NBER Macroeconomics Annual 1999 Ben S. Bernanke, Julio Rotemberg, 2000 The goals of the annual NBER Macroeconomics Conference are to present extend and apply frontier work in macroeconomics and to stimulate work by macroeconomists in policy issues Each paper in the Annual is followed by comments and discussion The goals of the annual NBER Macroeconomics Conference are to present extend and apply frontier work in macroeconomics and to stimulate work by macroeconomists in policy issues Each paper in the Annual is followed by comments and discussion **IMF**

Macroeconomic Research on Low-Income Countries International Monetary Fund, 2004-01-30 Summarizes the forward looking analytical work program on macroeconomic issues related to the Poverty Reduction Strategy Paper approach The program is evolving through a process that began with a technical workshop participants from low income countries donors academia and civil society drafted guidance on selected issues and identified priority research topics Partners policymakers and economic scholars are encouraged to share their perspectives and findings through respective team leaders whose e mail addresses are provided The publication also summarizes IMF analytical work and contains a bibliography of nearly 1 000 papers The IMF Approach to Economic Stabilization Mr. Michael Mussa, Mr. Miguel A. Savastano, 1999-07-01 This paper explains the IMF approach to economic stabilization It argues that a Fund supported program is a process comprising six broadly defined phases that evolves along a multiplicity of potential pathways The paper discusses the three pronged approach to stabilization at the core of all IMF supported programs stresses the iterative character of financial programming and explains the rationale for setting quantitative performance criteria for fiscal and monetary policy in IMF supported arrangements A main theme is that IMF supported programs contain a great deal of flexibility to respond both to differences in circumstances and to changes in conditions in individual cases **Adjustment and Poverty** Frances Stewart, 2005-08-04 The last decade has brought sharp adjustments and rising poverty to much of the developing world The experiences of Africa and Latin America are contrasted with areas which were able to combine adjustment with protecting the poor IMF Staff papers, Volume 43 No. 3 International Monetary Fund. Research Dept., 1996-01-01 This paper examines the volatility and predictability of emerging stock markets A range of measures suggests that despite perceptions to the contrary the volatility of emerging markets may have fallen rather than risen on average Also although the autocorrelations in emerging market returns appear to turn negative at horizons of a year or more the magnitude of these return reversals is not that much larger than reversals in some mature markets One interpretation of the results would be that emerging markets have not consistently been subject to fads or bubbles or at least no more so than in some industrial countries **The Oxfam Poverty Report** Kevin Watkins, 1995 Fifty years ago the United Nations Charter proclaimed universal rights to shared prosperity peace and security How far has that vision of world citizenship been realised Despite advances in human welfare and

technology there is today a growing polarisation between rich and poor One in four of the world's people live in absolute poverty unable to meet their basic needs armed conflict is affecting millions of people and the global environment is under threat Yet there is a failure of political will to address the silent emergency of poverty The Oxfam Poverty Report draws on Oxfam's experience of working in over 70 countries to examine the causes of poverty and conflict It identifies the structural forces which deny people their basic rights and gives a wide range of examples of the ways in which men and women are bringing about positive change at every level from the household to the international arena Oxfam believes that it is time to renew the UN vision of universal basic rights The Report concludes by proposing policy and institutional reforms which would transform international institutions and trading relations and calls for a new commitment to work together to eradicate poverty and bring sustainable peace and security for all the world's people

Research Activities of the IMF, January 1991-December 1999 International Monetary Fund, 2000-01-01 Research activity in the IMF emphasizes the links between the organization's policy and operational concerns The main objectives of research is IMF staff understanding of policy and operational issues relevant to the institution and to improve the analytical quality of the work prepared for management and the Executive Board and the advice provided to member countries The scope of research in the IMF is defined by the purposes and functions of the institution In order to foster innovation and ensure quality control the IMF makes much of its research available outside the institution and encourages staff to interact with academia and other research organizations through conferences seminars and occasional joint research projects The visiting scholar's program has also enhanced the quality of research done in the IMF This program brings in leading members of the economics profession from around the world to assist in the preparation of papers for the Executive Board and to conduct research on IMF related issues

