Economic Insights 2 101 Sites For Year 1:

Australian National Bibliography ,1998-02 *Education and the Knowledge-Based Economy in Europe* ,2008-01-01

This book addresses the recent impact of the knowledge based economy as an economic imaginary and as a set of real economic developments on education and especially higher education in Europe including educational strategies and policies such as those of the Bologna process on a European scale The contributors come from various disciplinary backgrounds education history linguistics sociology but share a commitment to trans disciplinary research and a view that changes in educational policy and practice can productively be researched with a focus on discourse The papers in this collection apply a range of approaches to discourse analysis as well as narrative policy analysis and several contributors use a cultural political economy perspective which incorporates a version of critical discourse analysis The book will be of interest to researchers post graduate students and advanced undergraduate students in several subject areas including education discourse studies and political economy

The Knowledge Economy and Lifelong Learning D.W. Livingstone,David Guile,2012-09-07 This book presents some of the most trenchant critical analyses of the widespread claims for the recent emergence of a knowledge economy and the attendant need for greater lifelong learning The book contains two sections first general critiques of the limits of current notions of a knowledge economy and required adult learning in terms of historical comparisons socio political construction and current empirical evidence secondly specific challenges to presumed relations between work requirements and learning through case studies in diverse current workplaces that document richer learning processes than knowledge economy advocates intimate Many of the leading authors in the field are represented There are no other books to date that both critically assess the limits of the notion of the knowledge economy and examine closely the relation of workplace restructuring to lifelong learning beyond the confines of formal higher education and related educational policies This reader provides a distinctive overview for future studies of relations between work and learning in contemporary societies beyond caricatures of the knowledge economy The book should be of interest to students following undergraduate or postgraduate courses in most social sciences and education business and labour studies departments as well as to policy makers and the general public concerned about economic change and lifelong learning issues D W
