in which economists and businesses pursue policies that are conducive to minimizing environmental and ecological damage and therefore sustainable development Progress in Green Economics primarily focuses on developments in the transition of different industries and sectors to a sustainable environment friendly economic model The book presents 7 chapters that cover different topics that reflect these developments in the field from a number of academic and practical angles The topics covered in the book include a review of the Food Energy Water Waste FEWW paradigm in Asian countries an analysis of green economic forces in the Arctic region green economics for protected area tourism a conceptual analysis of green economics strategy sustainable development and green banking in South Africa and six sigma methodology for implementing green economic policies in different industries Each chapter is organized into reader friendly sections and is supplemented with references for the benefit of more involved scholars The multi regional perspectives along with the theoretical and practical information on the topic make this reference a timely and handy resource on green economics and sustainable development for academics scholars industrialists policymakers and economics enthusiasts alike

Public Finance, Monetary Policy and Market Issues Edward Shinnick, 2008 Economies throughout both the developed and developing world are interconnected like never before whether it is the financing of global challenges monetary integration among a group of countries or trade across national borders This increasing degree of interconnection brings both opportunities and challenges for the countries involved This volume provides an analysis of three distinct but closely related themes of economic interconnection Public Finance Monetary Policy and Market Issues The collection will stimulate further debate on these issues and in doing so will help to broaden the exchange of ideas among economists in both academia and business

Insights Into Gender Equity, Equality and Power Relations in Sub-saharan Africa Mansah Prah, 2013 Since gender entered the development discourse in the Seventies African countries have increasingly taken the concept on board in policy and practice This concern may be due to either one or a combination of the following factors the ideological positioning of African countries demands by their donors and development partners and demands by organised local groups and NGOs Gender in the development discourse ought to transform power relations between men and women and shift them to social relations that reflect their equal access to productive resources opportunities and social and material benefits The result of such actions should be an achievement of comparable status of women and men This volume initiated by OSSREA seeks to examine in more depth issues regarding the gender power imbalance in sub Saharan African countries with a specific focus on the eastern and southern African regions The chapters in this book present research that examines and analyses the effectiveness and efficiency of gender mainstreaming policies strategies and projects developed and implemented by national and international actors The themes inter weave with each other although they address gender issues in specific countries and specific contexts This can be explained by the shared colonial and post colonial heritage of African countries It is useful therefore to view the structure of the book as a spiral of inter connected issues that address similar themes approaching

them from different levels Purely for ease of reading the contributions have been organised into three parts with overarching themes that at first glance may seem not to fit well together A theme that runs through all the chapters is the persistence of patriarchal values and attitudes in Africa and its constraining effect on the achievement of gender equity and equality

Managing Development in a Globalized World Habib Zafarullah, Ahmed Shafiquel Huque, 2017-09-25 Traditionally development has been rooted in ideologies and assumptions prevalent in the developed world and in practices and strategies adopted by leading industrial nations However historically eclectic ideas and approaches often clash with existing long established notions of progress and modes of realizing social and economic change Managing Development in a Globalized World Concepts Processes Institutions explores this topic by incorporating ideas and interpretations that have previously been neglected or given inadequate attention in the discourse on developing countries It underscores development as a continuous process that must be supported by sound policies and efficient management supplying a wider understanding of the field The authors argue that the application of innovative development techniques and best practices is essential for obtaining optimum results in meeting the needs of society They examine the style of managing development with a new perspective that links the phenomenon with changing demands and the interplay of internal external actors and a host of stakeholders An exploration of key sectors in development provides clear comprehension of problems and solutions A careful synthesis of theoretical conceptual and empirical literature the book assesses real world situations and provides insight into the operational dynamics of development policies programs and institutions It focuses on goals values and dynamics of development management that are undergoing rapid changes and

