Economic Change And Political Liberalization In Sub Saharan Africa:

Economic Change and Political Liberalization in Sub-Saharan Africa Jennifer A. Widner, 1994 Aims to establish the nature of the relationship between the economic challenges of the 1980s and the steps toward greater political openness taken by governments at the end of that decade *Democratic Experiments in Africa* Michael Bratton, Nicolas Van de Walle, 1997-08-13 Appendix The Data Set *Political Opposition and Democracy in Sub-Saharan Africa* Elliott Green, Johanna Söderström, Emil Uddhammar, 2016-04-08 This book takes a closer look at the role and meaning of political opposition for the development of democracy across sub Saharan Africa Why is room for political opposition in most cases so severely limited Under what circumstances has the political opposition been able to establish itself in a legitimate role in African politics To answer these questions this edited volume focuses on the institutional settings the nature and dynamics within and between political parties and the relationship between the citizens and political parties It is found that regional devolution and federalist structures enable political opposition to organize and gain local power as a supplement to influence at the central level Generally however opposition parties are lacking in organization and institutionalization as well as in their ability to find support in civil society and promote the issues that voters find most important Overall strong executive powers unchecked by democratic institutions in combination with deferential values and fear of conflict undermine legitimate opposition activity This book was originally published as a special issue of Democratization **The Fate of Africa's**

Democratic Experiments Leonardo A. Villalón, Peter VonDoepp, 2005-09 Does democracy have a future in Africa

Economic Liberalization and Authoritarianism Christian Neugebauer, 2021-11-29 Contrary to other world regions political regimes in the Middle East and North Africa MENA remain largely authoritarian While the search for explanations is still ongoing Christian Neugebauer draws attention to a hitherto underresearched factor economic liberalization Being part of a global shift from state led development towards structural adjustment in the economy these policies also deeply affected the countries of the MENA region This makes the resilience of authoritarianism in the region all the more puzzling as a large part of the scientific community expected economic liberalization to undermine authoritarian regimes Neugebauer strives to solve the puzzle with a comparative case study that covers four countries Egypt Tunisia Jordan and Morocco and their political regimes from independence in the 1950s to the Arab Spring in 2011 He shows that two specific policies of economic liberalization might in fact have been relevant for regime stability consumer price liberalization and privatization **African Economies and the Politics of Permanent Crisis, 1979-1999** Nicolas Van de Walle, 2001-09-24 This 2001 book explains why African countries have remained mired in a disastrous economic crisis since the late 1970s It shows that dynamics internal to African state structures largely explain this failure to overcome economic difficulties rather than external pressures on these same structures as is often argued Far from being prevented from undertaking reforms by societal interest and pressure groups clientelism within the state elite ideological factors and low state capacity have resulted in

some limited reform but much prevarication and manipulation of the reform process by governments which do not really believe that reform will be effective which often oppose reforms because they would undercut the patronage and rent seeking practices which undergird political authority and which lack the administrative and technical capacity to implement much reform Over time state decay has increased

Aid and Reform in Africa Shantayanan Devarajan, David Dollar, Torgny Holmgren, 2001-01-01 Finally when the country enters the second generation of reforms such as public sector institutional reform short term conditionality based aid can once again be harmful by reducing ownership participation and sustainability of the reform process

Global Geopolitical Power and African Political and Economic Institutions John James Quinn, 2015-12-30 Global Geopolitical Power and African Political and Economic Institutions When Elephants Fight describes the emergence and nature of the prevailing African political and economic institutions in two periods In the first most countries adopted political and economic institutions that funneled significant levels of political and economic power to the political elites usually through one or no party military political systems inward oriented development policies and or state led and often state owned industrialization In the second period most countries adopted institutions that diluted the overarching political and economic power of ruling elites through the adoption of de jure multiparty electoral

systems more outward oriented trade policies and the privatization of many state owned or controlled sectors though significant political and economic power remains in their hands The choices made in each period were consistent with prevailing ideas on governance and development the self interests of political elites and the perceived availability of support or autonomy vis vis domestic regional and international sources of power at the time This book illustrates how these two region wide shifts in prevailing political and economic institutions and practices of Africa can be linked to two prior global geopolitical realignments the end of WWII with the ensuing American and Soviet led bipolar system and the end of the Cold War with American primacy Each period featured changed or newly empowered international and regional leaders with competing national priorities within new intellectual and geopolitical climates altering the opportunities and constraints for African leaders in instituting or maintaining particular political and economic institutions or practices The economic and political institutions of Africa that emerged did so as a result of a complex mix of contending domestic regional and international forces material and intellectual all which were themselves greatly transformed in the wake of these two global geopolitical realignments