Economic Adjustment and Reform in Low-Income Countries (ESAF Review Background Papers) Hugh Bredenkamp, Susan Schadler, 1999-06-30 The Enhanced Structural Adjustment Facility ESAF is the centerpiece of the International Monetary Fund's strategy to provide assistance on concessional terms to low income member countries that are undertaking important macroeconomic adjustment and structural reforms By February 1999 a total of SDR 7 billion about US 9 billion had been distributed under 79 ESAF arrangements to 51 developing countries Edited by Hugh Bredenkamp and Susan Schadler this volume features internal IMF staff assessments of the ESAF and provides an historical account of policies implemented and outcomes achieved under ESAF supported programs

The Economic Impact of IMF-Supported Programs in Low-Income Countries Yasemin Bal-Gunduz, Mr. Christian Ebeke, Ms. Burcu Hacibedel, Ms. Linda Kaltani, Ms. Vera V Kehayova, Mr. Chris Lane, Mr. Christian Mumssen, Miss Nkunde Mwase, Mr. Joseph Thornton, 2013-10-04 This paper aims to assess the economic impact of the IMF's support through its facilities for low income countries It relies on two complementary econometric analyses the first investigates the longer term impact of IMF engagement primarily through successive medium term programs under the Extended Credit Facility and its predecessors and more recently the Policy

Support Instrument on economic growth and a range of other indicators and socioeconomic outcomes the second focuses on the role of IMF shock related financing through augmentations of Extended Credit Facility arrangements and short term and emergency financing instruments on short term macroeconomic performance IMF Programmes in Developing Countries Tony Killick,2003-09-02 The International Monetary Fund is the centre of a global financial system that encourages budgetary discipline and full integration into world trade to facilitate development and alleviate poverty Yet this policy conditionality of the IMF is highly controversial Critics state that fifty years of IMF existence has been fifty years too long and that its doctrinaire policy must change or Fund programmes will have only limited ability to achieve their objectives This book examines the arguments tracing the extent of Fund adaptation presenting major new evidence on the consequences of Fund programmes and considering its future role Handbook of Research on Social and Economic Development in the European Union Bayar, Yilmaz,2019-11-29 The EU has experienced serious economic and political crises such as the sovereign debt crisis and Brexit in the past few years However despite these issues the EU has implemented considerable institutional fiscal and collective improvements during the unification process to continue as a significant actor in the global economy The Handbook of Research on Social and Economic Development in the European Union provides a multidisciplinary evaluation of the institutional economic and social development of the European Union and makes inferences for the future dynamics and collaborations of the EU the global economy and other countries Featuring coverage on a broad range of topics such as energy security gender discrimination and global economics this book is ideally designed for government officials policymakers world leaders politicians diplomats international relations officers economists business professionals historians market analysts academicians researchers and students concerned about the multifaceted integration processes surrounding the EU **1994 World Economic & Financial Surveys; Official Financing for Dev. Countries** International Monetary Fund,1994-01-01 This paper focuses mainly on official bilateral and multilateral financing for countries that have rescheduled their debts to official bilateral creditors In contrast to the approaches taken by private lenders official creditors have continued to provide new financing on a large scale to countries with debt servicing difficulties that implement adjustment and reform programs Financial support has been provided through a wide variety of instruments and channels For the low income rescheduling countries as a group total financial assistance has been about as large as these countries own export earnings in every year since 1986 The recent trends in official financing have important ramifications for developing countries Access to external financing from official sources is likely to remain high for those countries whose adjustment and reform efforts provide assurances that resources will be used efficiently Conversely countries with uneven records of policy implementation particularly as regards payments arrears are likely to find difficulty in attracting financial support Effects of Macroeconomic Stability on Growth, Savings, and Investment in Sub-Saharan Africa Mr.Dhaneshwar Ghura,Mr.Michael T. Hadjimichael,Mr.Martin Mühleisen,Mr.Roger Nord,E. Murat Ucer,1994-08-01

The analysis of this paper indicates that the unsatisfactory overall economic performance of sub Saharan African countries during 1986-93 was due to inappropriate policies pursued by a number of countries. The countries that have pursued broadly appropriate adjustment policies have performed much better, achieving positive per capita GDP growth. The analysis is supported with an econometric investigation of the effects of macroeconomic policies, structural reforms, and exogenous factors on economic performance. The results indicate that progress in achieving macroeconomic stability and implementing structural reforms have been conducive to better growth, savings, and private investment.