continue to be enhanced to alleviate poverty and improve living standards in an era of globalization and inter regional and inter institutional synergies It highlights best practices essential for the efficient and effective delivery of human development services that are designed and put in place to obtain optimum results in meeting the needs of society The Poverty of the World Sheyda F. A. Jahanbani,2023 Bringing together foreign and domestic policy The Poverty of the World aims to offer a new answer to the question of why Americans became obsessed with poverty in the 1960s A history of how American liberals made sense of US power during a period of unprecedented affluence at home it uses intellectual and political biographies of major figures in postwar US social thought and politics to tell the story of how Americans invented the problem of global poverty and executed a war against it **Macroeconomics, 20e** Ahuja H.L.,2022-03 This textbook acquaints the students with the latest trends and tendencies in macroeconomics analysis and policy It keeps in view the macroeconomic **Nurturing Sustainable Prosperity in West Africa** Stephen Armah,2020-02-18 Through the lens of personal experience Dr Armah walks us through the scholarly research on culture corruption and economics as it applies to the Ghanaian experience We are left with a partially disappointing picture of a country wealthy in people and resources but poor in growth but cannot help but imagine that Ghana has turned a corner and that history may well turn out to be kind to the country Dr Armah clearly loves Kenneth Leonard Associate Professor University of Maryland at College Park Management consultants and corporate leadership experts have often verified Peter Drucker s observation that culture eats strategy for breakfast This book represents a heartfelt effort to recognize and grapple with the power of culture over economic strategy and development policy Stephen Armah s reflections on Ghanaian experiences reveal how a deeper appreciation of culture and mindset can help us understand the persistence of corruption and elements of a path forward Alex Winter Nelson Director of ACES Office of International Programs University of Illinois at Urbana Champaign This book is an interesting introduction to the ways in which culture influences economic growth and productivity in Ghana Using a combination of revealing anecdotes and citations from the literature Dr Armah explores the ways that culture can positively and negatively impact the institutions that are necessary to allow a country to thrive Aspects of culture that are a hindrance cannot be changed immediately but can over time adapt to improve the country Erik Cheever Professor Department of Engineering Swarthmore College An easy and thought provoking read It contains a bold message that I expect will facilitate an important conversation not only in Ghana but across Africa Saweda Liverpool Tasie Associate Professor of Agricultural Food and Resource Economics Michigan State University Armah s thesis is that corruption economic inefficiency and weak formal institutions are culturally rooted in Ghana and that the real work of development involves changing the worldviews that give life events their meaning and determine how people respond to formal policies and institutions This is a controversial argument that will provoke lively debate Armah s book puts the literature on economic development and culture into dialogue with stories of life in post independence Ghana Stephen A O Connell Gil and Frank Mustin Professor of

Economics Swarthmore College Using Ghana as a case study this book argues that local culture and tradition play a role in shaping economic institutions that operate in a country This book focuses on how certain cultural practices lead to an environment more susceptible to cronyism and corruption The book then discusses the relationship between culture and rampant corruption and how these in sum have harmed Ghana s economic development I have no doubt that culture in terms of attitudes values norms and behavior is the single most important explanatory factor in Ghana s underdevelopment It explains the widespread corruption poor work ethic and indiscipline These are the issues Stephen Armah courageously takes on in this book as needing to be addressed in Ghana s development Stephen Adei Professor Emeritus Ashesi University

Stephen Armah s Nurturing Sustainable Prosperity in West Africa explores and interprets the economics transnational organizations socio cultural politics as contexts and processes for understanding corruption in Ghana in particular and Africa as a whole Focusing on the continuous transactions among Ghanaians with reference to their social and personal obligations against the backdrop of the pervasive corruption exemplified in his case studies Armah clearly explains the process of constructing socio political mores and policies to remedy or root out chronic corruption Armah examines the institutionalized and non formal customary practices that engender nepotism absenteeism lawlessness and general malaise that hamper development The book provides an important analysis and solutions to corruption It will be of interest to not only to scholars of economics but also to the general reader policymakers and servant leaders in contemporary Africa Pashington Obeng Dean of the Faculty of Arts and Science Ashesi University

