**Ecology and Religion in History** David Spring, Eileen Spring, 1974      Ecology and Religion John Grim, Mary Evelyn Tucker, 2014-01-02 From the Psalms in the Bible to the sacred rivers in Hinduism the natural world has been integral to the world's religions John Grim and Mary Evelyn Tucker contend that today's growing environmental challenges make the relationship ever more vital This primer explores the history of religious traditions and the environment illustrating how religious teachings and practices both promoted and at times subverted sustainability Subsequent chapters examine the emergence of religious ecology as views of nature changed in religious traditions and the ecological sciences Yet the authors argue that religion and ecology are not the province of institutions or disciplines alone They describe four fundamental aspects of religious life orienting grounding nurturing and transforming Readers then see how these phenomena are experienced in a Native American religion Orthodox Christianity Confucianism and Hinduism Ultimately Grim and Tucker argue that the engagement of religious communities is necessary if humanity is to sustain itself and the planet Students of environmental ethics theology and ecology world religions and environmental studies will receive a solid grounding in the burgeoning field of religious ecology      Inherited Land Whitney A. Bauman, Richard R. Bohannon, Kevin J.

O'Brien, 2011-08-04 Religion and ecology has arrived What was once a niche interest for a few academics concerned with environmental issues and a few environmentalists interested in religion has become an established academic field with classic texts graduate programs regular meetings at academic conferences and growing interest from other academics and the mass media Theologians ethicists sociologists and other scholars are engaged in a broad dialogue about the ways religious studies can help understand and address environmental problems including the sorts of methodological terminological and substantive debates that characterize any academic discourse This book recognizes the field that has taken shape reflects on the ways it is changing and anticipates its development in the future The essays offer analyses and reflections from emerging scholars of religion and ecology each addressing her or his own specialty in light of two questions 1 What have we inherited from the work that has come before us and 2 What inquiries concerns and conversation partners should be central to the next generation of scholarship The aim of this volume is not to lay out a single and clear path forward for the field Rather the authors critically reflect on the field from within outline some of the major issues we face in the academy and offer perspectives that will nurture continued dialogue      **Ecology and Religion** David R. Gottlieb, 2006-11-09 The last two decades have seen the emergence of a new field of academic study that examines the interaction between religion and ecology Theologians from every religious tradition have confronted world religions past attitudes towards nature and acknowledged their own faiths complicity in the environmental crisis Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition profound criticisms of the past and ecologically oriented visions of God the Sacred the Earth and human beings The proposed handbook will serve as the definitive overview of these exciting new developments Divided into three main sections the books essays will reflect the three dominant dimensions of the field Part one will explore traditional religious concepts of and attitudes towards nature and how these have been changed by the environmental crisis Part II looks at larger conceptual issues that transcend individual traditions Part III will examine religious participation in environmental politics      **Deep Ecology and World Religions** David Landis Barnhill, Roger S. **Ecology and religion in history** David Spring, Eileen Spring, 1978 **Religion and Ecology** Whitney A. Bauman, 2014-04-29 Moving beyond identity politics while continuing to respect diverse entities and concerns Whitney A Bauman builds a planetary politics that better responds to the realities of a pluralistic world Calling attention to the historical political and ecological influences shaping our understanding of nature religion humanity and identity Bauman collapses the boundaries separating male from female biology from machine human from more than human and religion from science encouraging readers to embrace hybridity and the inherent fluctuations of an open evolving global community As he outlines his planetary ethic Bauman concurrently develops an environmental ethic of movement that relies not on place but on the daily connections we make across the planet He shows how both identity politics and environmental ethics fail to realize planetary politics and action limited as they are by foundational modes of thought that create entire worlds out of their own logic Introducing a postfoundational vision not rooted in the formal principles of nature or God and not based in the idea of human exceptionalism Bauman draws on cutting edge insights from queer poststructural and deconstructive theory and makes a major contribution to the study of religion science politics and ecology
