This handbook is the product of the experience of Oxfam UK and Ireland in its work in over 70 countries around the world It offers an expression of Oxfam s fundamental principles that all the people have the right to an equitable share in the world s resources and the right to make decisions about their own development The denial of such rights is at the heart of poverty and suffering This reference work analyses policy procedure and practice in such fields as health human rights emergency relief capacity building and agricultural production      **The Economic Status of the Aged** Peter O. Steiner, 2023-11-15 The

economic status of the aged is a pressing issue that has emerged as a side effect of social progress Advances in medicine public health and urbanization have led to an increase in life expectancy with more individuals living to the age of 65 and beyond However this progress has created new challenges such as the lack of opportunities for older workers in a highly mechanized economy and the difficulties faced by retired individuals in urban settings These challenges have contributed to a new form of poverty among the elderly despite overall societal wealth In 1955 approximately 14 million people were aged 65 or older marking the rise of a significant social class with unique needs and demands A national survey conducted in 1952 by the Bureau of the Census sought to gather specific information about the economic status of this group focusing on factors like income expenses and financial resources This study based on interviews with 3 600 men and women aged 65 and over was designed to better understand the economic realities faced by older Americans and to inform the development of social policies The findings of the survey explore key questions such as why many older individuals are no longer in the labor force and whether they can return to work Additionally the survey delves into the financial conditions of the elderly examining the sources of their income the challenges they face when income is insufficient and whether they have any significant financial resources to fall back on Ultimately the report provides a snapshot of the economic status of the elderly in 1952 offering valuable insights into the scope of the problem and suggesting areas for further research and policy development This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was