Corruption and the Global Economy Kimberly Ann Elliott,1997 The recently adopted OECD convention outlawing bribery of foreign public officials is welcome evidence of how much progress has been made in the battle against corruption The financial crisis in East Asia is an indication of how much remains to be done Corruption is by no means a new issue but it has only recently emerged as a global issue With the end of the Cold War the pace and breadth of the trends toward democratization and international economic integration accelerated and expanded globally Yet corruption could slow or even reverse these trends potentially threatening economic development and political stability in some countries As the global implications of corruption have grown so has the impetus for international action to combat it In addition to efforts in the OECD the Organization of American States the World Trade Organization and the United Nations General Assembly the World Bank and the International Monetary Fund have both begun to emphasize corruption as an impediment to economic development This book includes a chapter by the Chairman of the OECD Working Group on Bribery discussing the evolution of the OECD convention and what is needed to make it effective Other chapters address the causes and consequences of corruption including the impact on investment and growth and the role of multinational corporations in discouraging bribery The final chapter summarizes and also discusses some of the other anticorruption initiatives that either have been or should be adopted by governments multilateral development banks and other international organizations

Turning Points in African Democracy Abdul Raufu Mustapha, Lindsay Whitfield, 2009. A team of scholars examine the radical political changes that have taken place since 1990 in eleven key countries in Africa. Radical changes have taken place in Africa since 1990. What are the realities of these changes? What significant differences have emerged between African countries? What is the future for democracy in the continent? The editors have chosen eleven key countries to provide enlightening comparisons and contrasts to stimulate discussion among students. They have brought together a team of scholars who are actively working in the changing Africa of today. Each chapter is structured around a framing event which defines the experience of democratisation. The editors have provided an overview of the turning points in African politics. They engage with debates on how to study and evaluate democracy in Africa such as the limits of elections. They identify four major themes with which to examine similarities and divergences as well as to explain change and continuity in what happened in the past. Abdul Raufu Mustapha is University Lecturer in African Politics at Queen Elizabeth House and Kirk Greene Fellow at St Antony's College, University of Oxford. Lindsay Whitfield is a Research Fellow at the Danish Institute of International Studies, Copenhagen.

Development and Diffusionism J. Dibia, 2015-12-04. This book deconstructs the neopatrimonial paradigm that has dominated analysis of Nigerian and African development. It shows that by denying agency to Nigerian societies and devaluing indigenous culture and local realities, Eurocentric diffusionism played a significant role in the failure of development planning.

Silent Violence Vinay R. Kamat, 2013-12-05. *Silent Violence* engages the harsh reality of malaria and its effects on marginalized communities in Tanzania. Vinay R. Kamat presents an ethnographic analysis of the shifting global discourses and practices surrounding malaria control and their impact on the people of Tanzania, especially mothers of children sickened by malaria. Malaria control, according to Kamat, has become increasingly medicalized, a trend that overemphasizes biomedical and pharmaceutical interventions while neglecting the social, political and economic conditions he maintains are central to Africa's malaria problem. Kamat offers recent findings on global health governance, neoliberal economic and health policies and their impact on local communities. Seeking to link wider social, economic and political forces to local experiences of sickness and suffering, Kamat analyzes the lived experiences and practices of people most seriously affected by malaria: infants and children. The persistence of childhood malaria is a form of structural violence, he contends, and the resultant social suffering in poor communities is closely tied to social inequalities. *Silent Violence* illustrates the evolving nature of local responses to the global discourse on malaria control. It advocates for the close study of disease treatment in poor communities as an integral component of global health funding. This ethnography combines a

decade of fieldwork with critical review and a rare anthropological perspective on the limitations of the bureaucratic technological institutional medical and political practices that currently determine malaria interventions in Africa