Strengthening the Effectiveness of Aid, 1995-01-01. Annotation: The World Bank and international donor agencies invest substantial resources and effort in development. A continuing challenge is to ensure that assistance is provided and used as effectively as possible. This book surveys recent findings on the effectiveness of aid and the steps the Bank and other development institutions are taking to assess and improve their operations. It examines specific methods for achieving better coordination within programs and among donors and brings together recommendations on how countries and agencies can improve the administration of aid. The study concludes that five conditions are essential for aid to be effective: Ownership by the government and participation by the affected people; Strong administrative and institutional capacity; Sound policies and good public sector management; Close coordination by donors; Improvements in aid agencies' own business practices.

Adjustment in Africa. World Bank, 1994. This is the second title in the World Bank Policy Research Reports. The first was the headline making The East Asian Miracle discusses the economic situation in Africa as it has evolved over the past several decades. To reverse the economic decline that began in the 1970s, many sub-Saharan African countries have undertaken efforts to restructure their economies. This has included liberalizing trade, deregulating markets and prices, privatizing public enterprises, and strengthening management of the financial and public sectors. Implementation has been uneven in different countries, and even those countries that have attempted major reforms have not achieved policies that are considered sound by international standards. A key finding is that improving policies paid off in higher GDR and sectoral growth rates, which are vital to reducing poverty, but in countries where policies deteriorated, economic performance worsened. The report also shows that despite the importance of reforming economic policies, countries need to invest more in human capital and infrastructure, expand their institutional capacity, and develop better governance.

IMF Conditionality. Mr. James John, Mr. Adam Bennett, Ms. María Vicenta Carkovic S., Mr. Louis Dicks-Mireaux, Mr. Mauro Mecagni, Mr. Miguel A. Savastano, Ms. Susan Schadler, 1995-09-26. This paper is Part I of a two-volume study conducted as a part of the IMF's ongoing process of evaluating its lending facilities. It focuses on IMF-supported programs and macroeconomic performance during 1988-92, reflecting information available through the end of 1993. Part I provides an overview of the experiences during the arrangements reviewed; it describes the initial conditions faced in these countries, the adjustment strategies adopted, the degree to which programs were implemented, and the extent of sustained adjustment experienced.

Government Budgeting and Expenditure Management

Salvatore Schiavo-Campo, 2017-02-17 The government budget should be the financial mirror of society's choices. Yet most people view budgeting as the epitome of eye-glazing subjects rarely explained in a way that is understandable to the non-specialist and too often presented without adequate consideration of a country's governance and institutional capacity. *Government Budgeting and Expenditure Management* fills a gap in the literature to redress these failings and does so in comparative international perspective. This book provides a comprehensive but pithy and easy to understand treatment of public financial management taking into account a variety of special issues including budgeting in post-conflict situations at subnational government levels for military security expenditures and in countries with large extractive revenues. Distilling the lessons of budgeting reform in countries at different levels of income and administrative capacity, each chapter gradually progresses from the basic principles to the more technical aspects and then on to implementation issues using concrete examples and illustrations from around the globe. *Government Budgeting and Expenditure Management* is ideally suited as the primary text for advanced undergraduate or graduate courses in government budgeting or public financial management or as a supplementary text for courses in public finance, public economics, economic development, public administration or comparative politics. With its attention to practical implementation aspects, the book will also be of direct interest to practitioners, policy makers and government employee training organizations. The IMF and its Critics David

Vines, Christopher L. Gilbert, 2004-02-26 The IMF is the first economic institution in line to protect countries from the effects of financial crises and to insulate the world economy from possible systemic risk. However, many argue that the IMF is insufficiently equipped to do this job while others argue almost the opposite: the IMF's well-intentioned actions induce other countries to take risks which increase their exposure from both universities and the multilateral agencies. Combines rigorous economic analysis with insider perspectives on key policy debates. It analyses the Asian and Argentine financial crises of the late 1990s, issues of policy ownership, the more general quest for financial stability and governance of the IMF. It is an essential reference for anyone interested in the role of international financial institutions in our globalised economy.

Development Economics and Policy David Sapsford, John-ren Chen, 1998-08-10 Hans Singer is undoubtedly one of if not the world's major scholars in the field of Development Economics. Over the last six decades he has made numerous contributions to the subject both as scholar and practitioner. This book contains 27 essays that were prepared for a conference that was held in Innsbruck, Austria, in May 1996 to celebrate his 85th birthday and represents a major and important overview of issues in development economics from the most eminent scholars in the field. **Foreign Aid and Development** Finn Tarp, Peter Hjertholm, 2000 Aid has worked in the past but can be made to work better in the future. This book offers important new research and will appeal to those working in economics, politics and development studies as well as to governmental and aid professionals.
