Noffke, Bridget Somekh, 2009-05-07 This handbook presents and critiques predominant and emergent traditions of Educational Action Research internationally Now a prominent methodology Educational Action Research is well suited to exploring developing and sustaining change processes both in classrooms and whole organisations such as schools Departments of Education and many segments of universities The handbook contains theoretical and practical based chapters by highly respected scholars whose work has been seminal in building knowledge and expertise in the field It also contains chapters exemplifying the work of prominent practitioner and community groups working outside universities The Editors provide an introduction and conclusion as well as an opening chapter which charts the historical development of action research and provides an analysis of its underlying theories The handbook is organized into four sections each beginning with a short introduction Action research methodology diversity of rationales and practices Professional Knowledge production staff development and the status of educators Personal Self awareness development and identity Political Popular knowledge difference and frameworks for change This is a key resource for scholars and graduate students at doctors and masters levels as well as school leaders and administrators Susan Noffke is Associate Professor of Curriculum Instruction at the University of Illinois Urbana Champaign and co editor with R B Stevenson of *Educational Action Research* Teachers College Press 1995 She taught at the primary school level for a decade and has led masters and doctoral level courses in action research for the past 20 years She continues to work with many collaborative projects with schools and school districts Bridget Somekh is Professor of Educational Research at Manchester Metropolitan University UK She is a founder editor of the *Educational Action Research* journal and has been a co ordinator of the Collaborative Action Research Network CARN for many years She is co editor of *Research Methods in the Social Sciences* SAGE 2005 and author of *Action Research a Methodology for Change and Development* Open University Press 2006 *The SAGE Handbook of Educational Action Research* Bridget Somekh, 2009-05-19 There has been a huge growth of interest in action research in educational settings over the past 20 years across the Americas Europe Australia and Africa this Handbook provides a scholarly reference text that will inform the development of the field *Environmental Education and Advocacy*

Edward A. Johnson, Michael J. Mappin, 2005-03-03 Environmental education has often blurred the distinction between ecological science and environmental advocacy Growing public awareness of environmental problems and desire for action may be contributing to this blurring There is a need to clarify the distinction between the role of ecological science and the role of social and political values for the environment within environmental education This book addresses this need by examining the changing perspectives of ecology in education and the changing perspectives of education in environmental education Guidelines are provided for assessing the science and education perspectives within environmental education along with suggested frameworks for development of programs and resources that integrate current science education and action This book will be of interest to environmental educators ecologists interested in environmental education and curriculum and resource developers

Visualising Powerful Knowledge to Develop the Expert Student Ian M. Kinchin, 2016-07-27 This book puts the structure and function of knowledge firmly in the driving seat of university curriculum development and teaching practice Through the application of concept mapping the structure of knowledge can be visualised to offer an explicit perspective on key issues such as curriculum design student learning and assessment feedback Structural visualisation allows a greater scrutiny of the qualitative characteristics of knowledge so that we can analyse students patterns of learning and match them to expert practice Based on nearly two decades of research and direct observations of university teaching by the author this book aims to offer a scholarly account of teacher development It focusses on elements that will be of immediate utility to academics who want to develop their teaching to a level of adaptive experts offering them greater autonomy in their role and a powerful understanding of teaching to escape the repressive routines of the traditional classroom Rather than providing a comprehensive review of educational research this book provides a route through selected theories that can be explored in practice by university teachers on their own or in groups The book will help academics to identify the nature of powerful knowledge within their disciplines and consider ways that this may be used by students to become active and engaged learners through the manipulation and transformation of knowledge and so become expert students

Style Differences in Cognition, Learning, and Management Stephen Rayner, Eva Cools, 2012-12-06 This book aims to mark fifteen years of contributions to the field of style research in cognition and learning presented at the annual conference of the European Learning Styles Information Network The style field is a multidisciplinary global community made up of researchers in several domains of knowledge including education psychology business computer science information systems management human resources and other related fields The book will be relevant for readers who are interested in differences in thinking and learning covering a wide range of style related themes with appeal to readers seeking an international and interdisciplinary perspective Interested practitioners will include professionals working in the

areas of HR Management Organizational Learning Business Management and all phases of Education The application of style differences for example impacts widely upon work and human performance in areas of policy making team management and project development sports social agency and medicine New or alternative research paradigms facilitating revision and consensus in the field of style differences are presented The aim of integrating research and practice is developed to achieve consensual theory for style differences in human performance Style Differences in Performance is a timely and field defining volume that will change the way academics and practitioners across international and disciplinary boundaries think and talk about the field of learning style and its implications for human achievement **How to Mend a University** Ian M.

Kinchin, 2024-04-18 Many contemporary commentators present a damning account of the current state of higher education to the extent that our universities may be considered to be broken This book offers an alternative perspective to the dominant neoliberal discourse and provides the conceptual tools to help construct a trajectory of repair for our universities These ideas are presented within this book as five moves to transform our current pathological situation and develop towards a more healthy and sustainable ecological learning environment In this book Ian Kinchin draws upon a wide range of sources from the philosophy of education biological and clinical sciences as well as educational research and academic development This alternative ecology of ideas presents a challenge to university leaders and asks if we care enough about the future of our universities to encourage an evolution of practice that deals sustainably with the wicked problems our universities face in the coming century It describes a move towards an ecological university The book includes a foreword written by Martyn Kingsbury Professor of Higher Education and Director of the Centre for Higher Education Research and Scholarship Imperial College London UK
