Departures from Post-colonial Authoritarianism Elke Grawert, 2009. This study sends the reader on an exciting journey into social and political life in Africa. It gives space to the voices of Tanzanian villagers, rural associations, branches of political parties, and local government officers and their views of socio-economic and political change during the 1990s. This authentic picture is combined with a thorough sociological and political economy analysis showing the dynamics in the relations between state components and social forces in the context of neo-liberal globalization. The book is not only attractive as a country case study. It contains a deep analysis of the paradigmatic shift of African political systems from post-colonial rule to governance in response to neo-liberalism and provides new insights in processes of political transformation.

Community Economic Development Eric Shragge, Michael Toye, 2006. Communities have long been ahead of governments in responding to changes in the economy, forging ahead with innovative grassroots projects that now make up a substantial portion of economic development initiatives. Having made major gains in practice and having built local capacities through innovation, Community Economic Development now stands at a crossroads. In *Building for Social Change*, Eric Shragge, Michael Toye, and colleagues from across the country offer a timely critical examination of CED practices and debates. This book is designed for CED practitioners, for others working in community-based organizations, and those being trained. There are a growing number of post-secondary programs in English Canada that educate students in CED and related fields such as regional development, yet there are not many publications that provide analytical perspectives and debate. The goal of this book is to describe and analyze CED practice primarily in Canada through a wide range of subjects: the evolution of its definitions, economic dimensions, and the key elements that form its context. *Building for Social Change* situates CED in wide political, economic, and social contexts, rich examples of the scope and practices, and some of the limits in Aboriginal communities as a tool to support women, psychiatric survivors, enterprises, housing, and worker ownerships are explored to help spur further critical discussion and debate.

It reviews the primary tools of economic thinking and covers the major themes that appear in the popular media.