Competition Law and Economic Regulation in Southern Africa Imraan Valodia,Jonathan Klaaren,Simon Roberts,2017-07-04 Shaping markets through competition and economic regulation is at the heart of addressing the development challenges facing countries in southern Africa The contributors to Competition Law and Economic Regulation Addressing Market Power in southern Africa critically assess the efficacy of the competition and economic regulation frameworks including the impact of a number of the regional competition authorities in a range of sectors throughout southern Africa Featuring academics as well as practitioners in the field the book addresses issues common to southern African countries where markets are small and concentrated with particularly high barriers to entry and where the resources to enforce legislation against anti competitive conduct are limited What is needed the contributors argue is an understanding of competition and regional integration as part of an inclusive growth agenda for Africa By examining competition and regulation in a single framework and viewing this within the southern African experience this volume adds new perspectives to the global competition literature It is an essential reference tool and will be of great interest to policymakers and regulators as well as the rapidly growing ecosystem of legal practitioners and economists engaged in the field

Innovative Water Resource Use and Management for Poverty Reduction in Sub-Saharan Africa: An Anthology

Chanie, Paulos, 2014-04-03 Like in many parts of the world water resources in sub Saharan Africa SSA have been pivotal for human survival economic growth social development and practicing certain religion and cultural ethos However in spite of the intrinsic values of water its use and management in sub Saharan Africa has not been without limitations The demand for water resources is increasing mainly due to rapid population growth industrialization and urbanization and dealing with water related issues has been complex and challenging for sustainable growth Whilst there are various efforts by national governments non government organizations and communities to effectively and efficiently utilize and manage water resources there are few comprehensive studies in sub Saharan Africa that show the impact of the efforts on poverty reduction Although certain reports indicate that many SSA countries lack clear vision on how water use can be harnessed with pro poor growth and how poor communities can be capacitated to use water for poverty reduction there are little

exhaustive studies that clearly show familiar and innovative water use and management interventions followed by communities national governments and other stakeholders and demonstrate the challenges and successes of the same Cognizant of the knowledge gap in 2012 OSSREA launched a research project on ordinary and innovative water use and management patterns and practices in SSA with a view to generate new knowledge on unexploited opportunities that could enhance the contribution of water resources to poverty reduction This anthology documents various issues including water use and management in agriculture especially in irrigation projects in Ethiopia Kenya Uganda and Zimbabwe water harvesting in Kenya and Uganda the role of local water use institutions in Ethiopia and water source maintenance and protection in Uganda

The Enduring Struggle John Norris,2021-07-01 This comprehensive history of the U S Agency for International Development the U S government s official bilateral foreign aid agency deserves to be read by all students of U S foreign policy Foreign Affairs US Foreign aid is one of the most misunderstood functions of our federal government Consuming less than 1% of the federal government budget it has nonetheless played an outsized role in political debate At the center of this controversy and misunderstanding has been the U S Agency for International Development or AID the government agency created during the Kennedy administration to administer America s foreign assistance programs an often conflicted behemoth with a presence spanning the globe In this book journalist and foreign policy expert John Norris provides a compelling and rich story of AID warts and all There have been moments of enormous triumph the eradication of smallpox the Green Revolution efforts to bring family planning to millions of women for the first time There have also been florid headline grabbing failures in places like Vietnam and Iraq missteps born out of ignorance and ethnocentrism and money that flowed into the coffers of despots like President Mobutu in Zaire In totality the work of AID has touched millions and millions of lives in ways that have been truly profound both good and bad On the Eve of AID s 60th anniversary Norris shares history on an almost epic scale that remains largely untold

Absolute Poverty and Global Justice Michael Schramm,Thomas Pogge,2016-03-23 Absolute poverty causes about one third of all human deaths some 18 million annually and blights billions of lives with hunger and disease Developing universalizable norms aimed at tackling absolute poverty and the complex and multilayered problems associated with it this book considers the levels trends and determinants of absolute poverty and global inequality Examining whether much faster progress against absolute poverty is possible through reductions in national and global inequalities that produce economic growth for poor countries and households this book suggests that diverse moral views imply that international agencies as well as the citizens corporations and governments of affluent countries bear a moral responsibility to reduce absolute poverty In considering strategies of eradication through specific policies and structural reforms it is argued that because of its moral importance and requirement for only modest efforts and resources the goal of overcoming absolute poverty must be given much higher political priority by international agencies and governments of affluent countries Suggesting that these agencies should be encouraged to facilitate and

promote new initiatives this book concludes with a discussion of how such initiatives might be realized
